BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 1 · MENINGES

PRACTICE

Meninges of the brain (cadaver)

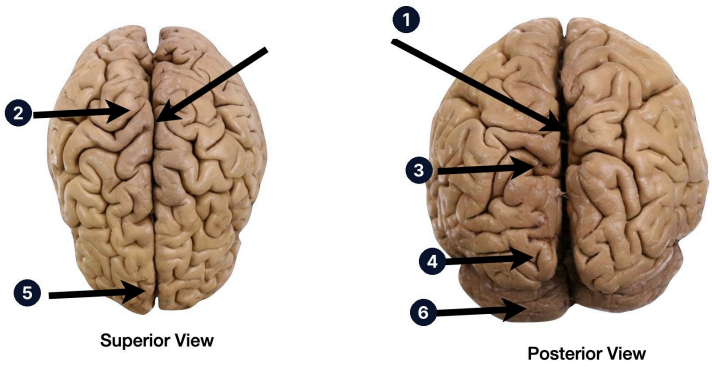

1. Name this outer meninx.
2. Name this middle meninx.
3. Name this outer meninx.
4. Name this middle meninx.
5. Name the meninx on the brain surface.

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 2 · CEREBRUM

PRACTICE

Cerebrum, superior and posterior views

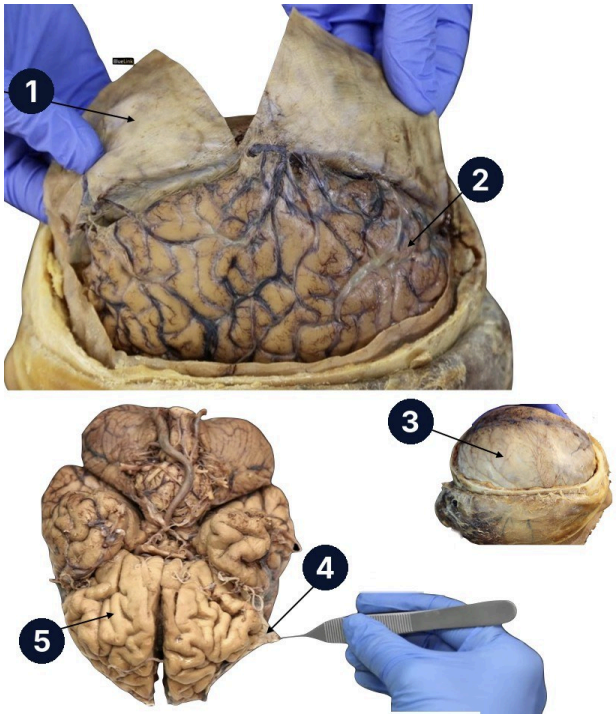

1. Name this fissure. (What dural fold sits in it?)
2. Name this lobe.
3. Name this lobe.
4. Name this lobe.
5. Name this lobe.
6. Name this part of the brain.

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 1 · MENINGES

ANSWER KEY

Meninges of the brain (cadaver)

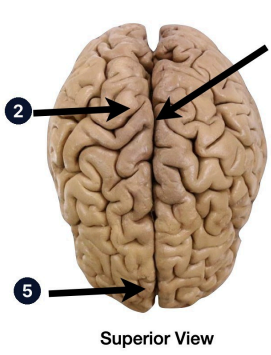

1. Name this outer meninx.
   Dura mater
2. Name this middle meninx.
   Arachnoid mater
3. Name this outer meninx.
   Dura mater
4. Name this middle meninx.
   Arachnoid mater
5. Name the meninx on the brain surface.
   Pia mater

Check your answers, then wipe the front clean for the next round.

