PRACTICE

Atlas (C1, left) and axis (C2, right), superior view

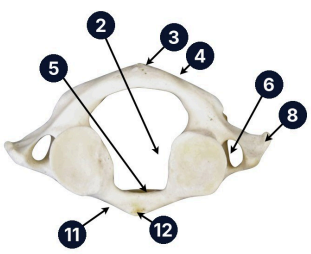

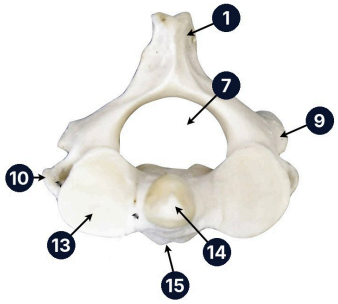

1. Name this bone feature.
2. Name this bone feature.
3. Name this bone feature.
4. Name this bone feature.
5. Name this bone feature.
6. Name this bone feature.
7. Name this bone feature.
8. Name this bone feature.
9. Name this bone feature.
10. Name this bone feature.
11. Name this bone feature.
12. Name this bone feature.
13. Name this bone feature.
14. Name this bone feature.
15. Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Atlas (C1, left) and axis (C2, right), superior view

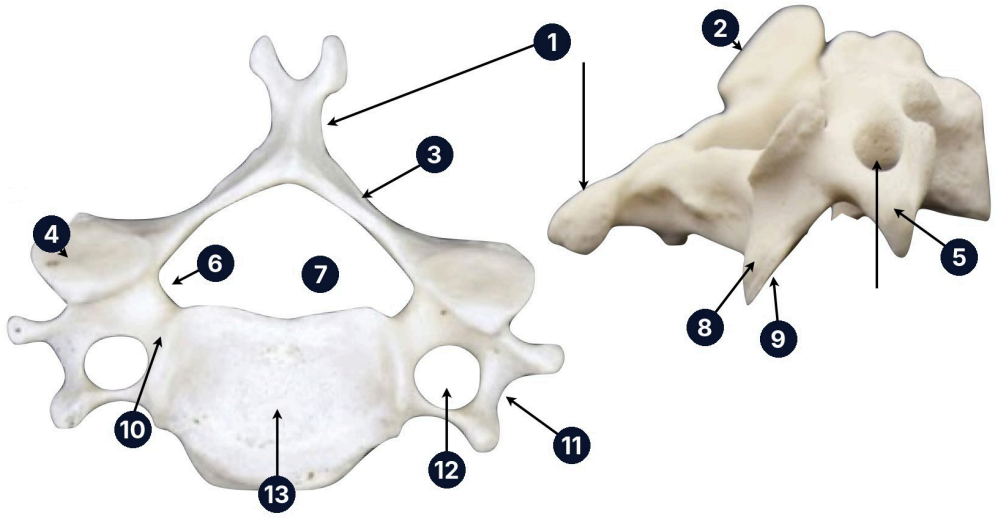

1. Name this bone feature.
   Spinous process
2. Name this bone feature.
   Vertebral foramen
3. Name this bone feature.
   Posterior tubercle
4. Name this bone feature.
   Posterior arch
5. Name this bone feature.
   Facet for the dens
6. Name this bone feature.
   Transverse foramen
7. Name this bone feature.
   Vertebral foramen
8. Name this bone feature.
   Transverse process
9. Name this bone feature.
   Inferior articular process and facet
10. Name this bone feature.
    Transverse process
11. Name this bone feature.
    Anterior arch
12. Name this bone feature.
    Anterior tubercle
13. Name this bone feature.
    Superior articular process and facet
14. Name this bone feature.
    Dens
15. Name this bone feature.
    Body

Check your answers, then wipe the front clean for the next round.

