PRACTICE

Pectoral girdle, anterior (model)

1. Name this bone.

_____

2. Name this bone.

_____

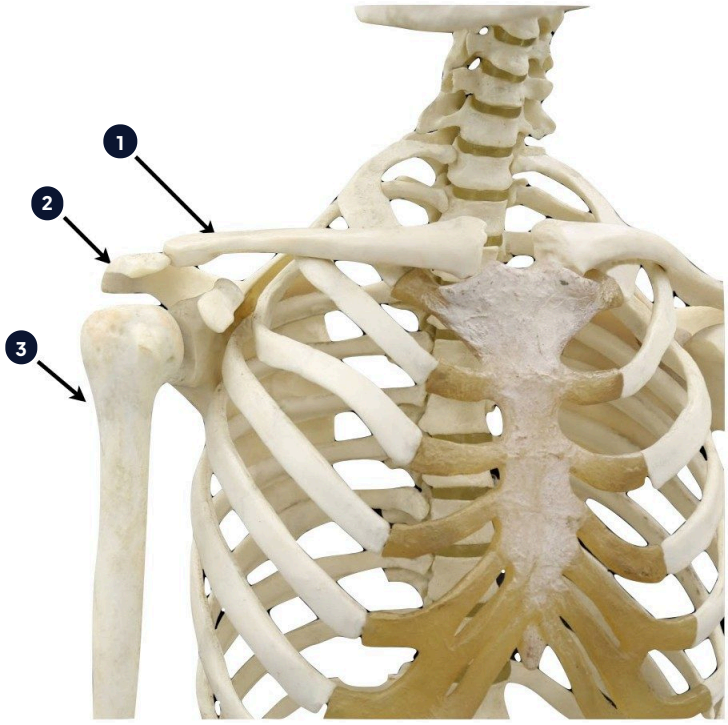

3. Name this bone.

_____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Pectoral girdle, anterior (model)

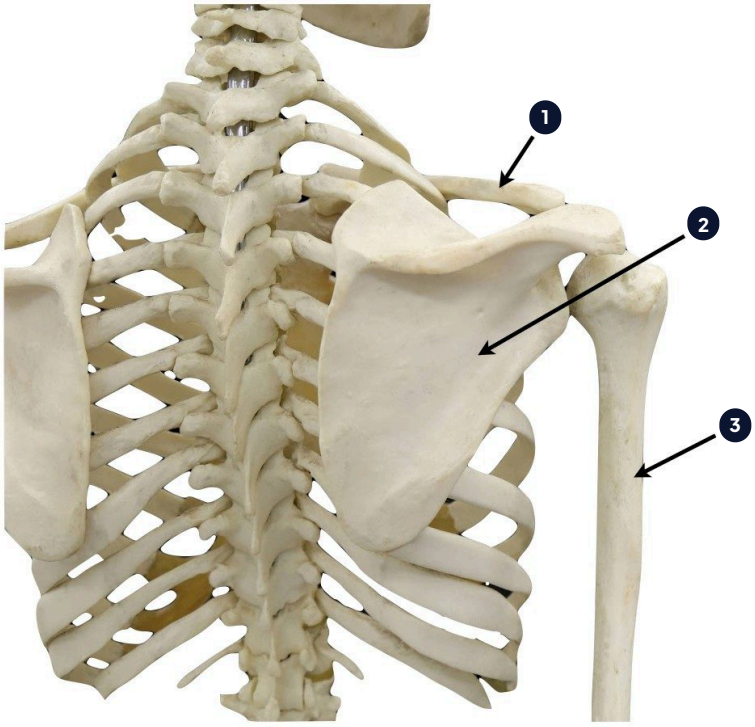

1. Name this bone.
   Clavicle
2. Name this bone.
   Scapula
3. Name this bone.
   Humerus

Check your answers, then wipe the front clean for the next round.

PRACTICE

Pectoral girdle, posterior (model)

