PRACTICE

Anterior body regions

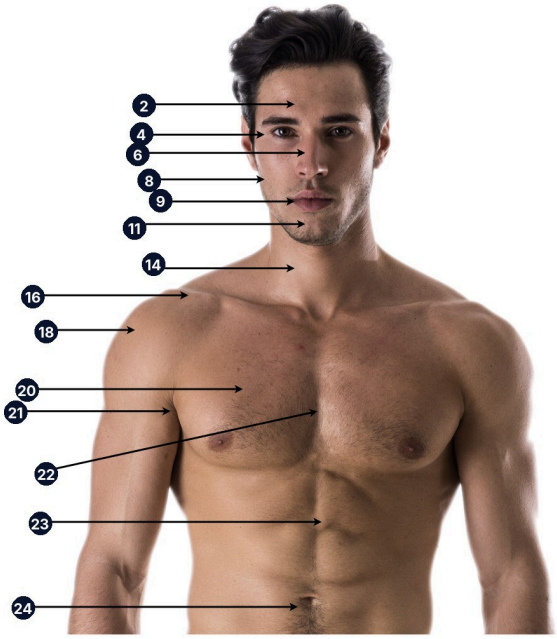

1. Name this body region.
2. Name this body region.
3. Name this body region.
4. Name this body region.
5. Name this body region.
6. Name this body region.
7. Name this body region.
8. Name this body region.
9. Name this body region.
10. Name this body region.
11. Name this body region.
12. Name this body region.
13. Name this body region.
14. Name this body region.
15. Name this body region.
16. Name this body region.
17. Name this body region.
18. Name this body region.
19. Name this body region.
20. Name this body region.
21. Name this body region.
22. Name this body region.
23. Name this body region.
24. Name this body region.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Anterior body regions

1. Name this body region. **Cranial (cephalic)**
2. Name this body region. **Frontal**
3. Name this body region. **Acromial**
4. Name this body region. **Orbital (ocular)**
5. Name this body region. **Deltoid**
6. Name this body region. **Nasal**
7. Name this body region. **Axillary**
8. Name this body region. **Buccal**
9. Name this body region. **Oral (oris)**
10. Name this body region. **Brachial**
11. Name this body region. **Mental**
12. Name this body region. **Antecubital**
13. Name this body region. **Umbilical**
14. Name this body region. **Cervical**
15. Name this body region. **Antebrachial**
16. Name this body region. **Acromial**
17. Name this body region. **Carpal**
18. Name this body region. **Deltoid**
19. Name this body region. **Digital**
20. Name this body region. **Mammary**
21. Name this body region. **Axillary**
22. Name this body region. **Sternal**
23. Name this body region. **Abdominal**
24. Name this body region. **Umbilical**

Check your answers, then wipe the front clean for the next round.

PRACTICE

Anterior body regions: pelvis and lower limb

1. Name this body region.

2. Name this body region.

3. Name this body region.

4. Name this body region.

5. Name this body region.

6. Name the region inside the white outline.

7. Name this body region.

8. Name the region inside the white outline.

9. Name this body region.

10. Name this body region.

11. Name this body region.

12. Name this body region.

13. Name this body region.

14. Name this body region.

15. Name this body region.

16. Name this body region.

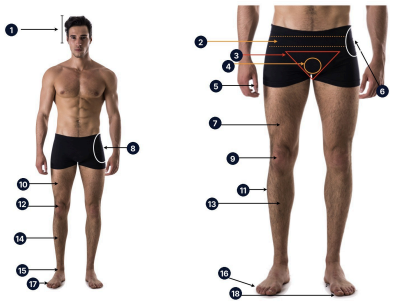

17. Name this body region.

18. Name this body region.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Anterior body regions: pelvis and lower limb

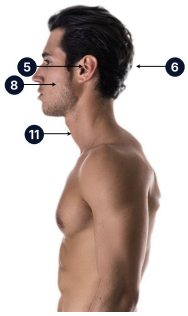

1. Name this body region.
   Cranial (cephalic)
2. Name this body region.
   Pelvic
3. Name this body region.
   Inguinal
4. Name this body region.
   Pubic
5. Name this body region.
   Pollex (thumb)
6. Name the region inside the white outline.
   Coxal
7. Name this body region.
   Femoral
8. Name the region inside the white outline.
   Coxal
9. Name this body region.
   Patellar
10. Name this body region.
    Femoral
11. Name this body region.
    Fibular
12. Name this body region.
    Patellar
13. Name this body region.
    Crural
14. Name this body region.
    Crural
15. Name this body region.
    Tarsal
16. Name this body region.
    Digital (toes)
17. Name this body region.
    Digital (hallux)
18. Name this body region.
    Hallux (big toe)

Check your answers, then wipe the front clean for the next round.