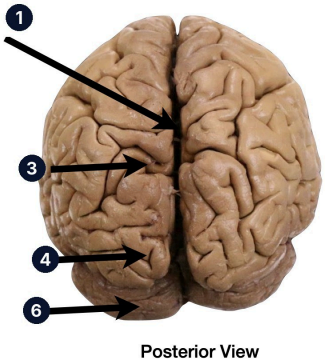

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 2 · CEREBRUM

ANSWER KEY

Cerebrum, superior and posterior views

Superior View

Posterior View

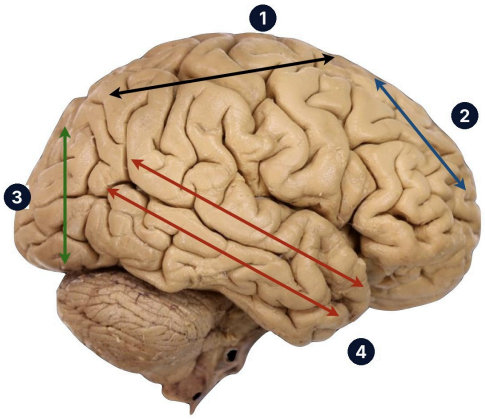

1. Name this fissure. (What dural fold sits in it?)
   Longitudinal fissure
2. Name this lobe.
   Parietal lobe
3. Name this lobe.
   Parietal lobe
4. Name this lobe.
   Occipital lobe
5. Name this lobe.
   Frontal lobe
6. Name this part of the brain.
   Cerebellum

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 3 · CEREBRUM

Lobes of the cerebrum, lateral view

PRACTICE

1. Name the lobe marked by the black arrow.

2. Name the lobe marked by the blue arrow.

3. Name the lobe marked by the green arrow.

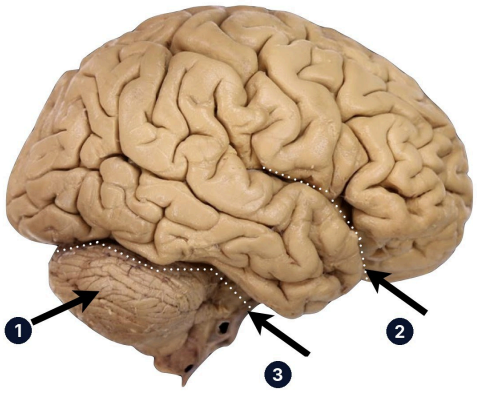

4. Name the lobe marked by the red arrows.

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 4 · CEREBRUM

Cerebrum and cerebellum, lateral view

PRACTICE

1. Name this part of the brain.

2. Name this groove (follow the dotted line).

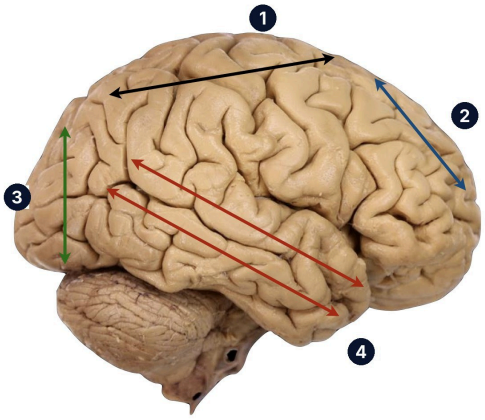

3. Name this fissure. (What dural fold sits in it?)

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 3 · CEREBRUM

Lobes of the cerebrum, lateral view

ANSWER KEY

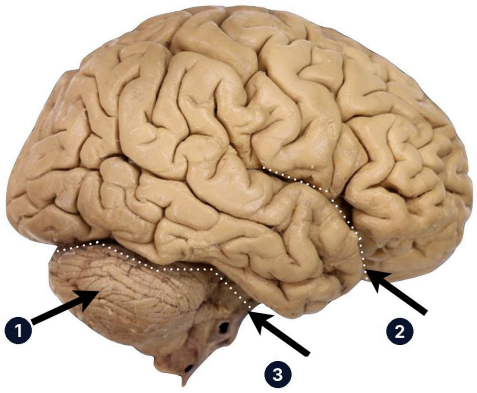

1. Name the lobe marked by the black arrow.
   Parietal lobe
2. Name the lobe marked by the blue arrow.
   Frontal lobe
3. Name the lobe marked by the green arrow.
   Occipital lobe
4. Name the lobe marked by the red arrows.
   Temporal lobe