1. Name this bone.

_____

2. Name this bone.

_____

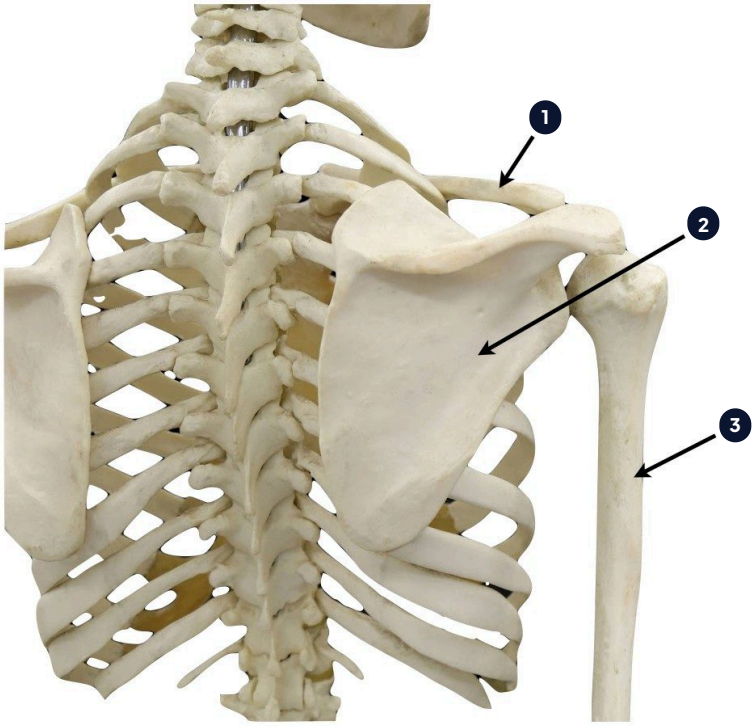

3. Name this bone.

_____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Pectoral girdle, posterior (model)

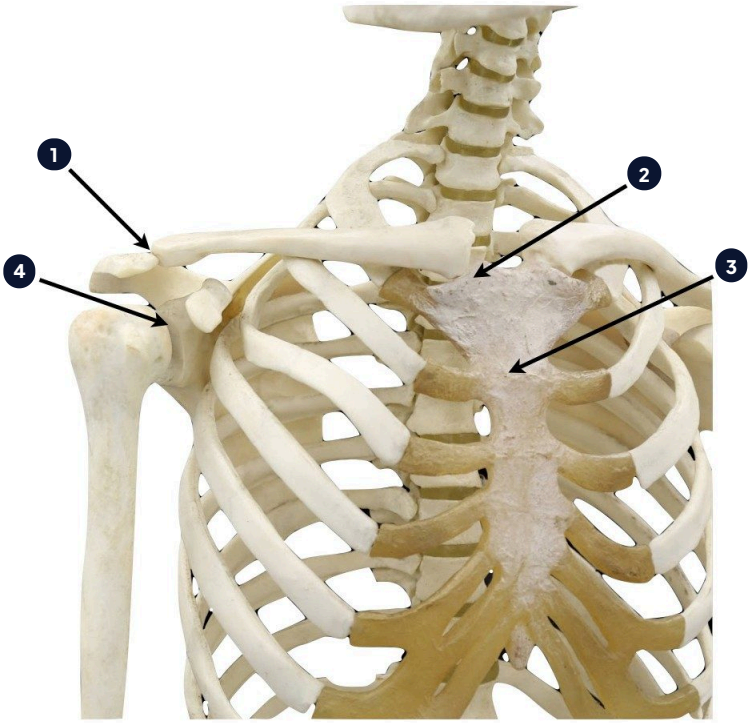

1. Name this bone.
   Clavicle
2. Name this bone.
   Scapula
3. Name this bone.
   Humerus

Check your answers, then wipe the front clean for the next round.

PRACTICE

Joints of the pectoral girdle (model)

1. Name this joint.

_____

2. Name this joint.

_____

3. Name this joint.

_____

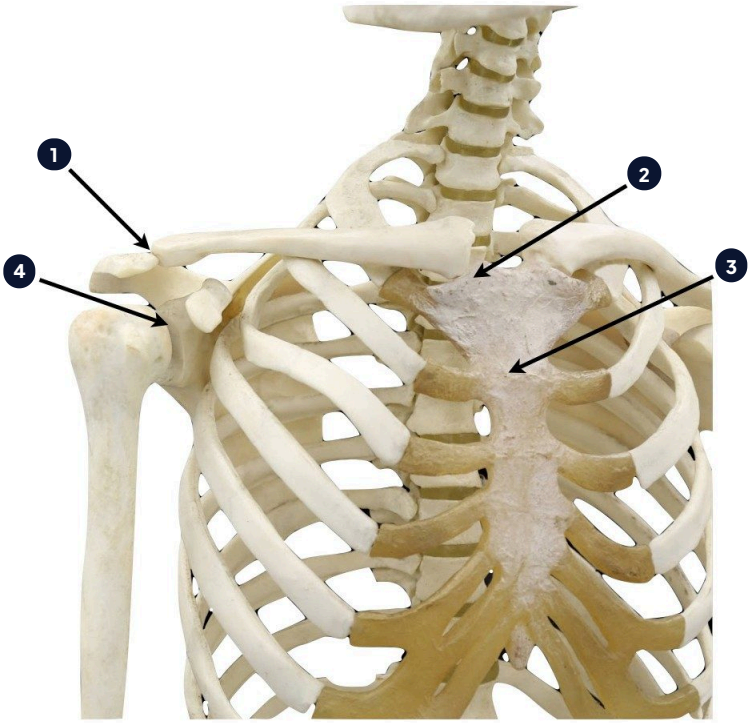

4. Name this joint.

_____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Joints of the pectoral girdle (model)

1. Name this joint.
   Acromioclavicular joint
2. Name this joint.
   Sternoclavicular joint
3. Name this joint.
   Manubriosternal joint
4. Name this joint.
   Glenohumeral joint

Check your answers, then wipe the front clean for the next round.

PRACTICE

Clavicle (model)

1. Name this feature of the clavicle.

_____

2. Name this end of the clavicle.

_____

3. Name this end of the clavicle.

_____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Clavicle (model)

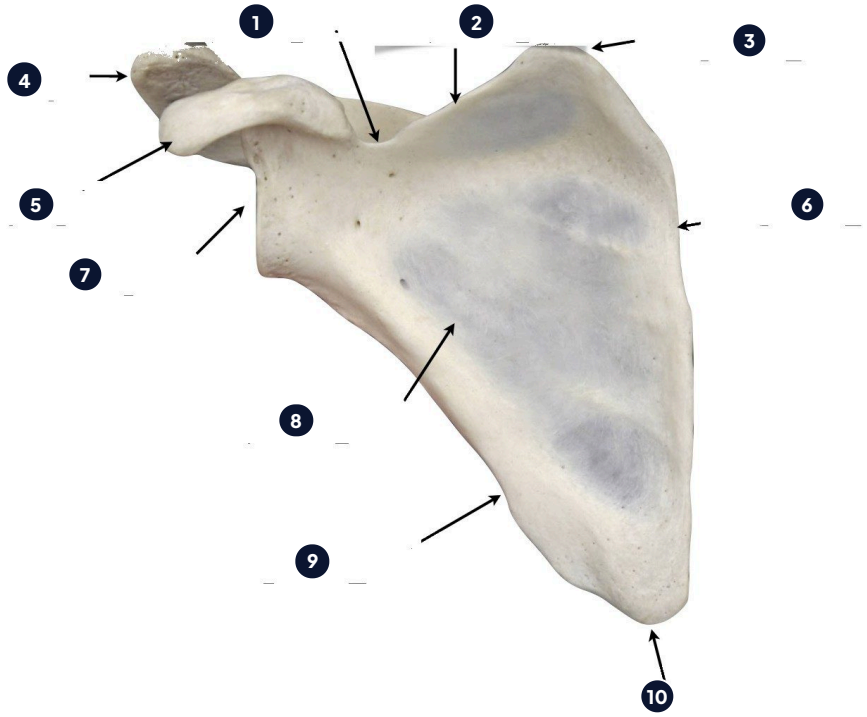

1. Name this feature of the clavicle.
   Conoid tubercle
2. Name this end of the clavicle.
   Acromial end
3. Name this end of the clavicle.
   Sternal end

Check your answers, then wipe the front clean for the next round.

