Ligaments and menisci of the knee (model)

PRACTICE

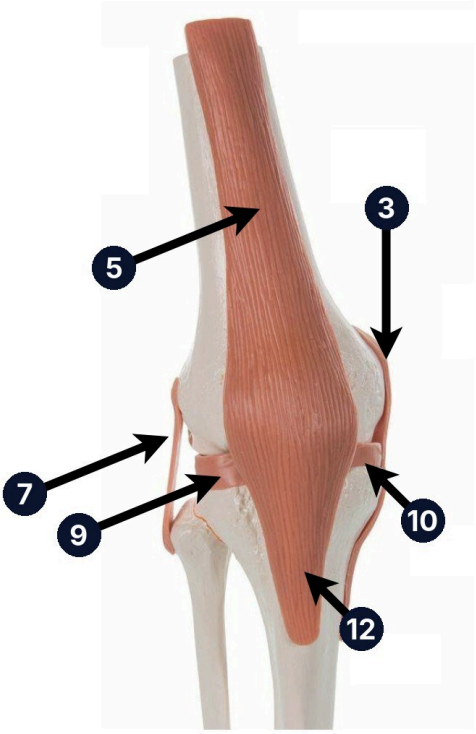

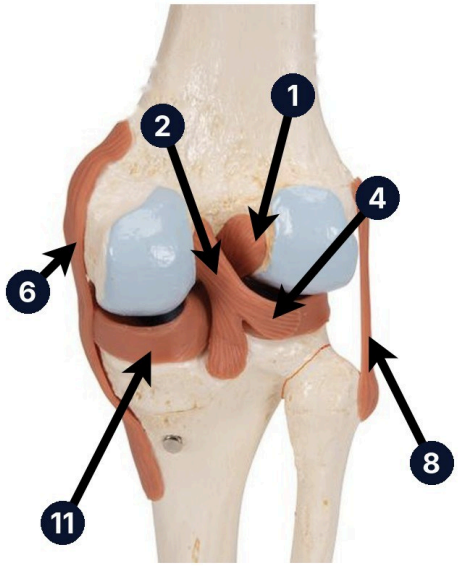

1. Name this structure. _____
2. Name this structure. _____
3. Name this structure. _____
4. Name this structure. _____
5. Name this structure. _____
6. Name this structure. _____
7. Name this structure. _____
8. Name this structure. _____
9. Name this structure. _____
10. Name this structure. _____
11. Name this structure. _____
12. Name this structure. _____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Ligaments and menisci of the knee (model)

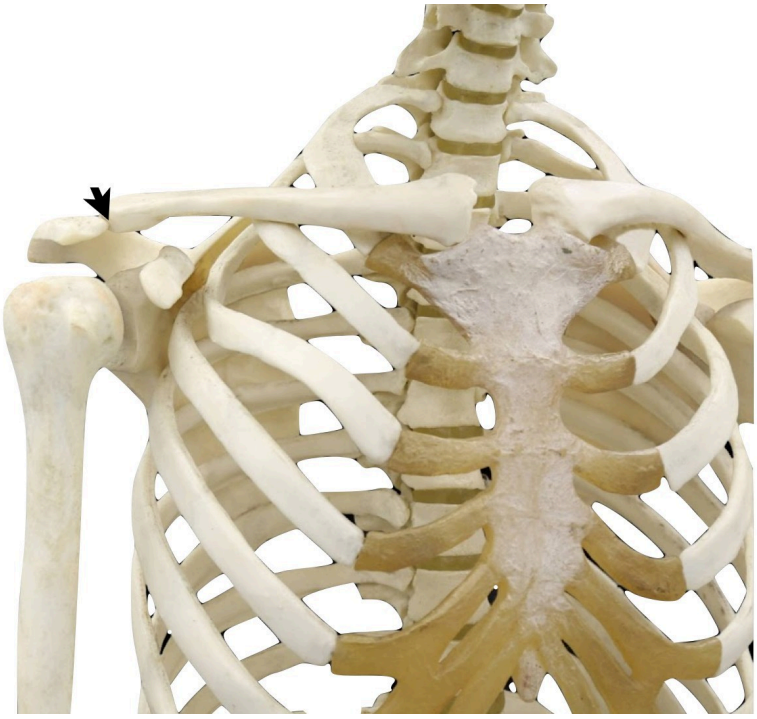

1. Name this structure.
   Anterior cruciate ligament
2. Name this structure.
   Posterior cruciate ligament
3. Name this structure.
   Medial collateral ligament
4. Name this structure.
   Lateral meniscus
5. Name this structure.
   Quadriceps tendon
6. Name this structure.
   Medial collateral ligament
7. Name this structure.
   Lateral collateral ligament
8. Name this structure.
   Lateral collateral ligament
9. Name this structure.
   Lateral meniscus
10. Name this structure.
    Medial meniscus
11. Name this structure.
    Medial meniscus
12. Name this structure.
    Patellar ligament