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 4 · CEREBRUM

Cerebrum and cerebellum, lateral view

ANSWER KEY

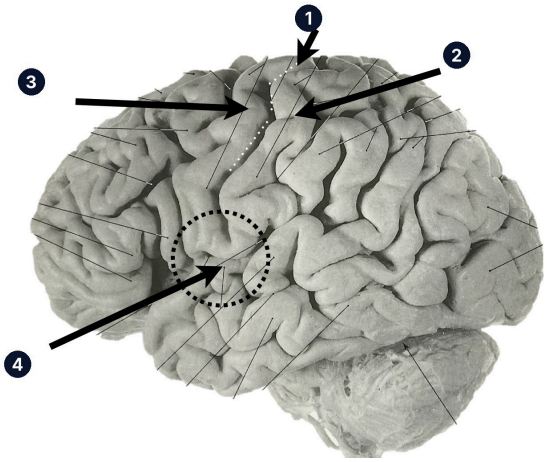

1. Name this part of the brain.
   Cerebellum
2. Name this groove (follow the dotted line).
   Lateral sulcus
3. Name this fissure. (What dural fold sits in it?)
   Transverse fissure

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 5 · CEREBRUM

PRACTICE

Central sulcus and gyri, lateral view

1. Name this groove (dotted line).

2. Name this gyrus. What is its function?

3. Name this gyrus. What is its function?

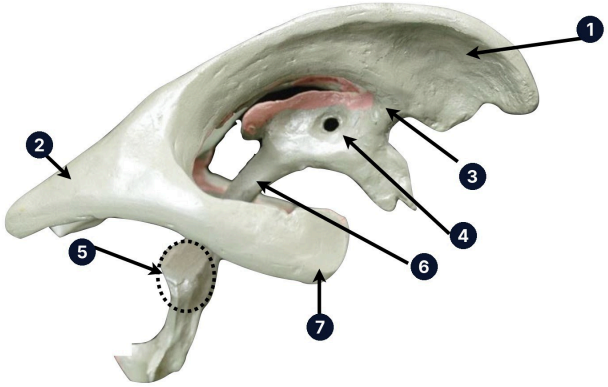

4. Name the lobe deep to the lateral sulcus.

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 8 · VENTRICLES AND CSF

PRACTICE

Ventricles and CSF flow (cast model)