PRACTICE

Scapula, anterior (model)

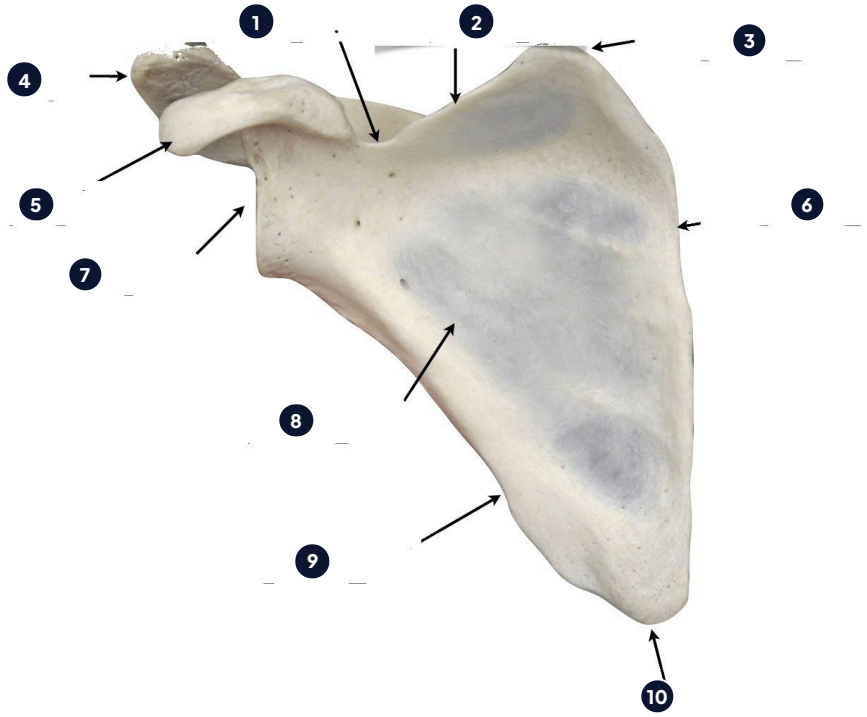

1. Name this feature of the scapula. _____
2. Name this feature of the scapula. _____
3. Name this feature of the scapula. _____
4. Name this feature of the scapula. _____
5. Name this feature of the scapula. _____
6. Name this feature of the scapula. _____
7. Name this feature of the scapula. _____
8. Name this feature of the scapula. _____
9. Name this feature of the scapula. _____
10. Name this feature of the scapula. _____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Scapula, anterior (model)

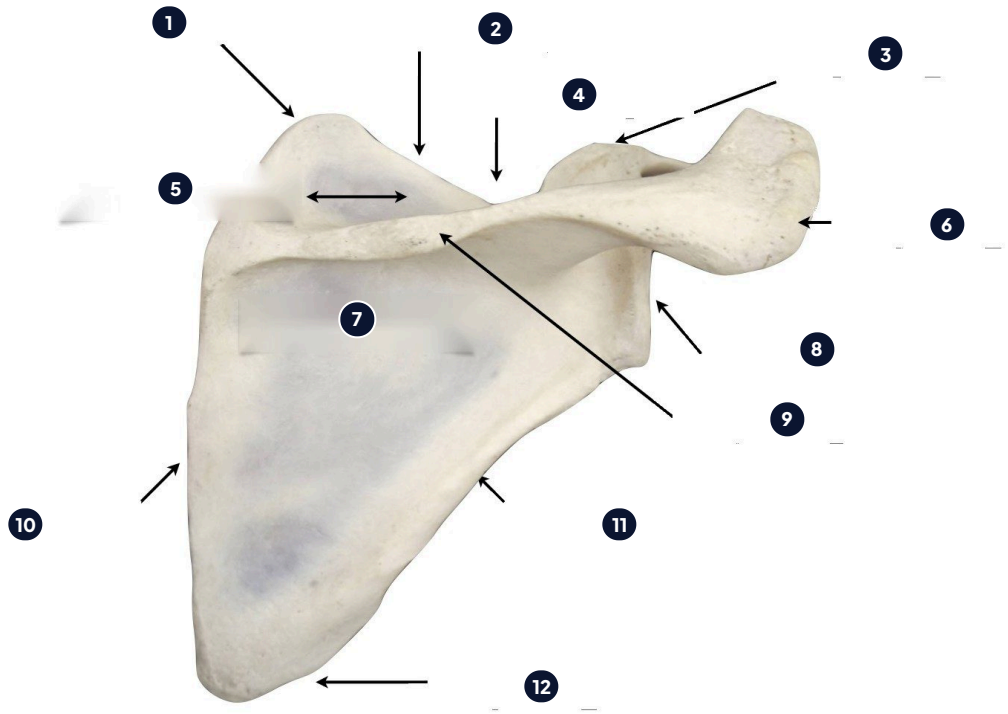

1. Name this feature of the scapula.
   Suprascapular notch
2. Name this feature of the scapula.
   Superior border
3. Name this feature of the scapula.
   Superior angle
4. Name this feature of the scapula.
   Acromion
5. Name this feature of the scapula.
   Coracoid process
6. Name this feature of the scapula.
   Medial (vertebral) border
7. Name this feature of the scapula.
   Glenoid cavity (fossa)
8. Name this feature of the scapula.
   Subscapular fossa
9. Name this feature of the scapula.
   Lateral (axillary) border
10. Name this feature of the scapula.
    Inferior angle

Check your answers, then wipe the front clean for the next round.

PRACTICE

Scapula, posterior (model)