PRACTICE

Posterior body regions

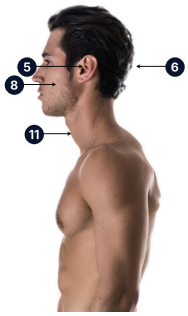

1. Name this body region.
2. Name this body region.
3. Name this body region.
4. Name this body region.
5. Name this body region.
6. Name this body region.
7. Name this body region.
8. Name this body region.
9. Name this body region.
10. Name this body region.
11. Name this body region.
12. Name this body region.
13. Name this body region.
14. Name this body region.
15. Name this body region.
16. Name this body region.
17. Name this body region.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Posterior body regions

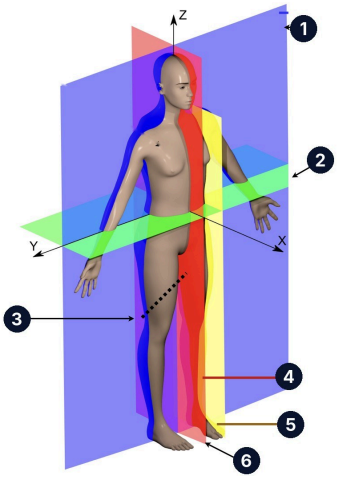

1. Name this body region. **Occipital**
2. Name this body region. **Cranial (cephalic)**
3. Name this body region. **Cervical**
4. Name this body region. **Scapular**
5. Name this body region. **Otic (auris)**
6. Name this body region. **Occipital**
7. Name this body region. **Vertebral**
8. Name this body region. **Buccal**
9. Name this body region. **Lumbar**
10. Name this body region. **Sacral**
11. Name this body region. **Cervical**
12. Name this body region. **Gluteal**
13. Name this body region. **Femoral**
14. Name this body region. **Popliteal**
15. Name this body region. **Sural**
16. Name this body region. **Tarsal**
17. Name this body region. **Calcaneal**

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · BODY REGIONS, PLANES AND CAVITIES · CARD 4 · PLANES AND DIRECTIONS

PRACTICE

Anatomical position and body planes

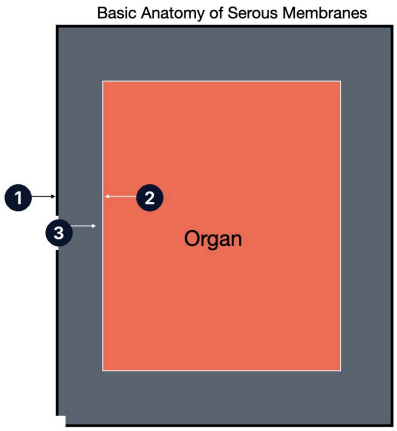

1. Name this plane.
2. Name this plane.
3. Name this plane.
4. Name this plane.
5. Name this plane.
6. Name this plane.

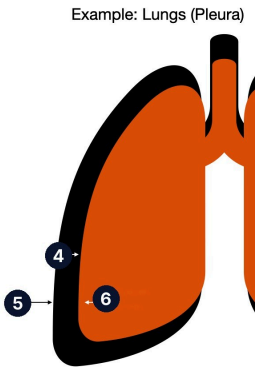

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BODY REGIONS, PLANES AND CAVITIES · CARD 6 · CAVITIES AND MEMBRANES

PRACTICE

Serous membranes

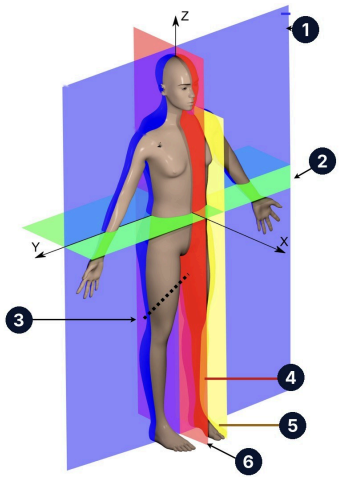

1. Name the outer layer of the serous membrane.
2. Name the inner layer, on the organ.
3. Name the space between the layers.
4. Name this space.
5. Name this layer.
6. Name this layer.