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 2 · JOINTS OF THE BODY

Joint at the arrow

PRACTICE

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

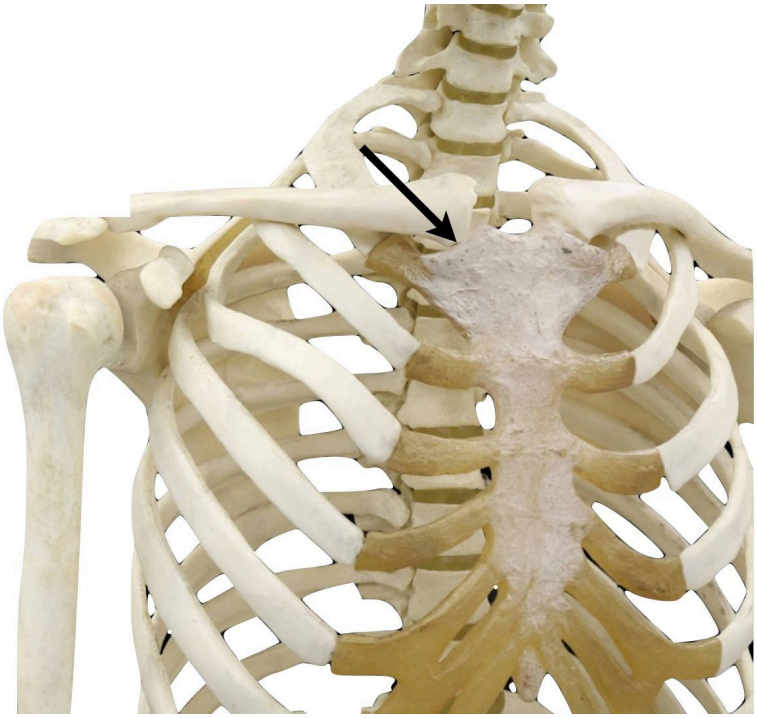

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 3 · JOINTS OF THE BODY

Joint at the arrow

PRACTICE

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

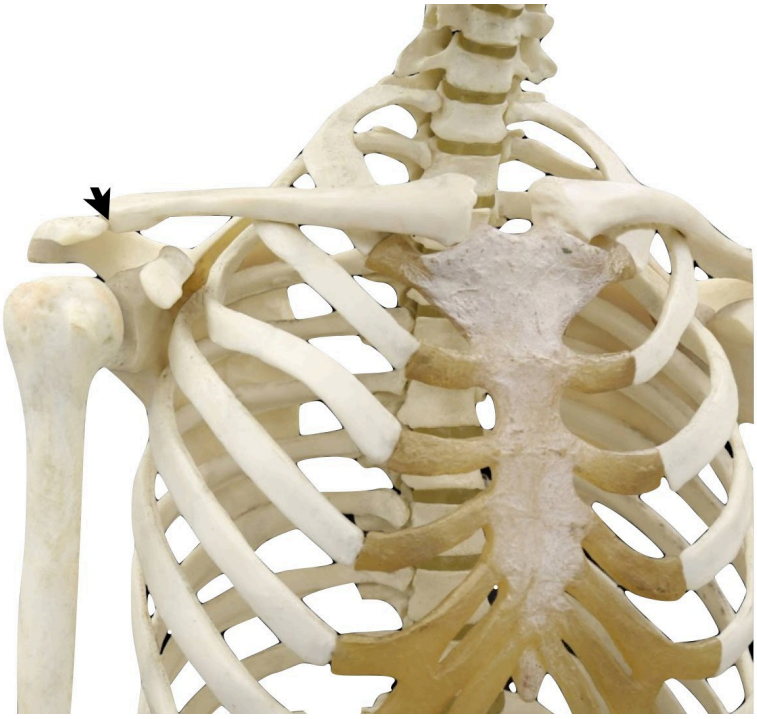

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 2 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

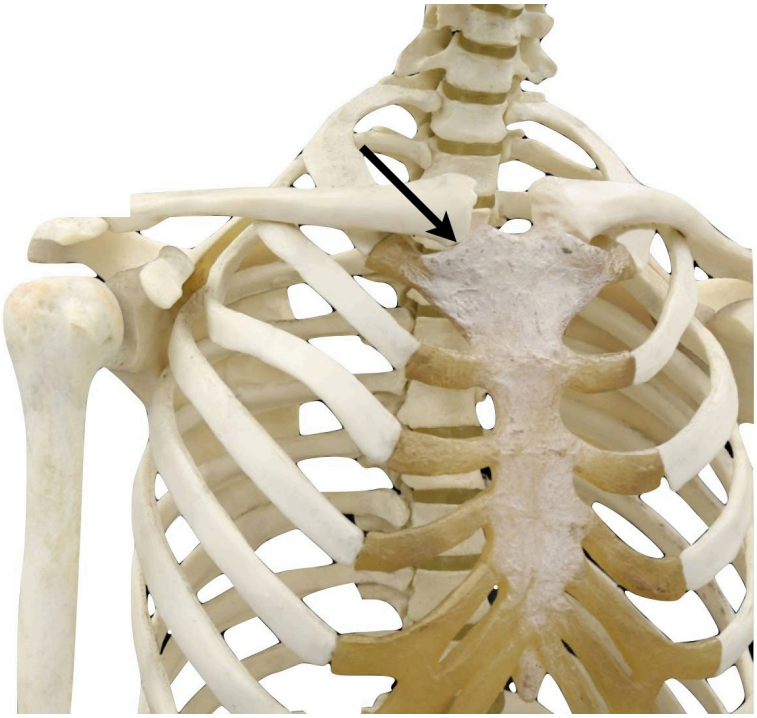

1. Name this joint.
   Acromioclavicular joint
2. Which bones form it?
   Acromion of the scapula and acromial end of the clavicle
3. Structural class, joint type, and how much it moves?
   Synovial, plane joint; diarthrosis
4. What movements happen here?
   Gliding