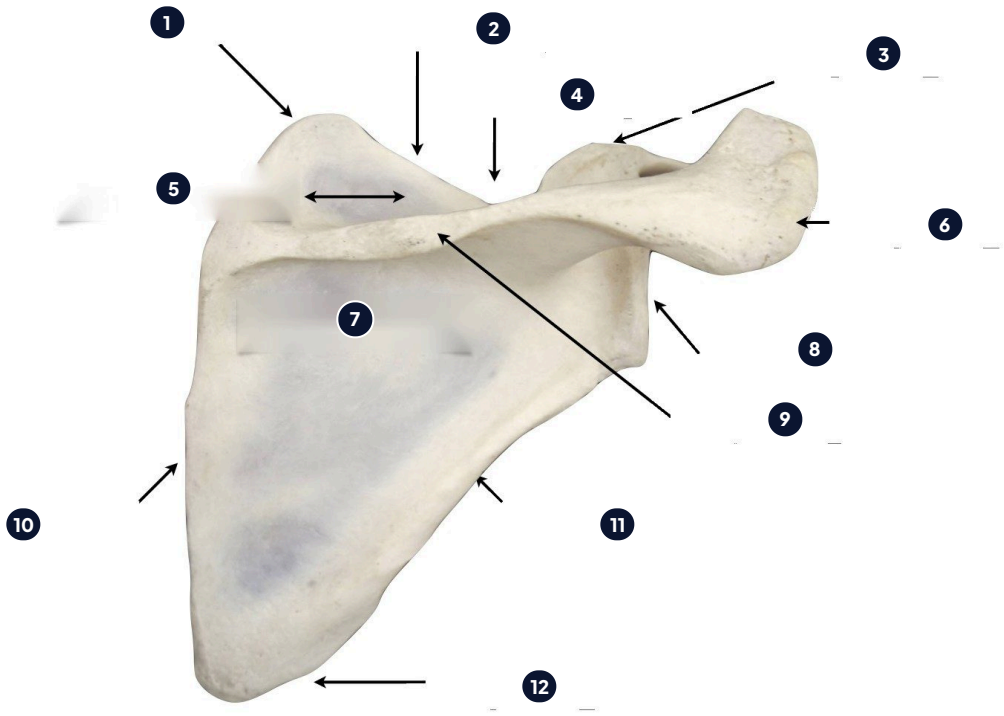

1. Name this feature of the scapula.
2. Name this feature of the scapula.
3. Name this feature of the scapula.
4. Name this feature of the scapula.
5. Name this feature of the scapula.
6. Name this feature of the scapula.
7. Name this feature of the scapula.
8. Name this feature of the scapula.
9. Name this feature of the scapula.
10. Name this feature of the scapula.
11. Name this feature of the scapula.
12. Name this feature of the scapula.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Scapula, posterior (model)

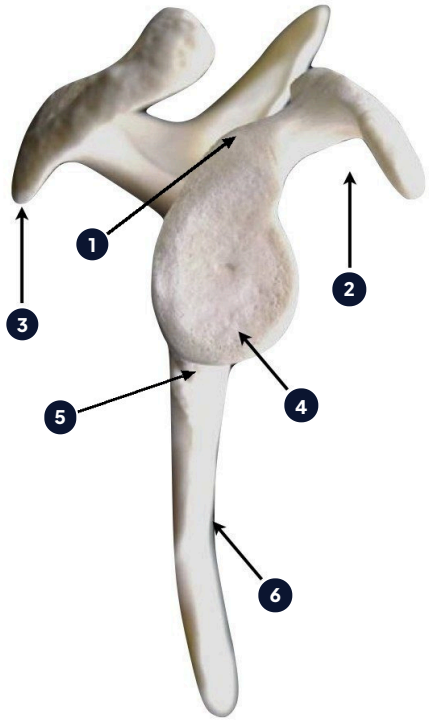

1. Name this feature of the scapula.
   Superior angle
2. Name this feature of the scapula.
   Superior border
3. Name this feature of the scapula.
   Coracoid process
4. Name this feature of the scapula.
   Suprascapular notch
5. Name this feature of the scapula.
   Supraspinous fossa
6. Name this feature of the scapula.
   Acromion
7. Name this feature of the scapula.
   Infraspinous fossa
8. Name this feature of the scapula.
   Glenoid cavity (fossa)
9. Name this feature of the scapula.
   Spine of scapula
10. Name this feature of the scapula.
    Medial (vertebral) border
11. Name this feature of the scapula.
    Lateral (axillary) border
12. Name this feature of the scapula.
    Inferior angle

Check your answers, then wipe the front clean for the next round.

PRACTICE

Scapula, lateral (model)

1. Name this feature of the scapula.

2. Name this feature of the scapula.

3. Name this feature of the scapula.

4. Name this feature of the scapula.

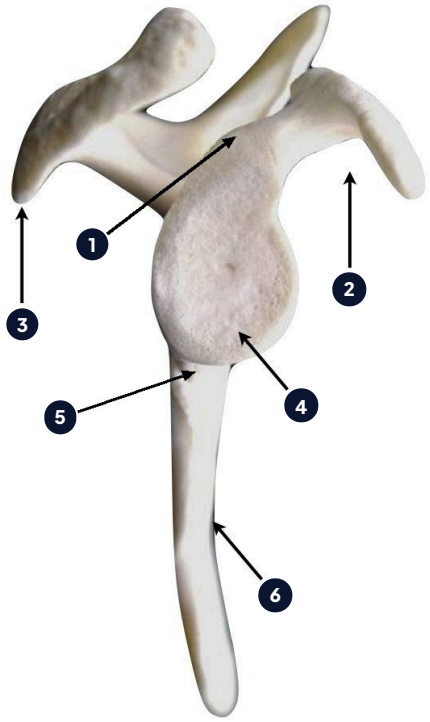

5. Name this feature of the scapula.

6. Name this feature of the scapula.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Scapula, lateral (model)

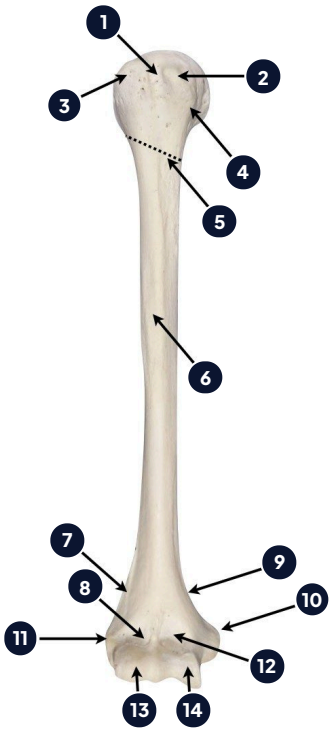

1. Name this feature of the scapula.
   Supraglenoid tubercle
2. Name this feature of the scapula.
   Coracoid process
3. Name this feature of the scapula.
   Acromion
4. Name this feature of the scapula.
   Glenoid cavity (fossa)
5. Name this feature of the scapula.
   Infraglenoid tubercle
6. Name this feature of the scapula.
   Lateral (axillary) border

Check your answers, then wipe the front clean for the next round.