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BODY REGIONS, PLANES AND CAVITIES · CARD 4 · PLANES AND DIRECTIONS

ANSWER KEY

Anatomical position and body planes

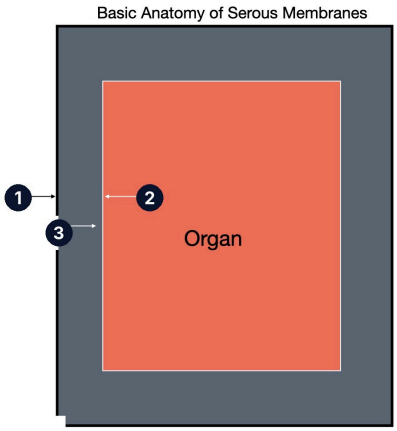

1. Name this plane.
   Frontal (coronal) plane
2. Name this plane.
   Transverse (horizontal) plane
3. Name this plane.
   Oblique plane
4. Name this plane.
   Midsagittal (median) plane
5. Name this plane.
   Parasagittal plane
6. Name this plane.
   Midsagittal (median) plane

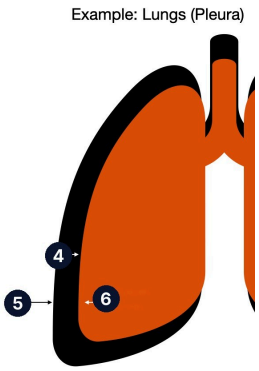

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · BODY REGIONS, PLANES AND CAVITIES · CARD 6 · CAVITIES AND MEMBRANES

ANSWER KEY

Serous membranes

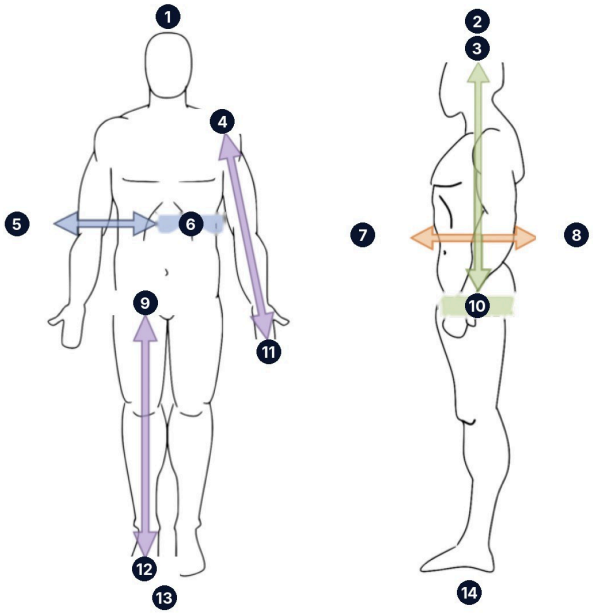

1. Name the outer layer of the serous membrane.
   Parietal layer
2. Name the inner layer, on the organ.
   Visceral layer
3. Name the space between the layers.
   Serous cavity (fluid-filled)
4. Name this space.
   Pleural cavity
5. Name this layer.
   Parietal pleura
6. Name this layer.
   Visceral pleura

Check your answers, then wipe the front clean for the next round.