PRACTICE

Typical cervical vertebra: superior and lateral views

1 Name this bone feature.

2 Name this bone feature.

3 Name this bone feature.

4 Name this bone feature.

5 Name this bone feature.

6 Name this bone feature.

7 Name this bone feature.

8 Name this bone feature.

9 Name this bone feature.

10 Name this bone feature.

11 Name this bone feature.

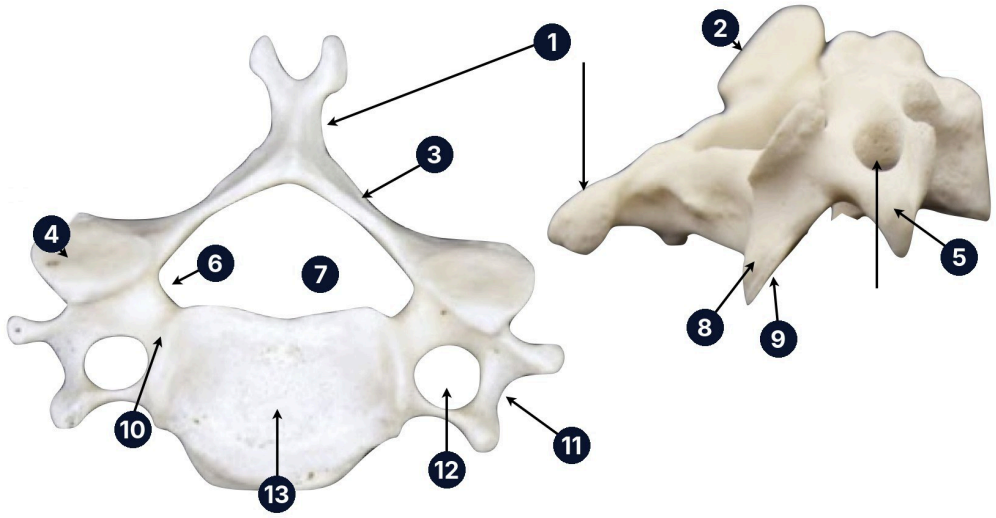

12 Name this bone feature.

13 Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Typical cervical vertebra: superior and lateral views

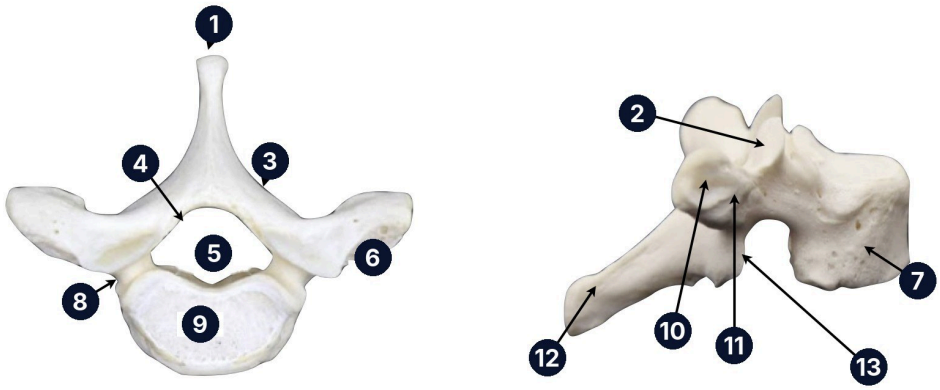

1. Name this bone feature.
   Spinous process
2. Name this bone feature.
   Superior articular process and facet
3. Name this bone feature.
   Lamina
4. Name this bone feature.
   Superior articular process and facet
5. Name this bone feature.
   Transverse process
6. Name this bone feature.
   Vertebral arch
7. Name this bone feature.
   Vertebral foramen
8. Name this bone feature.
   Inferior articular process
9. Name this bone feature.
   Inferior articular facet
10. Name this bone feature.
    Pedicle
11. Name this bone feature.
    Transverse process
12. Name this bone feature.
    Transverse foramen
13. Name this bone feature.
    Body

Check your answers, then wipe the front clean for the next round.

PRACTICE

Typical thoracic vertebra: superior and lateral views

1 Name this bone feature.

2 Name this bone feature.

3 Name this bone feature.

4 Name this bone feature.

5 Name this bone feature.

6 Name this bone feature.

7 Name this bone feature.

8 Name this bone feature.

9 Name this bone feature.

10 Name this bone feature.

11 Name this bone feature.

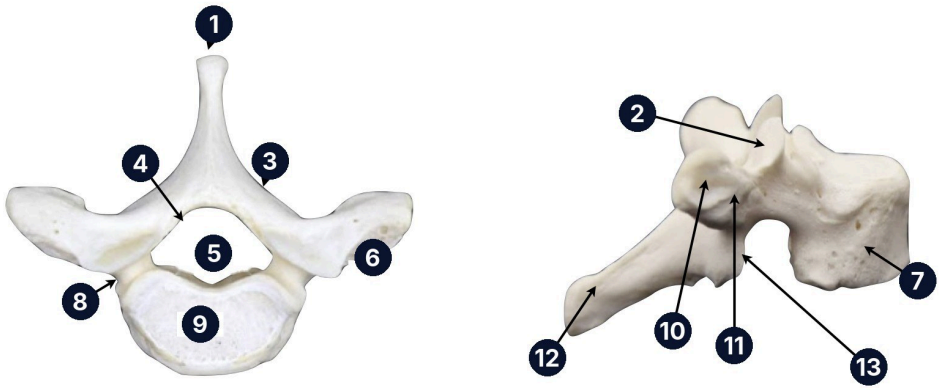

12 Name this bone feature.

13 Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Typical thoracic vertebra: superior and lateral views