Humerus, anterior (model)

PRACTICE

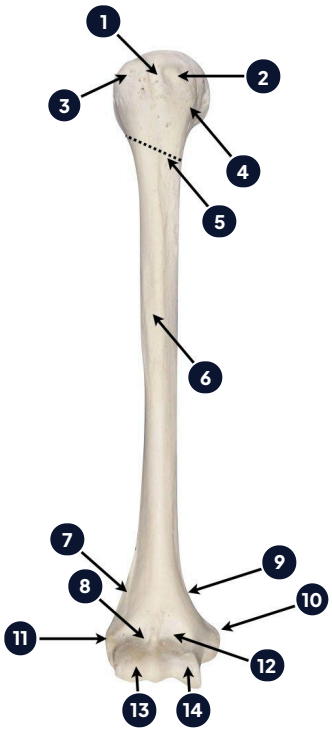

1. Name this feature of the humerus. _____
2. Name this feature of the humerus. _____
3. Name this feature of the humerus. _____
4. Name this feature of the humerus. _____
5. Name this feature of the humerus. _____
6. Name this feature of the humerus. _____
7. Name this feature of the humerus. _____
8. Name this feature of the humerus. _____
9. Name this feature of the humerus. _____
10. Name this feature of the humerus. _____
11. Name this feature of the humerus. _____
12. Name this feature of the humerus. _____
13. Name this feature of the humerus. _____
14. Name this feature of the humerus. _____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Humerus, anterior (model)

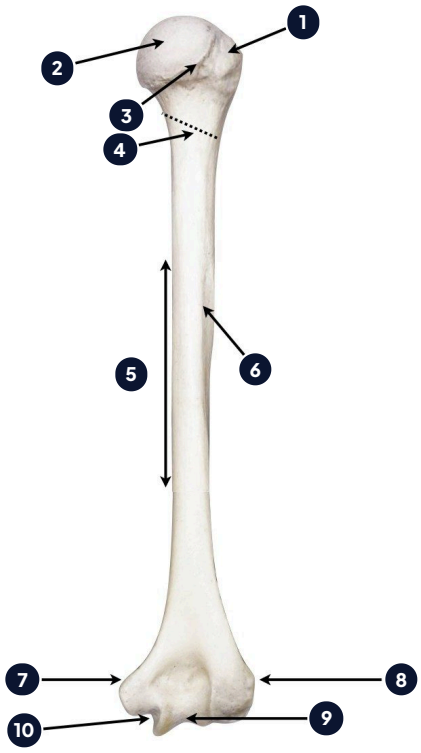

1. Name this feature of the humerus.
   Intertubercular sulcus
2. Name this feature of the humerus.
   Lesser tubercle
3. Name this feature of the humerus.
   Greater tubercle
4. Name this feature of the humerus.
   Anatomical neck
5. Name this feature of the humerus.
   Surgical neck
6. Name this feature of the humerus.
   Deltoid tuberosity
7. Name this feature of the humerus.
   Lateral supracondylar ridge
8. Name this feature of the humerus.
   Radial fossa
9. Name this feature of the humerus.
   Medial supracondylar ridge
10. Name this feature of the humerus.
    Medial epicondyle
11. Name this feature of the humerus.
    Lateral epicondyle
12. Name this feature of the humerus.
    Coronoid fossa
13. Name this feature of the humerus.
    Capitulum
14. Name this feature of the humerus.
    Trochlea

Check your answers, then wipe the front clean for the next round.

PRACTICE

Humerus, posterior (model)

1. Name this feature of the humerus.

2. Name this feature of the humerus.

3. Name this feature of the humerus.

4. Name this feature of the humerus.

5. Name this feature of the humerus.

6. Name this feature of the humerus.

7. Name this feature of the humerus.

8. Name this feature of the humerus.

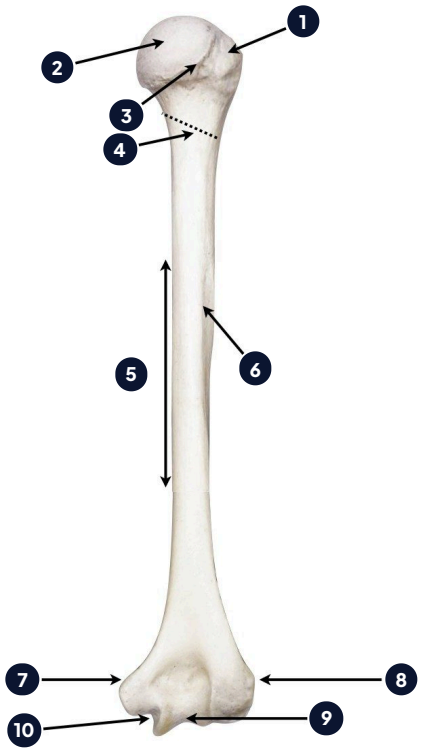

9. Name this feature of the humerus.

10. Name this feature of the humerus.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Humerus, posterior (model)

1. Name this feature of the humerus.
   Greater tubercle
2. Name this feature of the humerus.
   Head
3. Name this feature of the humerus.
   Anatomical neck
4. Name this feature of the humerus.
   Surgical neck
5. Name this feature of the humerus.
   Body (shaft) of humerus
6. Name this feature of the humerus.
   Radial groove
7. Name this feature of the humerus.
   Medial epicondyle
8. Name this feature of the humerus.
   Lateral epicondyle
9. Name this feature of the humerus.
   Trochlea
10. Name this feature of the humerus.
    Ulnar groove

Check your answers, then wipe the front clean for the next round.

PRACTICE

Humerus, posterior view: distal end

1 Name this bone feature.

_____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Humerus, posterior view: distal end

1 Name this bone feature.
Olecranon fossa

Check your answers, then wipe the front clean for the next round.

PRACTICE

Ulna, lateral and anterior (model)

1. Name this feature of the ulna.

2. Name this feature of the ulna.

3. Name this feature of the ulna.

4. Name this feature of the ulna.

5. Name this feature of the ulna.

6. Name this feature of the ulna.

7. Name this feature of the ulna.

8. Name this feature of the ulna.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Ulna, lateral and anterior (model)

1. Name this feature of the ulna.
   Olecranon process
2. Name this feature of the ulna.
   Olecranon process
3. Name this feature of the ulna.
   Trochlear notch
4. Name this feature of the ulna.
   Trochlear notch
5. Name this feature of the ulna.
   Radial notch
6. Name this feature of the ulna.
   Coronoid process
7. Name this feature of the ulna.
   Ulnar tuberosity
8. Name this feature of the ulna.
   Styloid process

Check your answers, then wipe the front clean for the next round.