PRACTICE

Directional terms

1. Name this direction.

2. Name this direction.

3. Name this direction.

4. Name this direction.

5. Name this direction.

6. Name this direction.

7. Name this direction.

8. Name this direction.

9. Name this direction.

10. Name this direction.

11. Name this direction.

12. Name this direction.

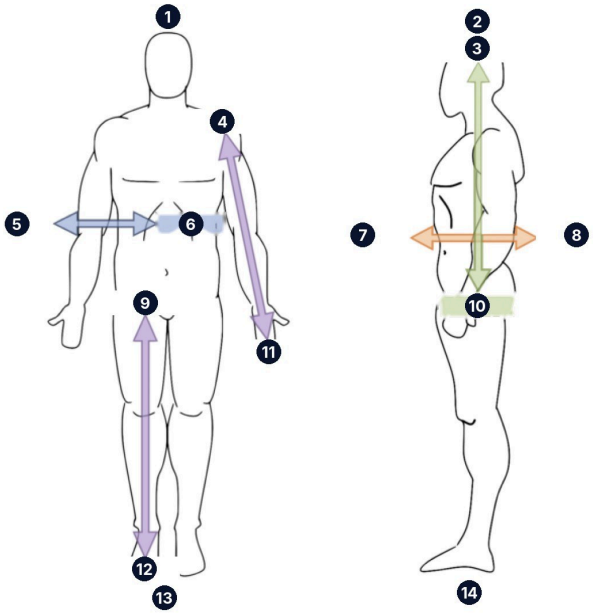

13. Name this direction.

14. Name this direction.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Directional terms

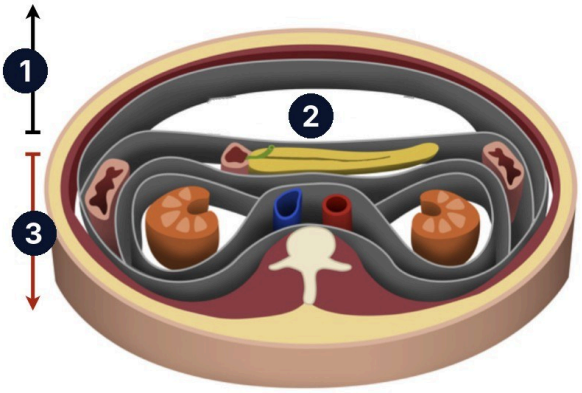

1. Name this direction. **Superior**
2. Name this direction. **Superior**
3. Name this direction. **Cephalic**
4. Name this direction. **Proximal**
5. Name this direction. **Lateral**
6. Name this direction. **Medial**
7. Name this direction. **Anterior (ventral)**
8. Name this direction. **Posterior (dorsal)**
9. Name this direction. **Proximal**
10. Name this direction. **Caudal**
11. Name this direction. **Distal**
12. Name this direction. **Distal**
13. Name this direction. **Inferior**
14. Name this direction. **Inferior**

Check your answers, then wipe the front clean for the next round.

PRACTICE

Peritoneal and retroperitoneal spaces

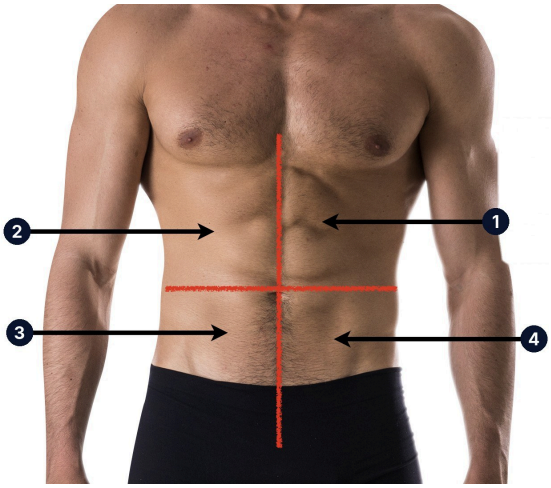

1. Name this space.
2. Name this space.
3. Name this space.

Write each answer on its line with a dry-erase marker, then flip the card to check.

PRACTICE

Abdominal quadrants

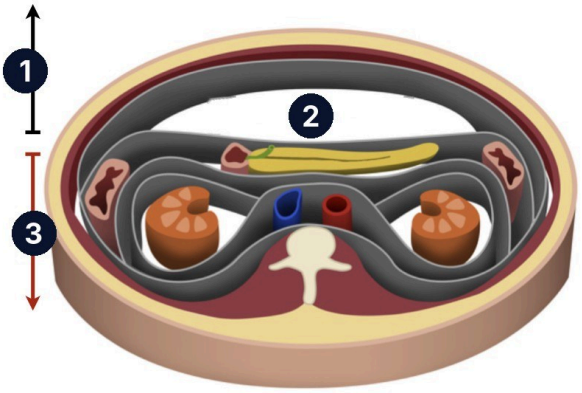

1. Name this quadrant.
2. Name this quadrant.
3. Name this quadrant.
4. Name this quadrant.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Peritoneal and retroperitoneal spaces