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 3 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

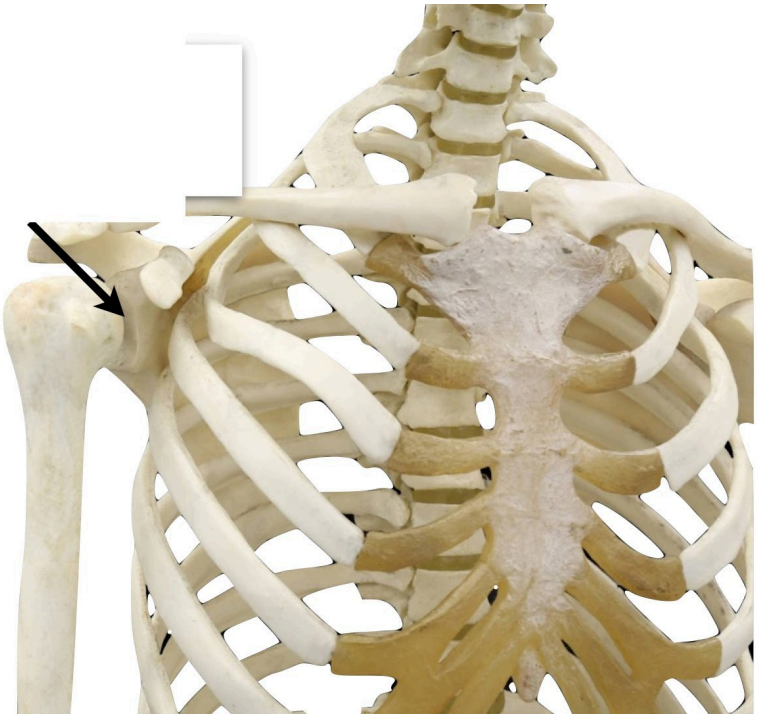

1. Name this joint.
   Sternoclavicular joint
2. Which bones form it?
   Manubrium of the sternum and sternal end of the clavicle
3. Structural class, joint type, and how much it moves?
   Synovial, saddle joint; diarthrosis
4. What movements happen here?
   Elevation, depression, protraction, retraction, circumduction