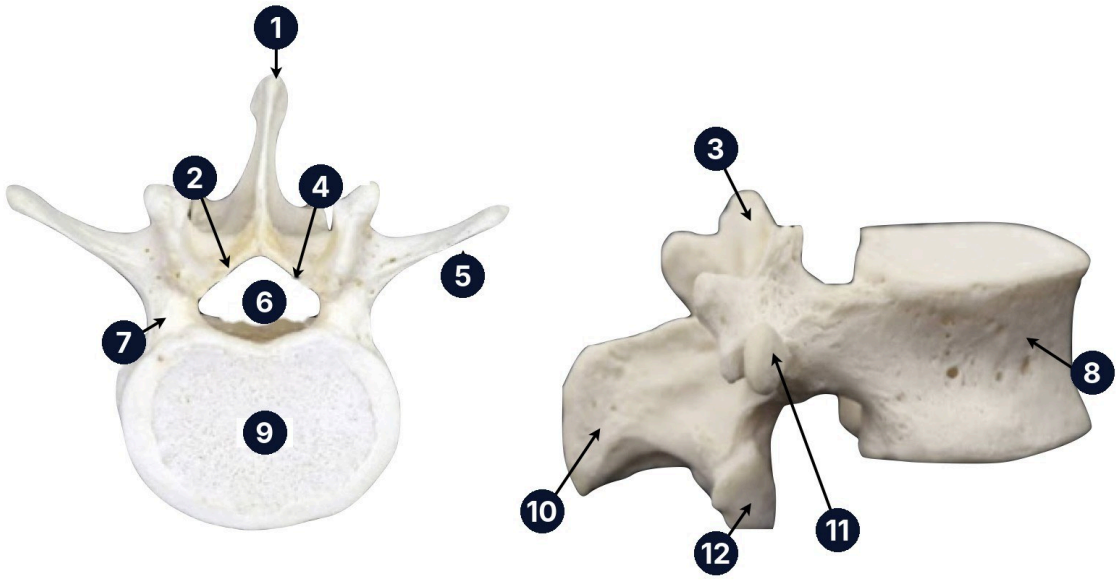

1. Name this bone feature.
   Spinous process
2. Name this bone feature.
   Superior articular facet and process
3. Name this bone feature.
   Lamina
4. Name this bone feature.
   Vertebral arch
5. Name this bone feature.
   Vertebral foramen
6. Name this bone feature.
   Transverse process
7. Name this bone feature.
   Body
8. Name this bone feature.
   Pedicle
9. Name this bone feature.
   Body
10. Name this bone feature.
    Costal facet
11. Name this bone feature.
    Transverse process
12. Name this bone feature.
    Spinous process
13. Name this bone feature.
    Inferior articular facet and process

Check your answers, then wipe the front clean for the next round.

PRACTICE

Typical lumbar vertebra: superior and lateral views

1 Name this bone feature.

2 Name this bone feature.

3 Name this bone feature.

4 Name this bone feature.

5 Name this bone feature.

6 Name this bone feature.

7 Name this bone feature.

8 Name this bone feature.

9 Name this bone feature.

10 Name this bone feature.

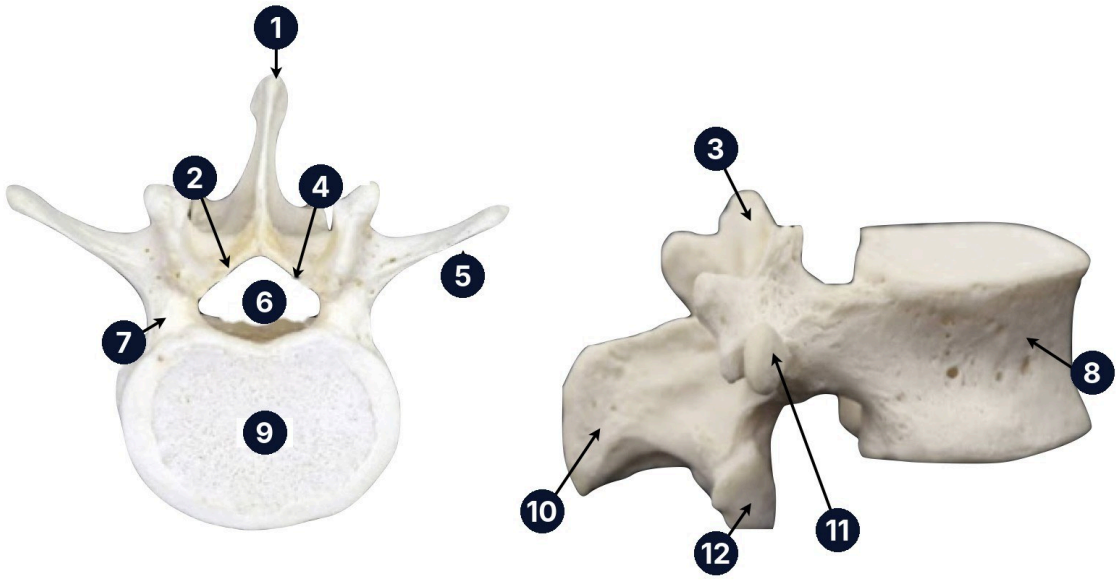

11 Name this bone feature.

12 Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Typical lumbar vertebra: superior and lateral views

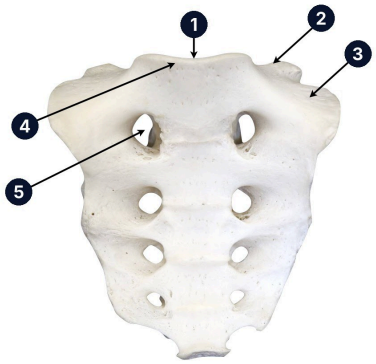

1. Name this bone feature.
   Spinous process
2. Name this bone feature.
   Vertebral arch
3. Name this bone feature.
   Superior articular facet and process
4. Name this bone feature.
   Lamina
5. Name this bone feature.
   Transverse process
6. Name this bone feature.
   Vertebral foramen
7. Name this bone feature.
   Pedicle
8. Name this bone feature.
   Body
9. Name this bone feature.
   Body
10. Name this bone feature.
    Spinous process
11. Name this bone feature.
    Transverse process
12. Name this bone feature.
    Inferior articular facet and process

Check your answers, then wipe the front clean for the next round.