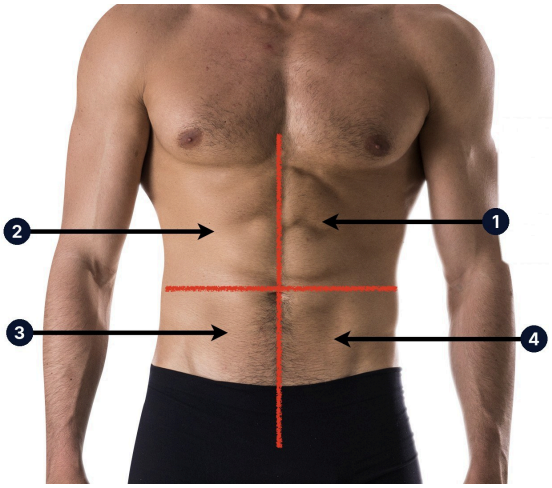

1. Name this space.
   Peritoneal cavity
2. Name this space.
   Peritoneal cavity
3. Name this space.
   Retroperitoneal space

Check your answers, then wipe the front clean for the next round.

ANSWER KEY

Abdominal quadrants

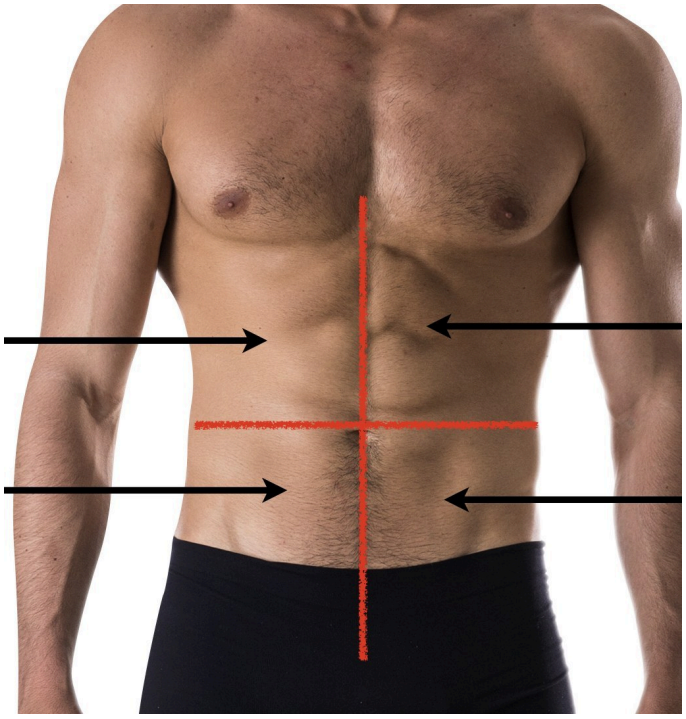

1. Name this quadrant.
   Left upper quadrant
2. Name this quadrant.
   Right upper quadrant
3. Name this quadrant.
   Right lower quadrant
4. Name this quadrant.
   Left lower quadrant

Check your answers, then wipe the front clean for the next round.

PRACTICE

Which quadrant?

1. Which quadrant holds the gallbladder?

2. Which quadrant holds the spleen?

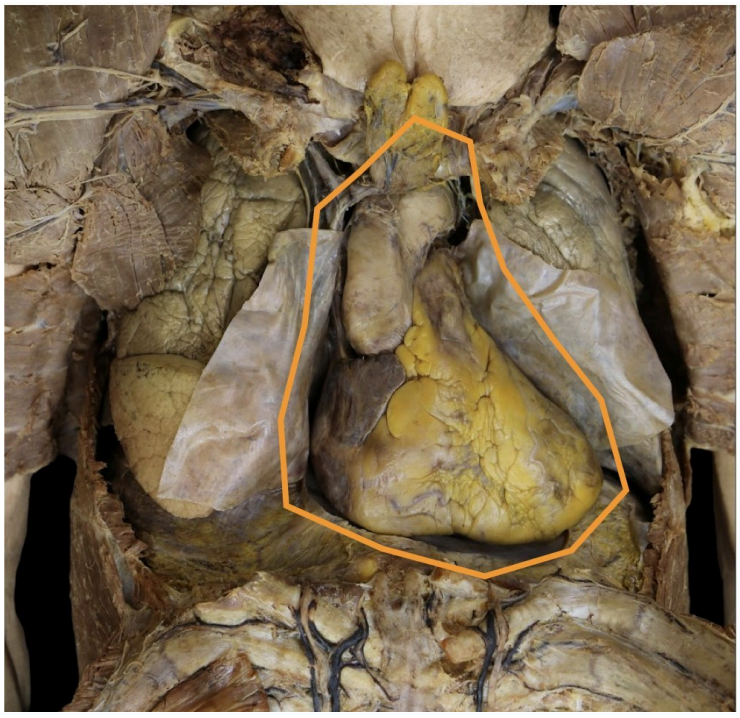

3. Which quadrant holds the appendix?

4. Which quadrant holds the sigmoid colon?

Write each answer on its line with a dry-erase marker, then flip the card to check.