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 4 · JOINTS OF THE BODY

Joint at the arrow

PRACTICE

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

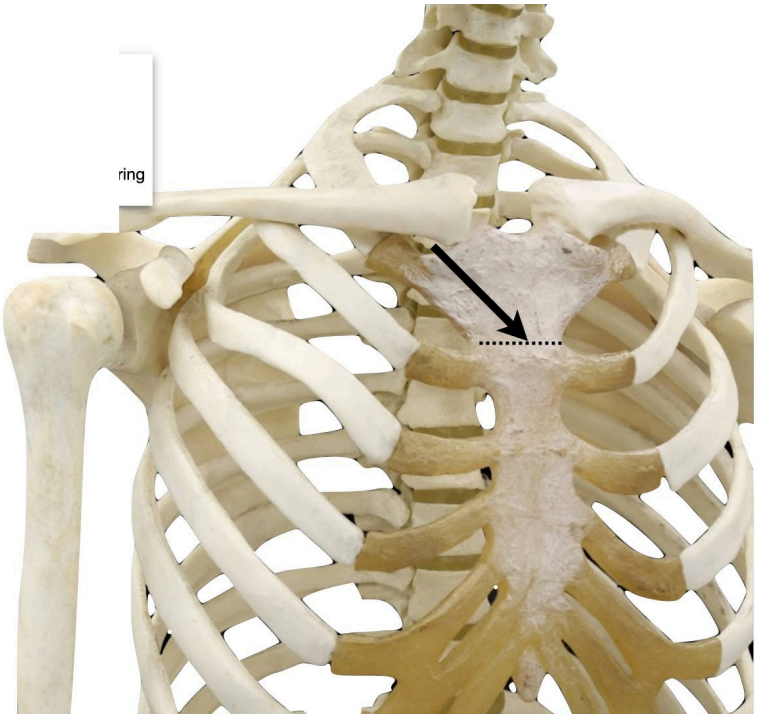

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 5 · JOINTS OF THE BODY

Joint at the arrow

PRACTICE

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

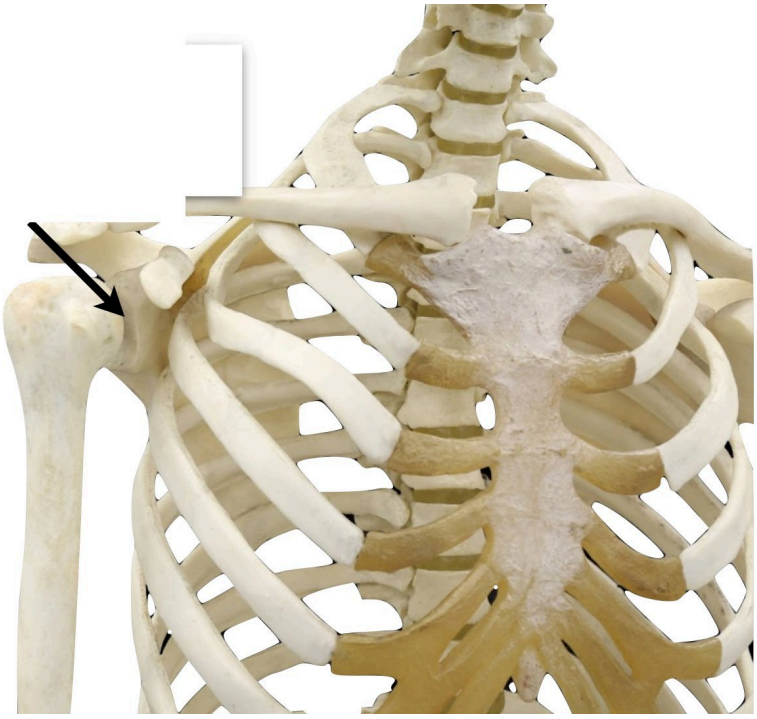

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 4 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

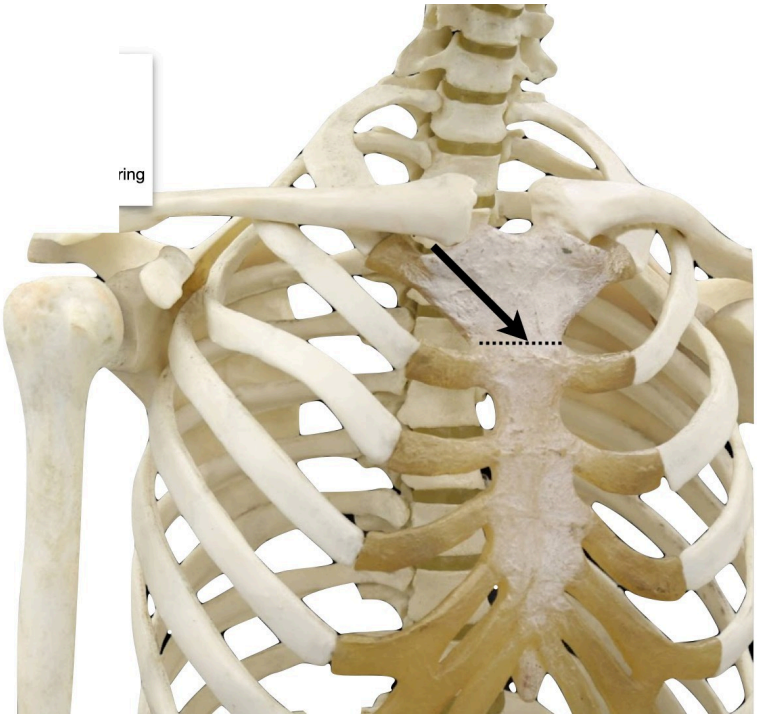

1. Name this joint.
   Glenohumeral joint
2. Which bones form it?
   Glenoid cavity of the scapula and head of the humerus
3. Structural class, joint type, and how much it moves?
   Synovial, ball-and-socket joint; diarthrosis
4. What movements happen here?
   Flexion, extension, abduction, adduction, rotation, circumduction

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 5 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

1. Name this joint.
   Manubriosternal joint
2. Which bones form it?
   Manubrium and body of the sternum
3. Structural class, joint type, and how much it moves?
   Cartilaginous, symphysis; amphiarthrosis
4. What movements happen here?
   Slight movement during breathing

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 6 · JOINTS OF THE BODY

PRACTICE

Joint at the arrow

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

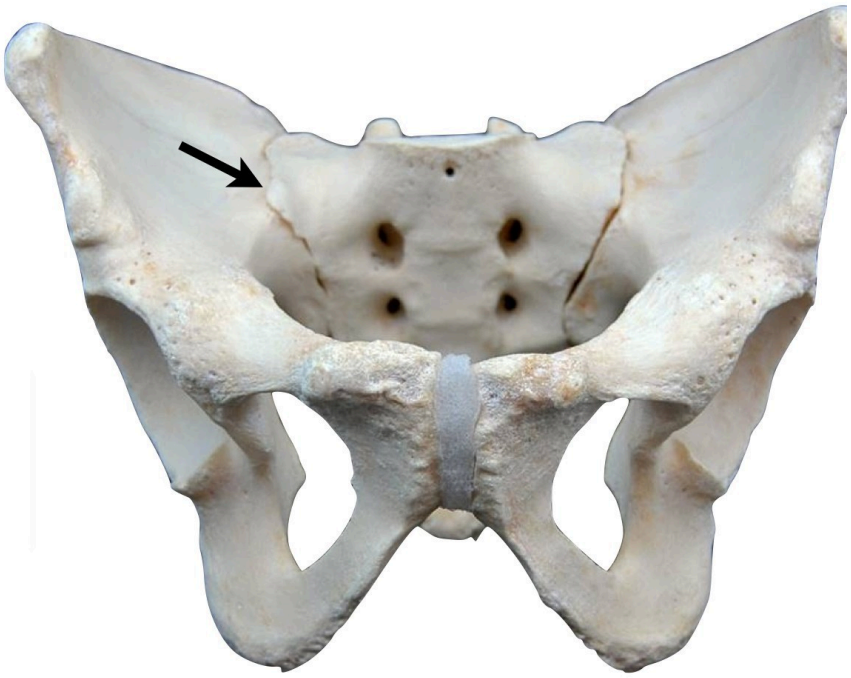

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 7 · JOINTS OF THE BODY

PRACTICE

Joint at the arrow

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 6 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