PRACTICE

Sacrum, anterior view

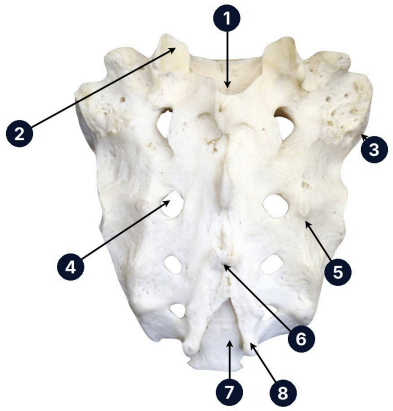

1. Name this bone feature.
2. Name this bone feature.
3. Name this bone feature.
4. Name this bone feature.
5. Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

PRACTICE

Sacrum, posterior view

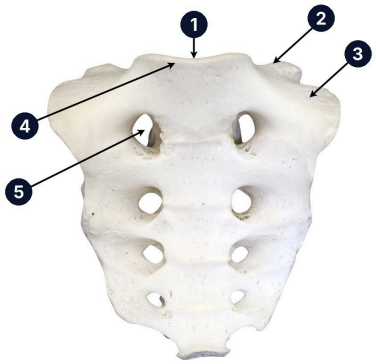

1. Name this bone feature.
2. Name this bone feature.
3. Name this bone feature.
4. Name this bone feature.
5. Name this bone feature.
6. Name this bone feature.
7. Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Sacrum, anterior view

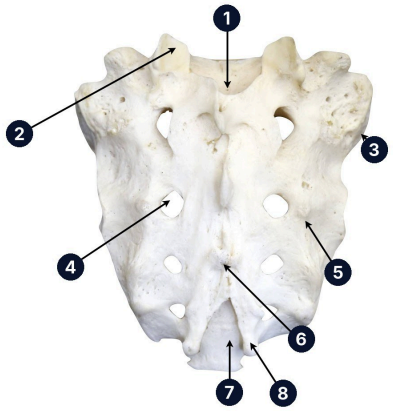

1. Name this bone feature.
   Base of sacrum
2. Name this bone feature.
   Superior articular process
3. Name this bone feature.
   Sacral ala
4. Name this bone feature.
   Sacral promontory
5. Name this bone feature.
   Anterior sacral foramen

Check your answers, then wipe the front clean for the next round.

ANSWER KEY

Sacrum, posterior view

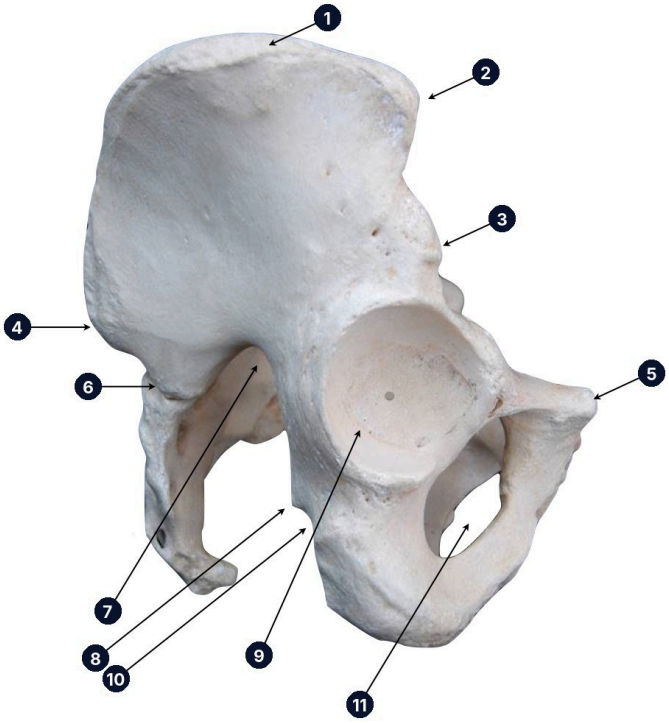

1. Name this bone feature.
   Sacral canal
2. Name this bone feature.
   Superior articular facet
3. Name this bone feature.
   Auricular surface
4. Name this bone feature.
   Posterior sacral foramen
5. Name this bone feature.
   Lateral sacral crest
6. Name this bone feature.
   Median sacral crest
7. Name this bone feature.
   Sacral hiatus
8. Name this bone feature.
   Sacral cornu

Check your answers, then wipe the front clean for the next round.