PRACTICE

Mediastinum (outlined in orange)

1. Name the region outlined in orange.

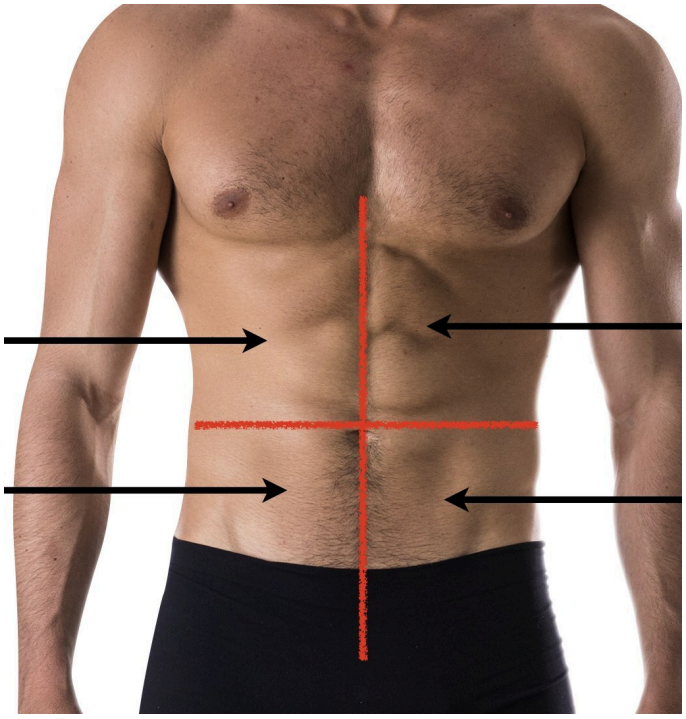

2. What are its borders?

3. What does it contain?

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Which quadrant?

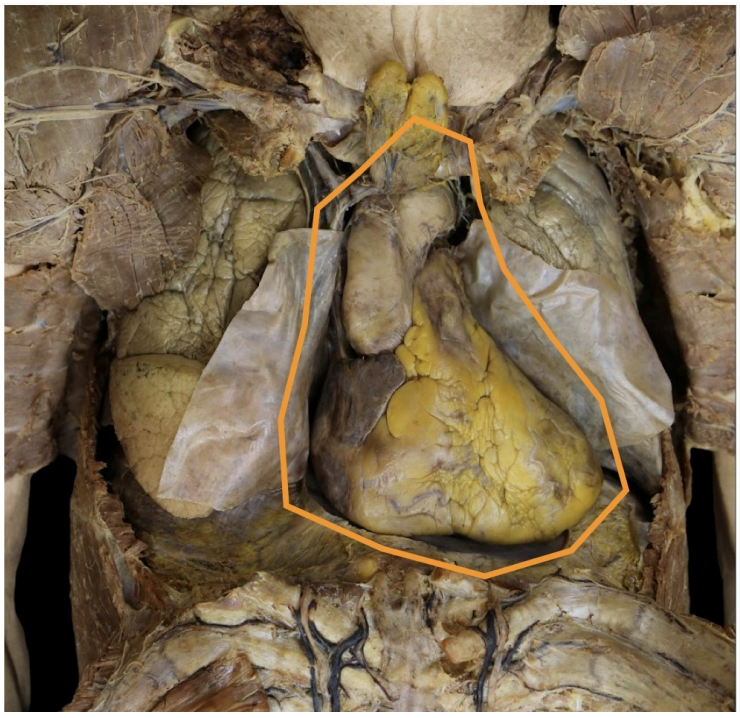

1. Which quadrant holds the gallbladder?
   Right upper quadrant
2. Which quadrant holds the spleen?
   Left upper quadrant
3. Which quadrant holds the appendix?
   Right lower quadrant
4. Which quadrant holds the sigmoid colon?
   Left lower quadrant

Check your answers, then wipe the front clean for the next round.