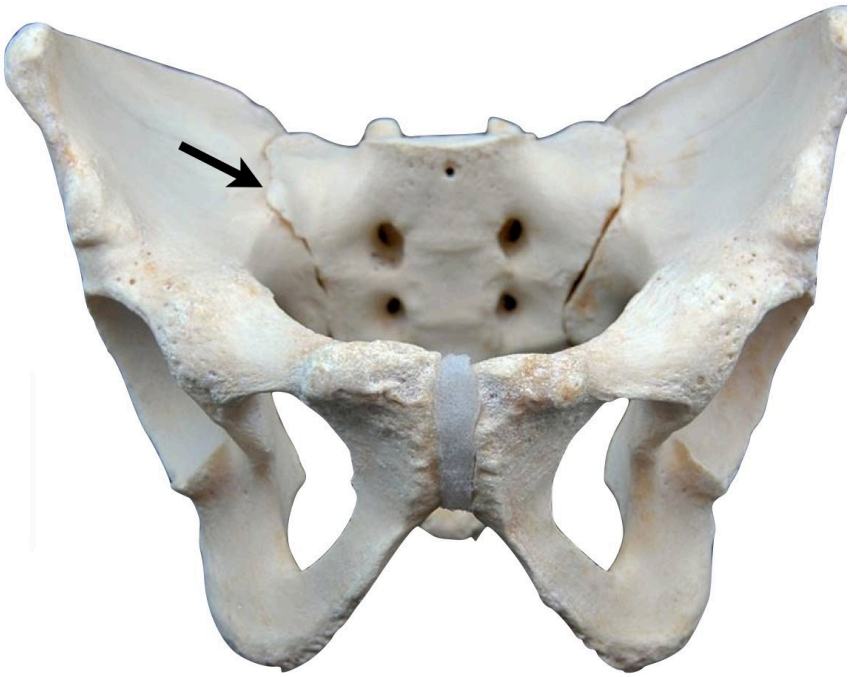

1. Name this joint.
   Temporomandibular joint
2. Which bones form it?
   Mandible (condylar process) and temporal bone
3. Structural class, joint type, and how much it moves?
   Synovial, modified hinge (hinge and plane); diarthrosis
4. What movements happen here?
   Elevation, depression, protraction, retraction, side-to-side (lateral excursion)

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 7 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

1. Name this joint.
   Sacroiliac joint
2. Which bones form it?
   Ilium and sacrum
3. Structural class, joint type, and how much it moves?
   Synovial, plane joint; diarthrosis in youth, amphiarthrosis in adults
4. What movements happen here?
   Gliding, slight movement

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 8 · JOINTS OF THE BODY

Joint at the arrow

PRACTICE

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

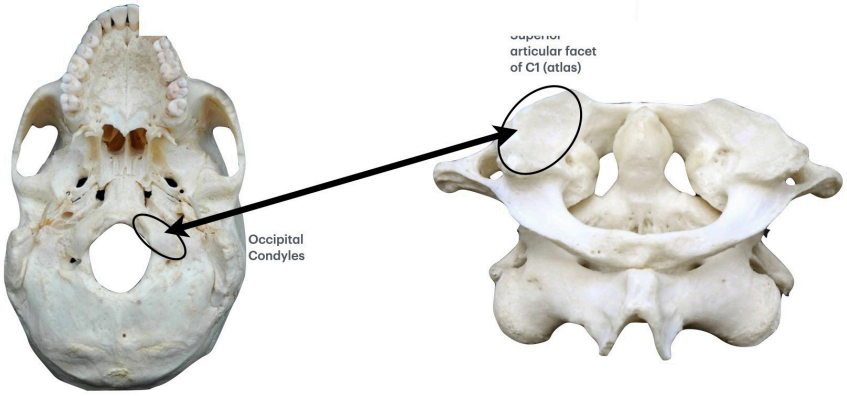

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 9 · JOINTS OF THE BODY

Joint at the arrow

PRACTICE

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 8 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

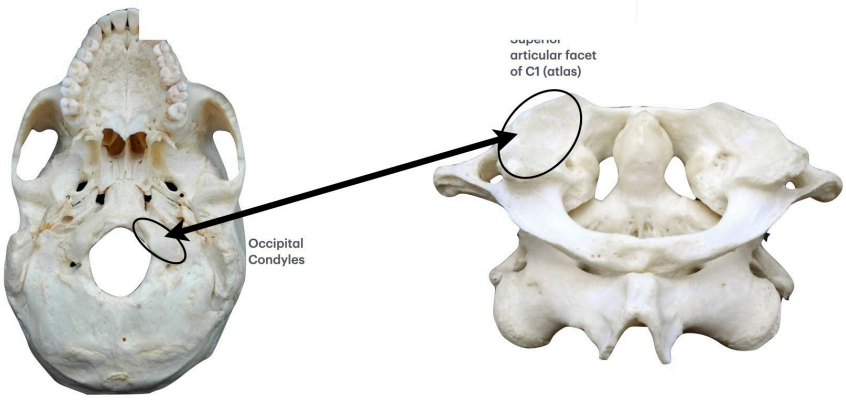

1. Name this joint.
   Pubic symphysis
2. Which bones form it?
   Left and right pubic bones
3. Structural class, joint type, and how much it moves?
   Cartilaginous, symphysis; amphiarthrosis
4. What movements happen here?
   Slight movement (more during childbirth)