1. Name this ventricle.

2. Name this ventricle.

3. Name this opening.

4. Name this ventricle.

5. Name this ventricle.

6. Name this channel.

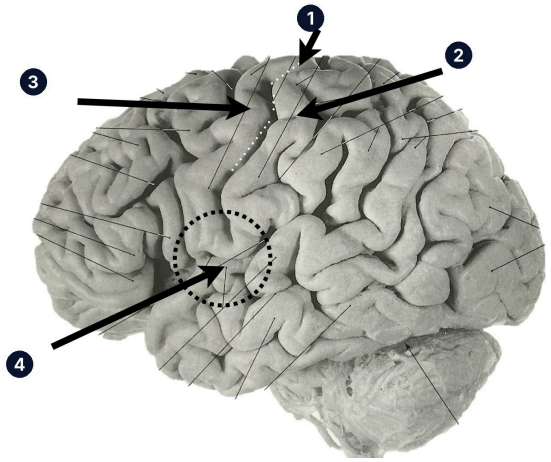

7. Name this ventricle.

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 5 · CEREBRUM

Central sulcus and gyri, lateral view

ANSWER KEY

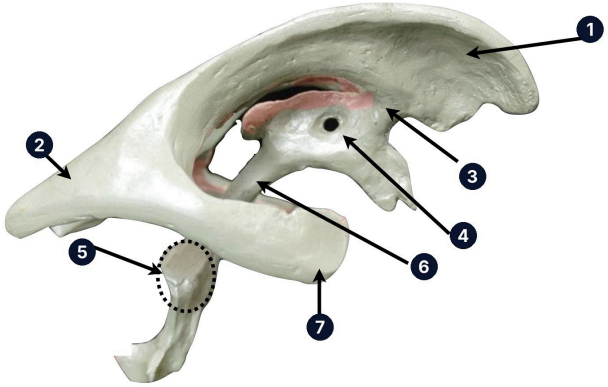

1. Name this groove (dotted line).
   Central sulcus
2. Name this gyrus. What is its function?
   Postcentral gyrus
3. Name this gyrus. What is its function?
   Precentral gyrus
4. Name the lobe deep to the lateral sulcus.
   Insula

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 8 · VENTRICLES AND CSF

Ventricles and CSF flow (cast model)

ANSWER KEY

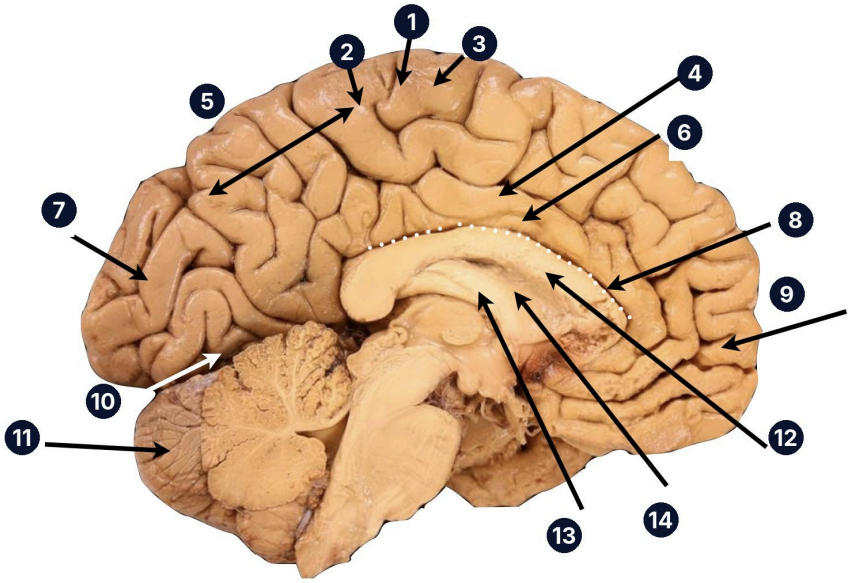

1. Name this ventricle.
   Lateral ventricle
2. Name this ventricle.
   Lateral ventricle
3. Name this opening.
   Interventricular foramen
4. Name this ventricle.
   Third ventricle
5. Name this ventricle.
   Fourth ventricle
6. Name this channel.
   Cerebral aqueduct
7. Name this ventricle.
   Lateral ventricle

Check your answers, then wipe the front clean for the next round.