ANSWER KEY

Mediastinum (outlined in orange)

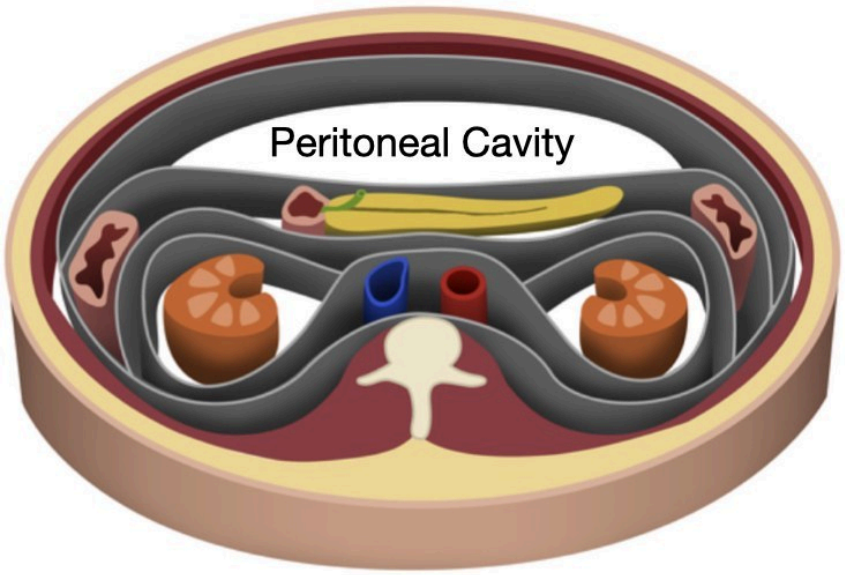

1. Name the region outlined in orange.
   Mediastinum
2. What are its borders?
   Superior: first rib. Inferior: diaphragm. Lateral: right and left lungs. Anterior: sternum. Posterior: vertebrae
3. What does it contain?
   Heart, great vessels, thymus, trachea, esophagus, and nerves (vagus nerve, sympathetic chain)

Check your answers, then wipe the front clean for the next round.

PRACTICE

Body plan: quick check

1. How is a person standing in anatomical position?

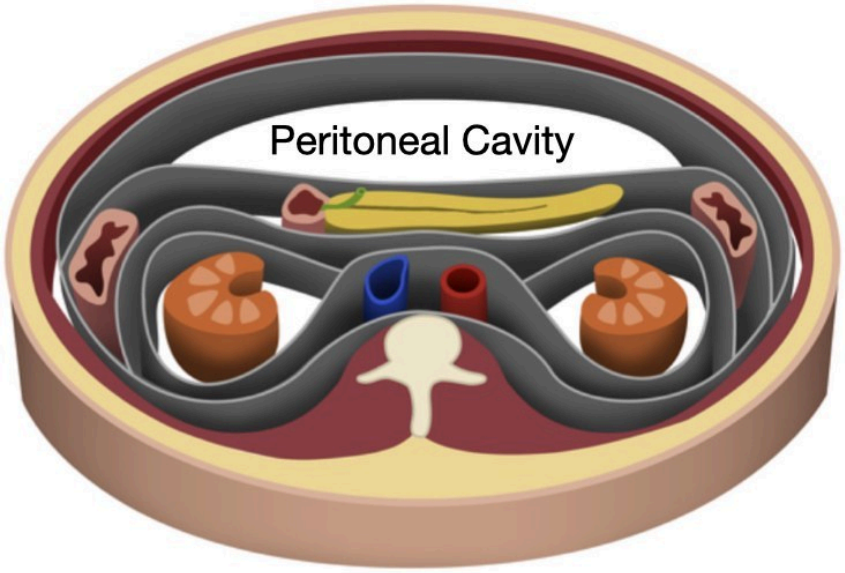

2. Name the retroperitoneal organs (SADPUCKER).

3. Name the three serous membranes and what they cover.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Body plan: quick check

Check your answers, then wipe the front clean for the next round.

1. How is a person standing in anatomical position?

   Standing upright, facing forward, eyes forward, arms at the sides with palms facing forward

2. Name the retroperitoneal organs (SADPUCKER).

   Suprarenal (adrenal) glands, aorta and IVC, duodenum (most), pancreas (most), ureters, colon (ascending and descending), kidneys, esophagus (abdominal part), rectum

3. Name the three serous membranes and what they cover.

   Pericardium (heart), pleura (lungs), peritoneum (abdominal organs)