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 9 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

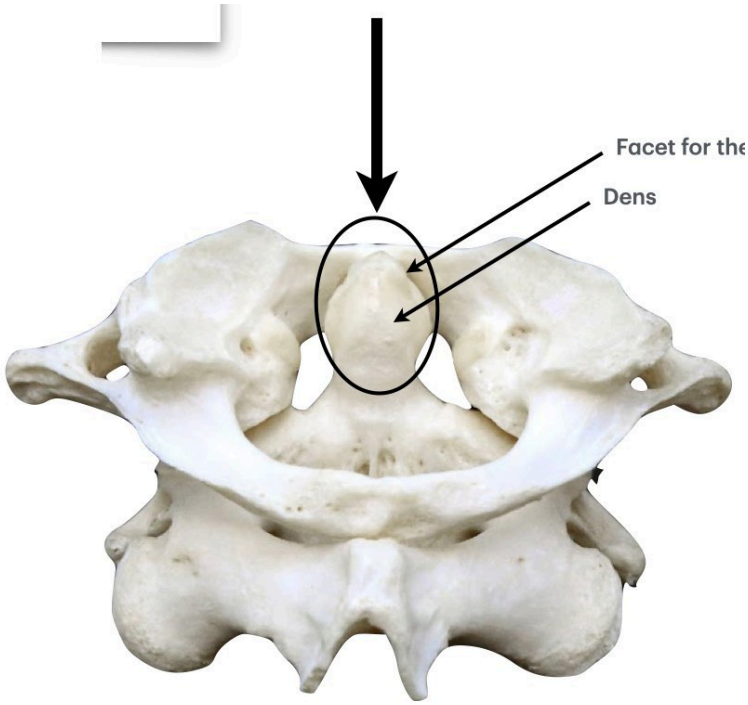

1. Name this joint.
   Atlanto-occipital joint
2. Which bones form it?
   Occipital condyles and the superior articular facets of the atlas (C1)
3. Structural class, joint type, and how much it moves?
   Synovial, condyloid joint; diarthrosis
4. What movements happen here?
   Flexion and extension (nodding "yes"), slight lateral flexion

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 10 · JOINTS OF THE BODY

PRACTICE

Joint at the arrow

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

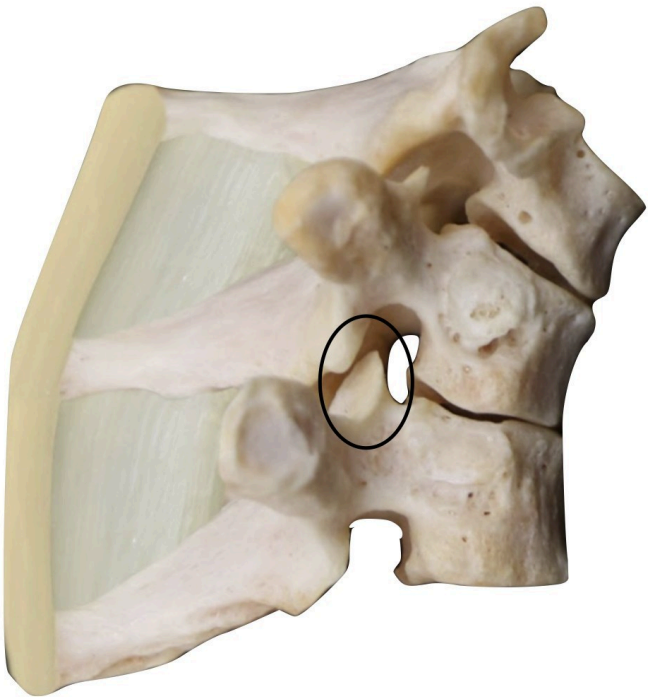

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 11 · JOINTS OF THE BODY

PRACTICE

Joint at the arrow

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

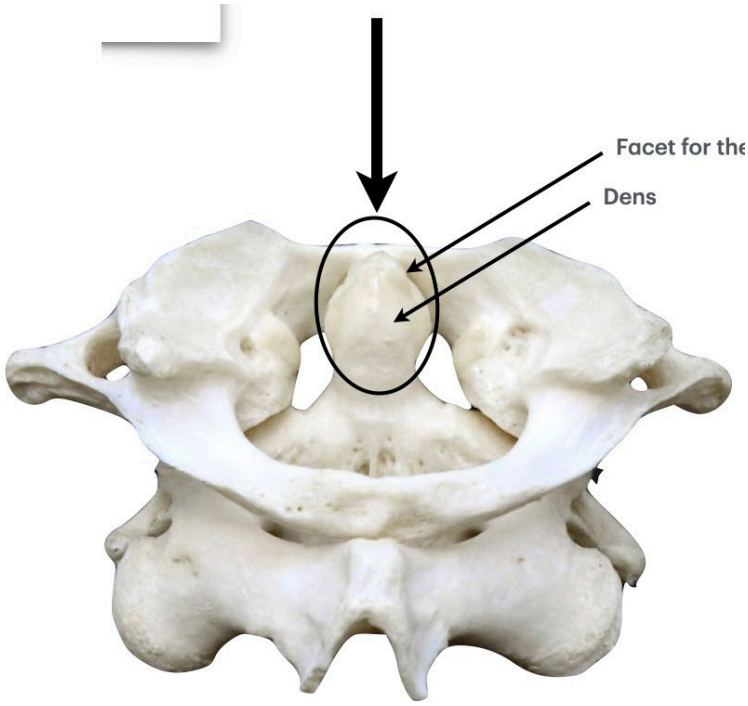

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 10 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