PRACTICE

Radius (model)

1. Name this feature of the radius.

2. Name this feature of the radius.

3. Name this feature of the radius.

4. Name this feature of the radius.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Radius (model)

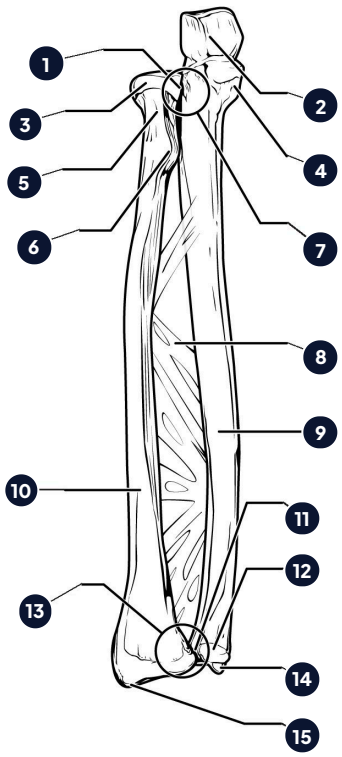

1. Name this feature of the radius.
   Articular fovea
2. Name this feature of the radius.
   Head of radius
3. Name this feature of the radius.
   Radial tuberosity
4. Name this feature of the radius.
   Styloid process

Check your answers, then wipe the front clean for the next round.

PRACTICE

Radius and ulna, anterior (OpenStax drawing)

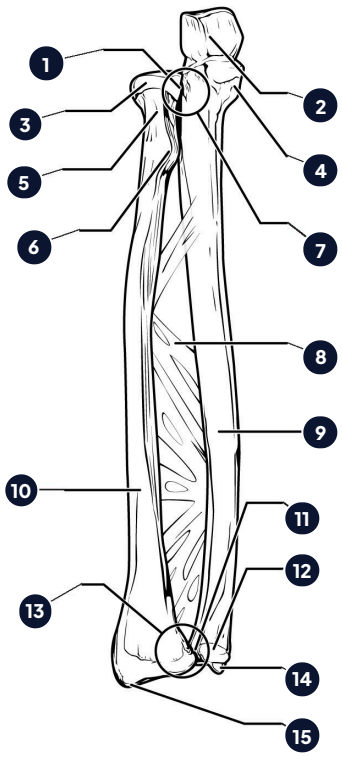

Right forearm, anterior view

1. Name this feature of the ulna.
2. Name this feature of the ulna.
3. Name this feature of the radius.
4. Name this feature of the ulna.
5. Name this feature of the radius.
6. Name this feature of the radius.
7. Name this joint.
8. Name this membrane.
9. Name this bone.
10. Name this bone.
11. Name this feature of the radius.
12. Name this feature of the ulna.
13. Name this joint.
14. Name this feature of the ulna.
15. Name this feature of the radius.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Radius and ulna, anterior (OpenStax drawing)

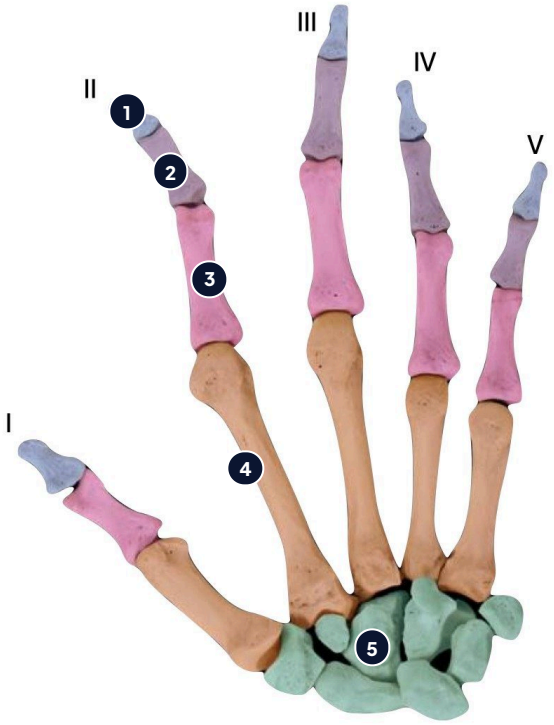

Right forearm, anterior view

1. Name this feature of the ulna.
   Radial notch
2. Name this feature of the ulna.
   Trochlear notch
3. Name this feature of the radius.
   Head of radius
4. Name this feature of the ulna.
   Coronoid process
5. Name this feature of the radius.
   Neck of radius
6. Name this feature of the radius.
   Radial tuberosity
7. Name this joint.
   Proximal radioulnar joint
8. Name this membrane.
   Interosseous membrane
9. Name this bone.
   Ulna
10. Name this bone.
    Radius
11. Name this feature of the radius.
    Ulnar notch
12. Name this feature of the ulna.
    Head of ulna
13. Name this joint.
    Distal radioulnar joint
14. Name this feature of the ulna.
    Styloid process of ulna
15. Name this feature of the radius.
    Styloid process of radius

Check your answers, then wipe the front clean for the next round.

Hand, color-coded (model)

PRACTICE

1. Name this group of bones.

2. Name this group of bones.

3. Name this group of bones.

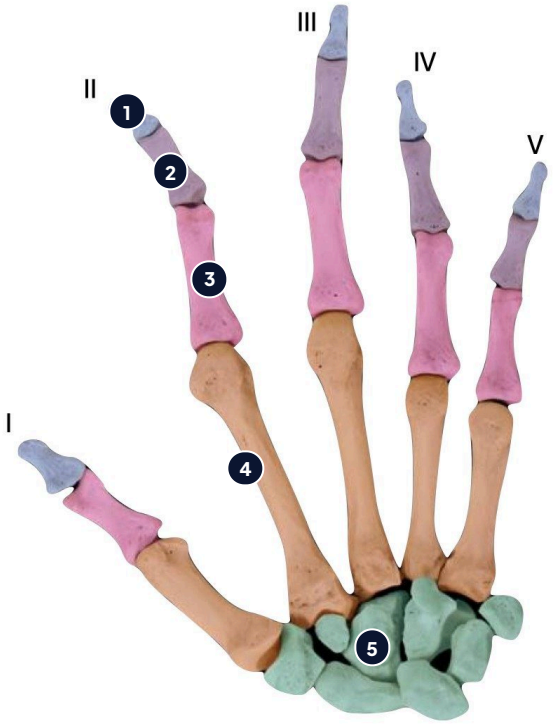

4. Name this group of bones.

5. Name this group of bones.

Write each answer on its line with a dry-erase marker, then flip the card to check.