PRACTICE

Coxal bone (os coxae), lateral view

1. Name this bone feature.

2. Name this bone feature.

3. Name this bone feature.

4. Name this bone feature.

5. Name this bone feature.

6. Name this bone feature.

7. Name this bone feature.

8. Name this bone feature.

9. Name this bone feature.

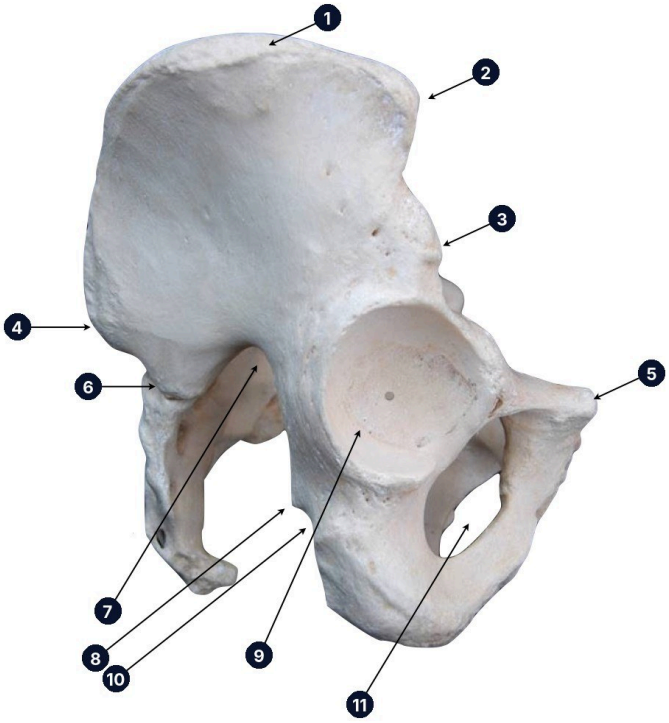

10. Name this bone feature.

11. Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Coxal bone (os coxae), lateral view

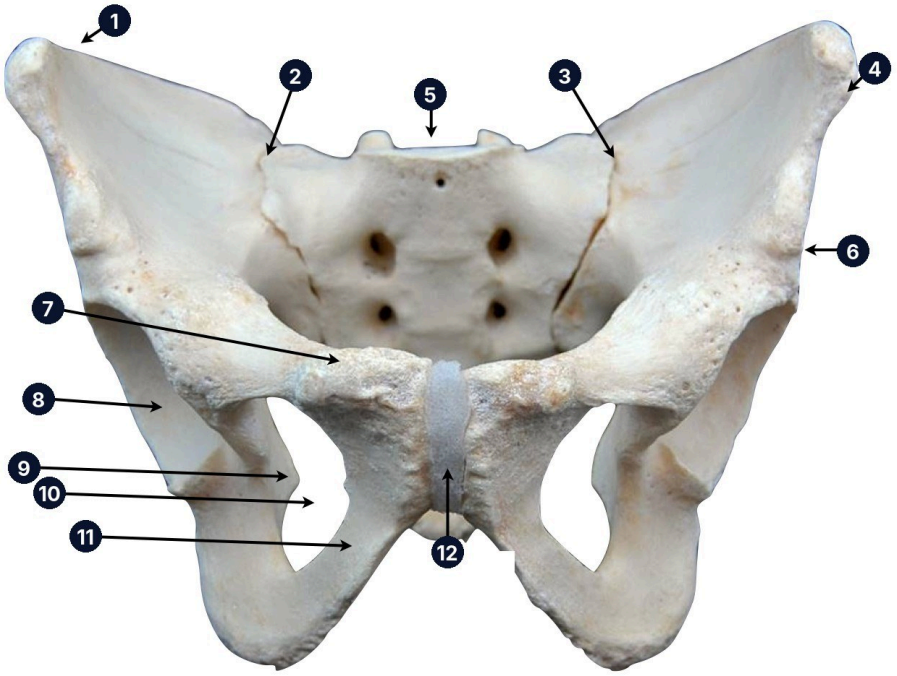

1. Name this bone feature.
   Iliac crest
2. Name this bone feature.
   Anterior superior iliac spine
3. Name this bone feature.
   Anterior inferior iliac spine
4. Name this bone feature.
   Posterior superior iliac spine
5. Name this bone feature.
   Pubic tubercle
6. Name this bone feature.
   Posterior inferior iliac spine
7. Name this bone feature.
   Greater sciatic notch
8. Name this bone feature.
   Ischial spine
9. Name this bone feature.
   Acetabulum
10. Name this bone feature.
    Lesser sciatic notch
11. Name this bone feature.
    Obturator foramen

Check your answers, then wipe the front clean for the next round.