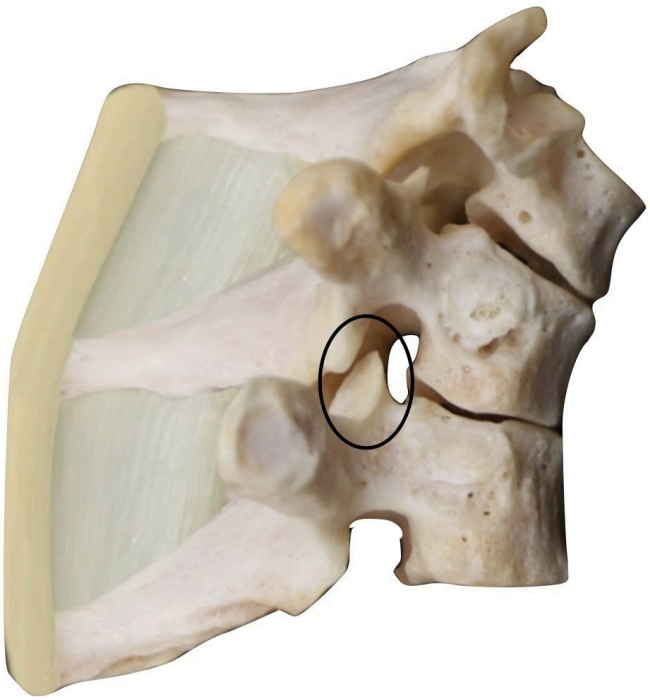

1. Name this joint.
   Atlanto-axial joint
2. Which bones form it?
   Dens of the axis (C2) and the facet for the dens on the atlas (C1)
3. Structural class, joint type, and how much it moves?
   Synovial, pivot joint; diarthrosis
4. What movements happen here?
   Rotation (shaking the head "no")

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 11 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

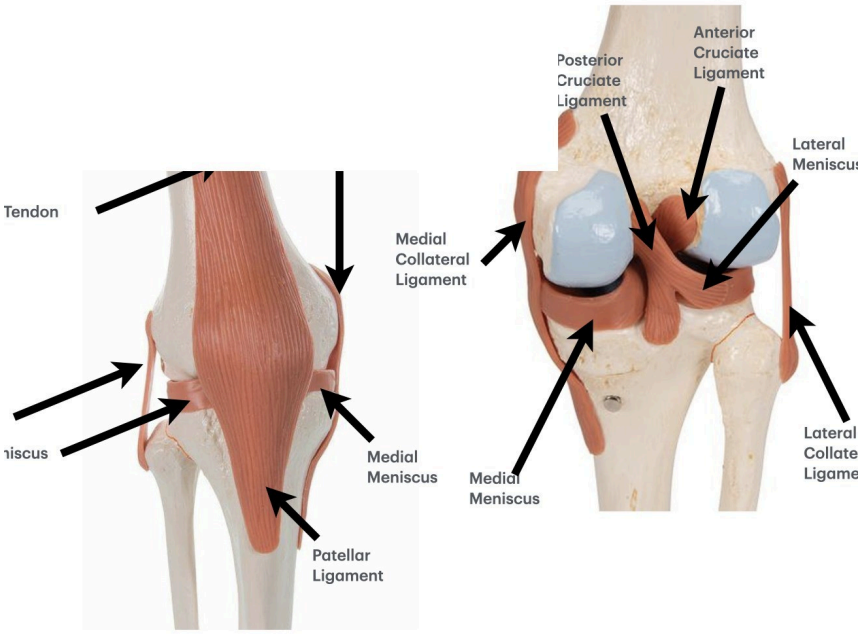

1. Name this joint.
   Zygapophyseal (facet) joint
2. Which bones form it?
   Inferior articular facet of one vertebra and superior articular facet of the vertebra below
3. Structural class, joint type, and how much it moves?
   Synovial, plane joint; diarthrosis
4. What movements happen here?
   Gliding: slight flexion, extension, lateral flexion and rotation