Hand, color-coded (model)

ANSWER KEY

1. Name this group of bones.
   Distal phalanx
2. Name this group of bones.
   Middle phalanx
3. Name this group of bones.
   Proximal phalanx
4. Name this group of bones.
   Metacarpals
5. Name this group of bones.
   Carpals

Check your answers, then wipe the front clean for the next round.

Carpal bones, color-coded (model)

PRACTICE

1. Name this carpal bone. _____
2. Name this carpal bone. _____
3. Name this carpal bone. _____
4. Name this carpal bone. _____
5. Name this carpal bone. _____
6. Name this carpal bone. _____
7. Name this carpal bone. _____
8. Name this carpal bone. _____

Write each answer on its line with a dry-erase marker, then flip the card to check.

Carpal bones, color-coded (model)

ANSWER KEY

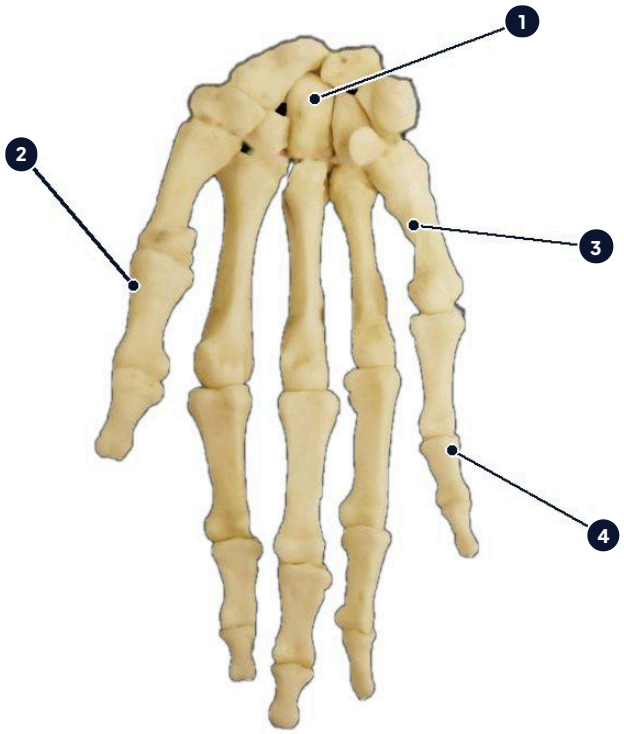

1. Name this carpal bone.
   Hamate
2. Name this carpal bone.
   Pisiform
3. Name this carpal bone.
   Trapezium
4. Name this carpal bone.
   Trapezoid
5. Name this carpal bone.
   Capitate
6. Name this carpal bone.
   Triquetrum
7. Name this carpal bone.
   Scaphoid
8. Name this carpal bone.
   Lunate

Check your answers, then wipe the front clean for the next round.

PRACTICE

Bones of the hand, anterior view

1 Name this group of bones.

_____

2 Name this digit.

_____

3 Name this group of bones.

_____

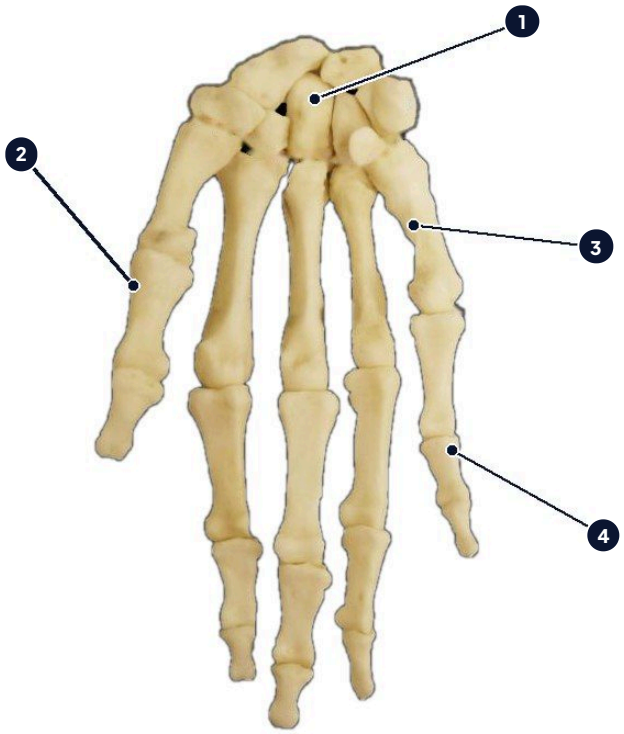

4 Name this group of bones.

_____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Bones of the hand, anterior view

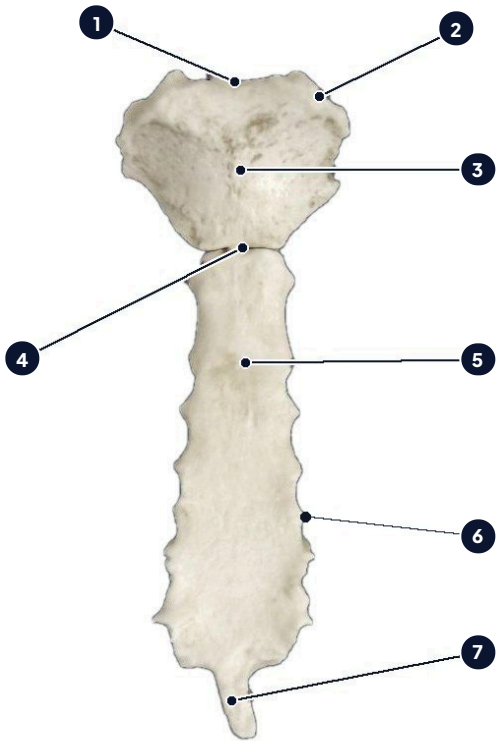

1. Name this group of bones.
   Carpals
2. Name this digit.
   Pollex (thumb)
3. Name this group of bones.
   Metacarpals
4. Name this group of bones.
   Phalanges

Check your answers, then wipe the front clean for the next round.