PRACTICE

Complete pelvis, anterior view

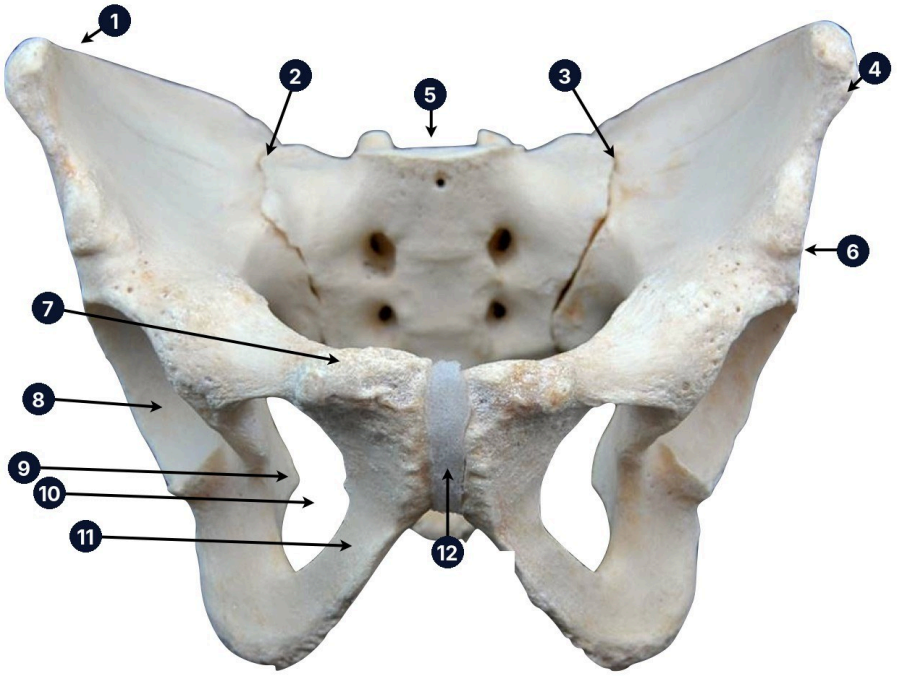

1. Name this bone feature.
2. Name this bone feature.
3. Name this bone feature.
4. Name this bone feature.
5. Name this bone feature.
6. Name this bone feature.
7. Name this bone feature.
8. Name this bone feature.
9. Name this bone feature.
10. Name this bone feature.
11. Name this bone feature.
12. Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Complete pelvis, anterior view

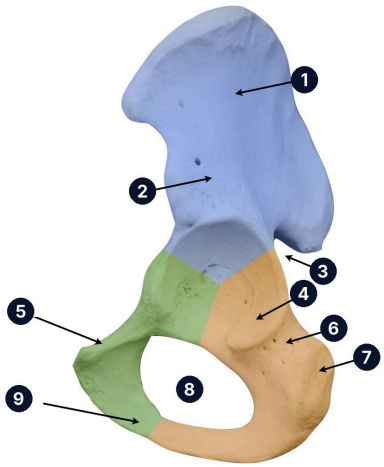

1. Name this bone feature.
   Iliac crest
2. Name this bone feature.
   Sacroiliac joint
3. Name this bone feature.
   Sacroiliac joint
4. Name this bone feature.
   Anterior superior iliac spine
5. Name this bone feature.
   Sacrum
6. Name this bone feature.
   Anterior inferior iliac spine
7. Name this bone feature.
   Superior pubic ramus
8. Name this bone feature.
   Acetabulum
9. Name this bone feature.
   Ischial spine
10. Name this bone feature.
    Obturator foramen
11. Name this bone feature.
    Inferior pubic ramus
12. Name this bone feature.
    Pubic symphysis

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · VERTEBRAE, PELVIS AND LOWER LIMB BONES · CARD 9 · PELVIS

PRACTICE

Bones of the coxal bone

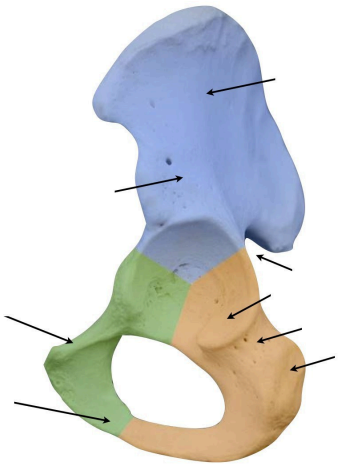

1. Name this bone feature.
2. Name this bone feature.
3. Name this bone feature.
4. Name this bone feature.
5. Name this bone feature.
6. Name this bone feature.
7. Name this bone feature.
8. Name this bone feature.
9. Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · VERTEBRAE, PELVIS AND LOWER LIMB BONES · CARD 10 · PELVIS

PRACTICE

Which bone is which color?