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 12 · JOINTS OF THE BODY

Joint at the arrow

PRACTICE

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

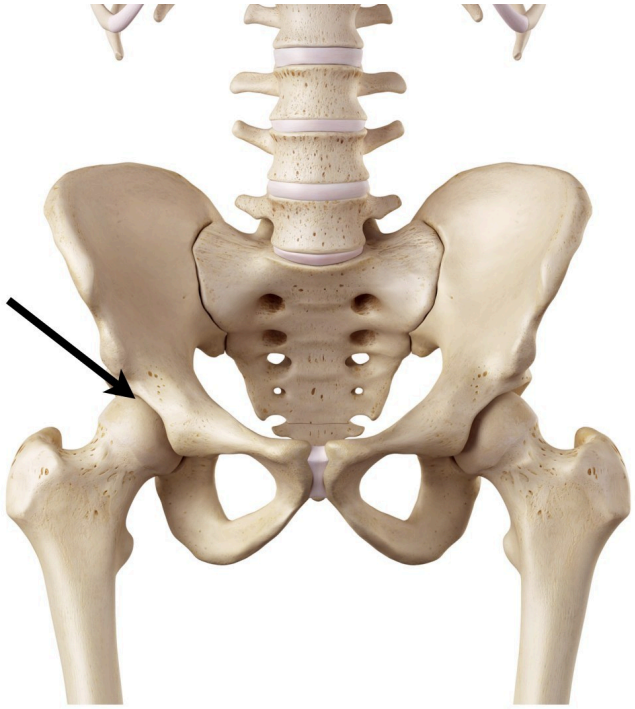

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 13 · JOINTS OF THE BODY

Joint at the arrow

PRACTICE

1. Name this joint.

2. Which bones form it?

3. Structural class, joint type, and how much it moves?

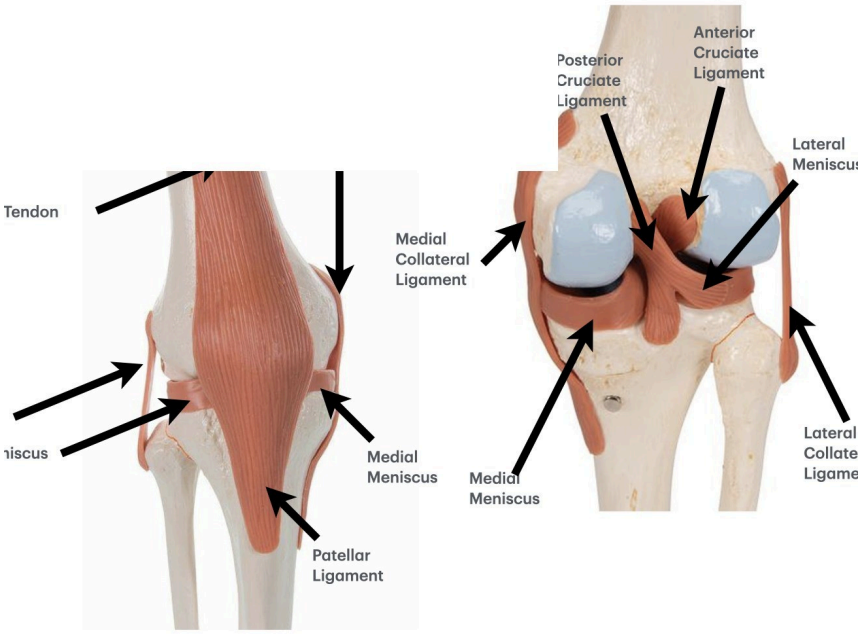

4. What movements happen here?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 12 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

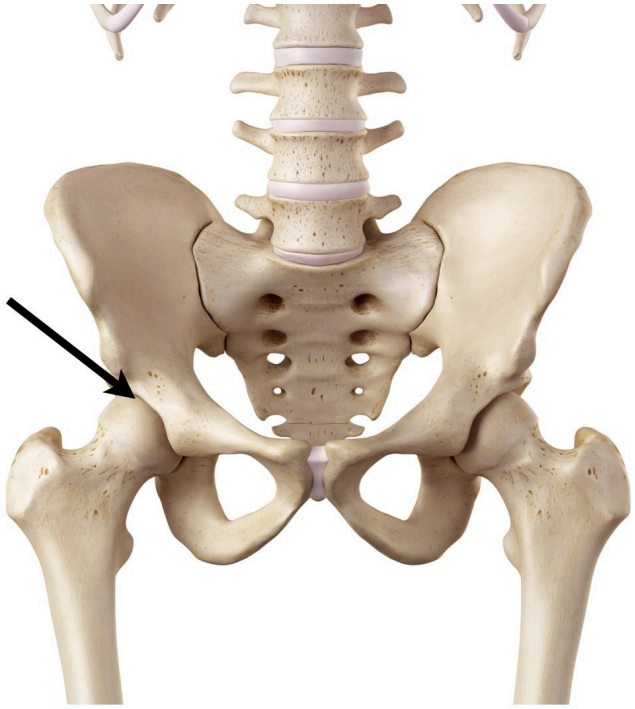

1. Name this joint.
   Knee joint
2. Which bones form it?
   Femur and tibia (with the patella in front)
3. Structural class, joint type, and how much it moves?
   Synovial, hinge joint (modified); diarthrosis
4. What movements happen here?
   Flexion and extension

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · JOINTS · CARD 13 · JOINTS OF THE BODY

Joint at the arrow

ANSWER KEY

1. Name this joint.
   Acetabulofemoral (hip) joint
2. Which bones form it?
   Head of the femur and acetabulum of the hip bone
3. Structural class, joint type, and how much it moves?
   Synovial, ball-and-socket joint; diarthrosis
4. What movements happen here?
   Flexion, extension, abduction, adduction, rotation, circumduction

Check your answers, then wipe the front clean for the next round.