PRACTICE

Sternum, anterior view

1 Name this bone feature.

_____

2 Name this bone feature.

_____

3 Name this part of the sternum.

_____

4 Name this bone feature.

_____

5 Name this part of the sternum.

_____

6 Name this bone feature.

_____

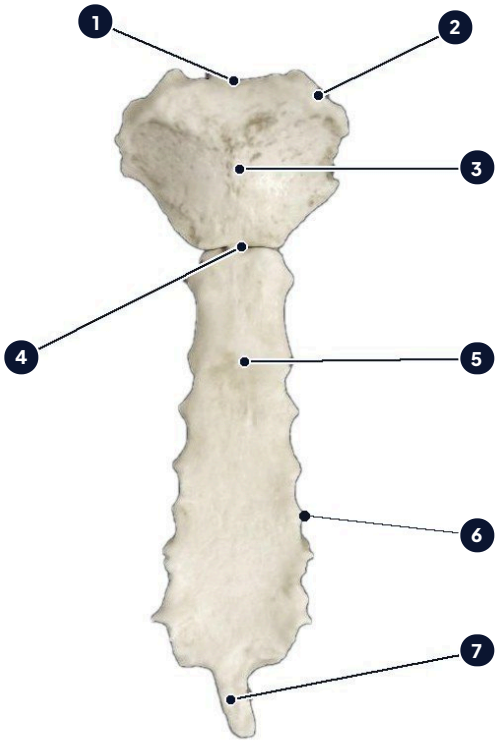

7 Name this part of the sternum.

_____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Sternum, anterior view

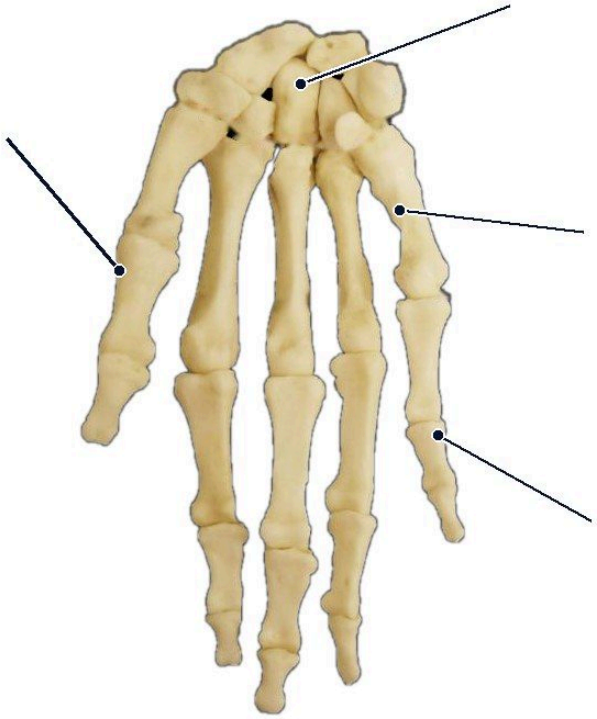

1. Name this bone feature.
   Jugular notch
2. Name this bone feature.
   Clavicular notch
3. Name this part of the sternum.
   Manubrium
4. Name this bone feature.
   Sternal angle
5. Name this part of the sternum.
   Body of sternum
6. Name this bone feature.
   Costal notch
7. Name this part of the sternum.
   Xiphoid process

Check your answers, then wipe the front clean for the next round.

PRACTICE

Upper limb bones: quick check

1. Which bone of the forearm is on the thumb side?

2. Which part of the humerus meets the radius? Which meets the ulna?

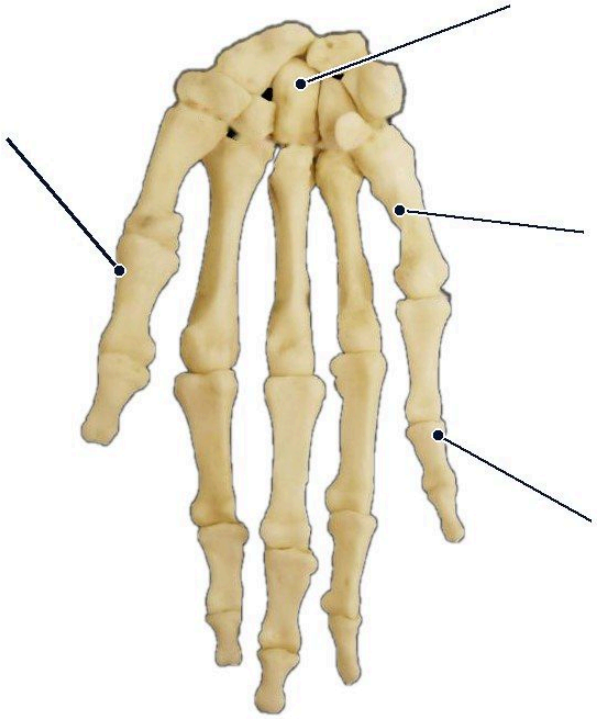

3. How many carpals, metacarpals and phalanges are in one hand?

4. Which part of the scapula forms the shoulder joint with the humerus?

Write each answer on its line with a dry-erase marker, then flip the card to check.

Upper limb bones: quick check

ANSWER KEY

1. Which bone of the forearm is on the thumb side?
   Radius

2. Which part of the humerus meets the radius? Which meets the ulna?
   Capitulum meets the radius; trochlea meets the ulna

3. How many carpals, metacarpals and phalanges are in one hand?
   8 carpals, 5 metacarpals, 14 phalanges

4. Which part of the scapula forms the shoulder joint with the humerus?
   Glenoid cavity (fossa)

Check your answers, then wipe the front clean for the next round.

PRACTICE

Carpals and digits: quick check

1. Name the proximal row of carpals, lateral to medial.

2. Name the distal row of carpals, medial to lateral.

3. Which digit has no middle phalanx?

4. Metacarpals are numbered 1 to 5 starting on which side?

Write each answer on its line with a dry-erase marker, then flip the card to check.

Carpals and digits: quick check

ANSWER KEY

1. Name the proximal row of carpals, lateral to medial.
   Scaphoid, lunate, triquetrum, pisiform (So Long To Pinky)
2. Name the distal row of carpals, medial to lateral.
   Hamate, capitate, trapezoid, trapezium (Here Comes The Thumb)
3. Which digit has no middle phalanx?
   Thumb (pollex)
4. Metacarpals are numbered 1 to 5 starting on which side?
   Lateral (thumb side)

Check your answers, then wipe the front clean for the next round.