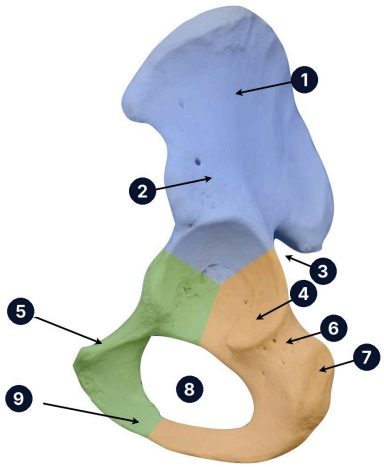

1. Which bone is shaded blue?
2. Which bone is shaded orange?
3. Which bone is shaded green?

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Bones of the coxal bone

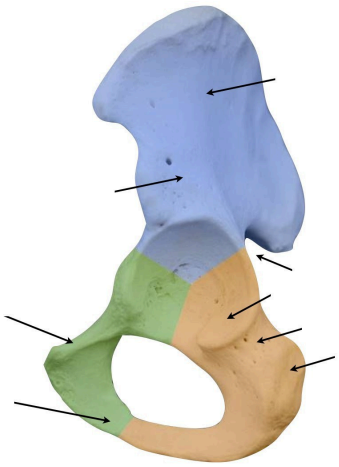

1. Name this bone feature.
   Wing of ilium
2. Name this bone feature.
   Body of ilium
3. Name this bone feature.
   Greater sciatic notch
4. Name this bone feature.
   Acetabulum
5. Name this bone feature.
   Superior pubic ramus
6. Name this bone feature.
   Body of ischium
7. Name this bone feature.
   Ischial ramus
8. Name this bone feature.
   Obturator foramen
9. Name this bone feature.
   Inferior pubic ramus

Check your answers, then wipe the front clean for the next round.

ANSWER KEY

Which bone is which color?

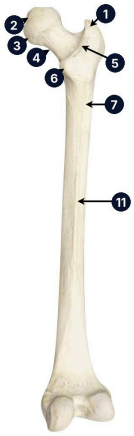

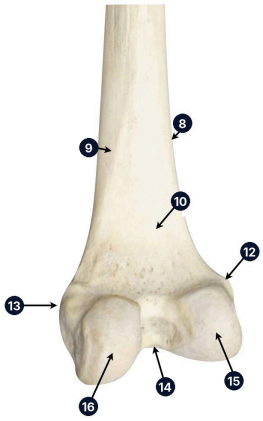

1. Which bone is shaded blue?
   Ilium
2. Which bone is shaded orange?
   Ischium
3. Which bone is shaded green?
   Pubis

Check your answers, then wipe the front clean for the next round.

PRACTICE

Femur, posterior view

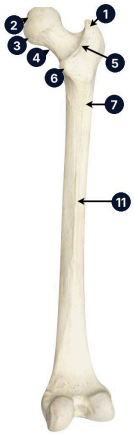

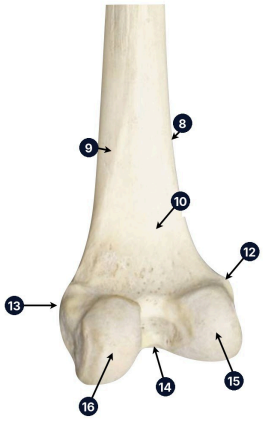

1. Name this bone feature.
2. Name this bone feature.
3. Name this bone feature.
4. Name this bone feature.
5. Name this bone feature.
6. Name this bone feature.
7. Name this bone feature.
8. Name this bone feature.
9. Name this bone feature.
10. Name this bone feature.
11. Name this bone feature.
12. Name this bone feature.
13. Name this bone feature.
14. Name this bone feature.
15. Name this bone feature.
16. Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Femur, posterior view

1. Name this bone feature.
   Greater trochanter
2. Name this bone feature.
   Fovea capitis
3. Name this bone feature.
   Head of femur
4. Name this bone feature.
   Neck of femur
5. Name this bone feature.
   Intertrochanteric crest
6. Name this bone feature.
   Lesser trochanter
7. Name this bone feature.
   Gluteal tuberosity
8. Name this bone feature.
   Lateral supracondylar line
9. Name this bone feature.
   Medial supracondylar line
10. Name this bone feature.
    Popliteal surface
11. Name this bone feature.
    Linea aspera
12. Name this bone feature.
    Lateral epicondyle
13. Name this bone feature.
    Medial epicondyle
14. Name this bone feature.
    Intercondylar fossa
15. Name this bone feature.
    Lateral condyle
16. Name this bone feature.
    Medial condyle

Check your answers, then wipe the front clean for the next round.

PRACTICE

Patella and femur, anterior view

1. Name this bone feature.
2. Name this bone feature.
3. Name this bone feature.
4. Name this bone feature.
5. Name this bone feature.
6. Name this bone feature.
7. Name this bone feature.
8. Name this bone feature.
9. Name this bone feature.
10. Name this bone feature.
11. Name this bone feature.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Patella and femur, anterior view

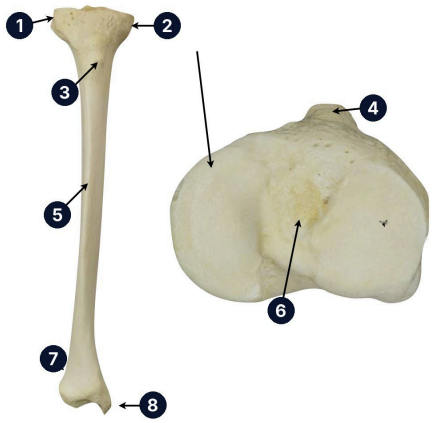

1. Name this bone feature.
   Greater trochanter
2. Name this bone feature.
   Head of femur
3. Name this bone feature.
   Intertrochanteric crest
4. Name this bone feature.
   Neck of femur
5. Name this bone feature.
   Lesser trochanter
6. Name this bone feature.
   Patella
7. Name this bone feature.
   Patella
8. Name this bone feature.
   Lateral epicondyle
9. Name this bone feature.
   Medial epicondyle
10. Name this bone feature.
    Lateral condyle
11. Name this bone feature.
    Medial condyle

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · VERTEBRAE, PELVIS AND LOWER LIMB BONES · CARD 13 · LOWER LIMB BONES

PRACTICE

Right tibia, anterior and superior views

1. Name this bone feature. _____
2. Name this bone feature. _____
3. Name this bone feature. _____
4. Name this bone feature. _____
5. Name this bone feature. _____
6. Name this bone feature. _____
7. Name this bone feature. _____
8. Name this bone feature. _____

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · VERTEBRAE, PELVIS AND LOWER LIMB BONES · CARD 14 · LOWER LIMB BONES

PRACTICE

Fibula

ID the bone details

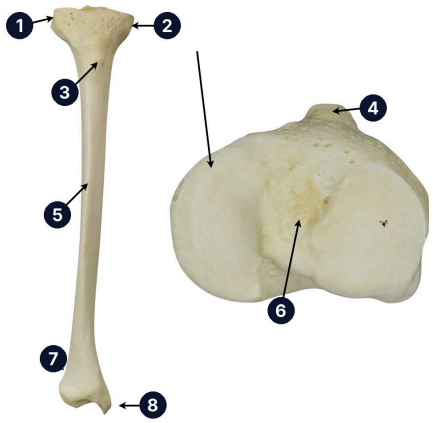

1. Name this bone feature. _____
2. Name this bone feature. _____

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · VERTEBRAE, PELVIS AND LOWER LIMB BONES · CARD 13 · LOWER LIMB BONES

ANSWER KEY

Right tibia, anterior and superior views

1. Name this bone feature.
   Lateral condyle
2. Name this bone feature.
   Medial condyle
3. Name this bone feature.
   Tibial tuberosity
4. Name this bone feature.
   Tibial tuberosity
5. Name this bone feature.
   Anterior crest
6. Name this bone feature.
   Intercondylar eminence
7. Name this bone feature.
   Fibular notch
8. Name this bone feature.
   Medial malleolus

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · VERTEBRAE, PELVIS AND LOWER LIMB BONES · CARD 14 · LOWER LIMB BONES

ANSWER KEY

Fibula

ID the bone details

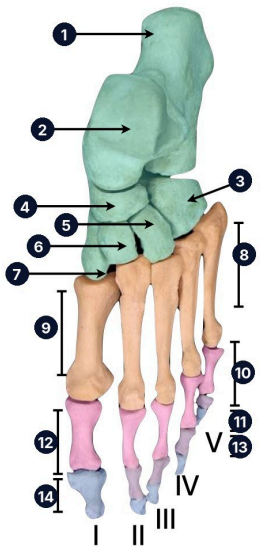

1. Name this bone feature.
   Head of fibula
2. Name this bone feature.
   Lateral malleolus

Check your answers, then wipe the front clean for the next round.

PRACTICE

Bones of the foot, superior view

1. Name this bone (or group of bones).

2. Name this bone (or group of bones).

3. Name this bone (or group of bones).

4. Name this bone (or group of bones).

5. Name this bone (or group of bones).

6. Name this bone (or group of bones).

7. Name this bone (or group of bones).

8. Name this bone (or group of bones).

9. Name this bone (or group of bones).

10. Name this bone (or group of bones).

11. Name this bone (or group of bones).

12. Name this bone (or group of bones).

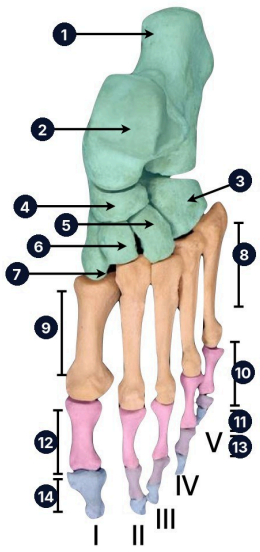

13. Name this bone (or group of bones).

14. Name this bone (or group of bones).

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Bones of the foot, superior view

1. Name this bone (or group of bones).
   Calcaneus
2. Name this bone (or group of bones).
   Talus
3. Name this bone (or group of bones).
   Cuboid
4. Name this bone (or group of bones).
   Navicular
5. Name this bone (or group of bones).
   Lateral cuneiform
6. Name this bone (or group of bones).
   Middle cuneiform
7. Name this bone (or group of bones).
   Medial cuneiform
8. Name this bone (or group of bones).
   Metatarsals
9. Name this bone (or group of bones).
   Metatarsals
10. Name this bone (or group of bones).
    Proximal phalanx
11. Name this bone (or group of bones).
    Middle phalanx
12. Name this bone (or group of bones).
    Proximal phalanx
13. Name this bone (or group of bones).
    Distal phalanx
14. Name this bone (or group of bones).
    Distal phalanx

Check your answers, then wipe the front clean for the next round.