PRACTICE

Brain, midsagittal view

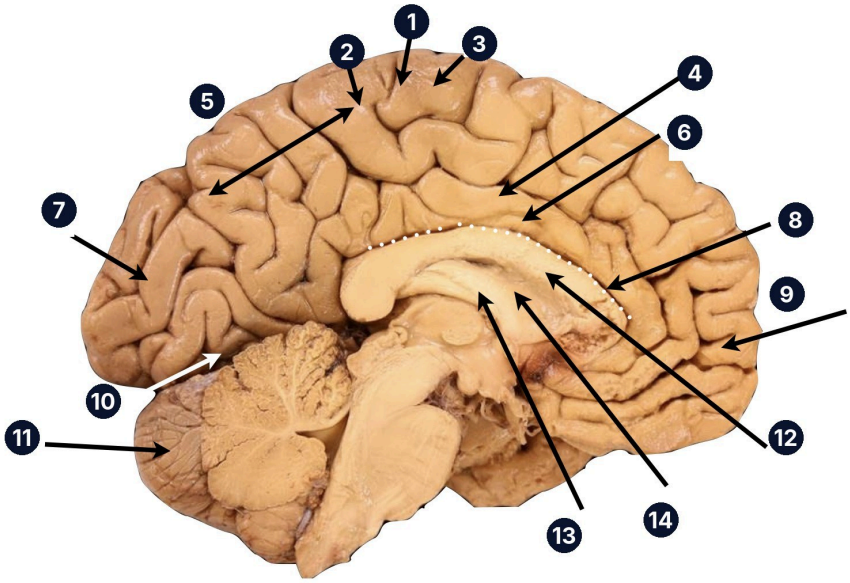

1. Name this groove.
2. Name this gyrus.
3. Name this groove.
4. Name this groove.
5. Name this lobe.
6. Name this gyrus.
7. Name this lobe.
8. Name this groove (dotted line).
9. Name this lobe.
10. Name this fissure.
11. Name this part of the brain.
12. Name this band of white matter.
13. Name this arched tract.
14. Name this thin membrane.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Brain, midsagittal view

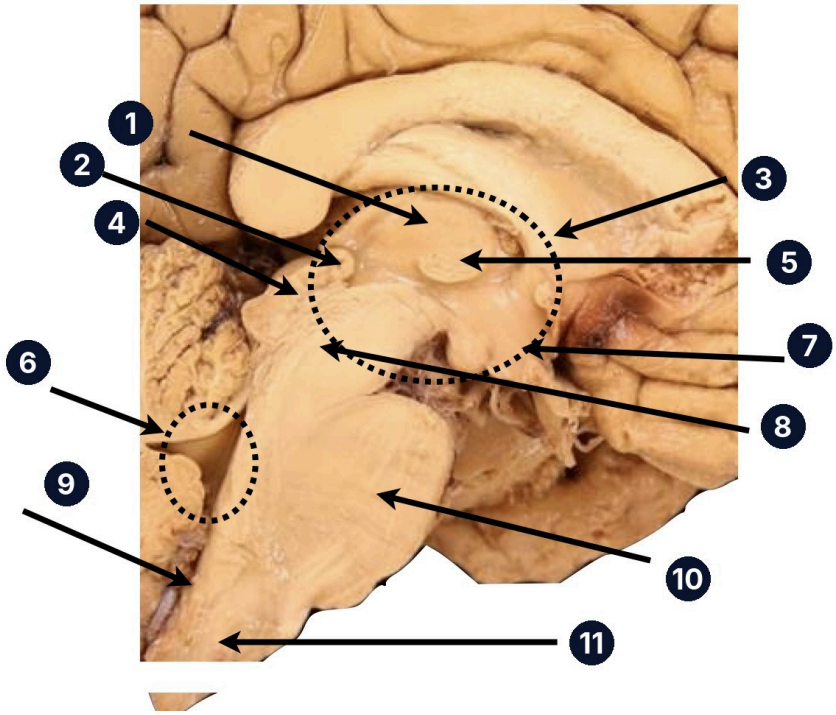

1. Name this groove.
   Central sulcus
2. Name this gyrus.
   Postcentral gyrus
3. Name this groove.
   Precentral sulcus
4. Name this groove.
   Cingulate sulcus
5. Name this lobe.
   Parietal lobe
6. Name this gyrus.
   Cingulate gyrus
7. Name this lobe.
   Occipital lobe
8. Name this groove (dotted line).
   Sulcus of the corpus callosum
9. Name this lobe.
   Frontal lobe
10. Name this fissure.
    Transverse fissure
11. Name this part of the brain.
    Cerebellum
12. Name this band of white matter.
    Corpus callosum
13. Name this arched tract.
    Fornix
14. Name this thin membrane.
    Septum pellucidum

Check your answers, then wipe the front clean for the next round.

PRACTICE

Brainstem and thalamus region, midsagittal

1. Name this structure.

2. Name this gland.

3. Name this ventricle.

4. Name these four bumps of the midbrain.

5. Name this bridge between the two thalami.

6. Name this ventricle.

7. Name this region.

8. Name this part of the brainstem.

9. Name this canal.

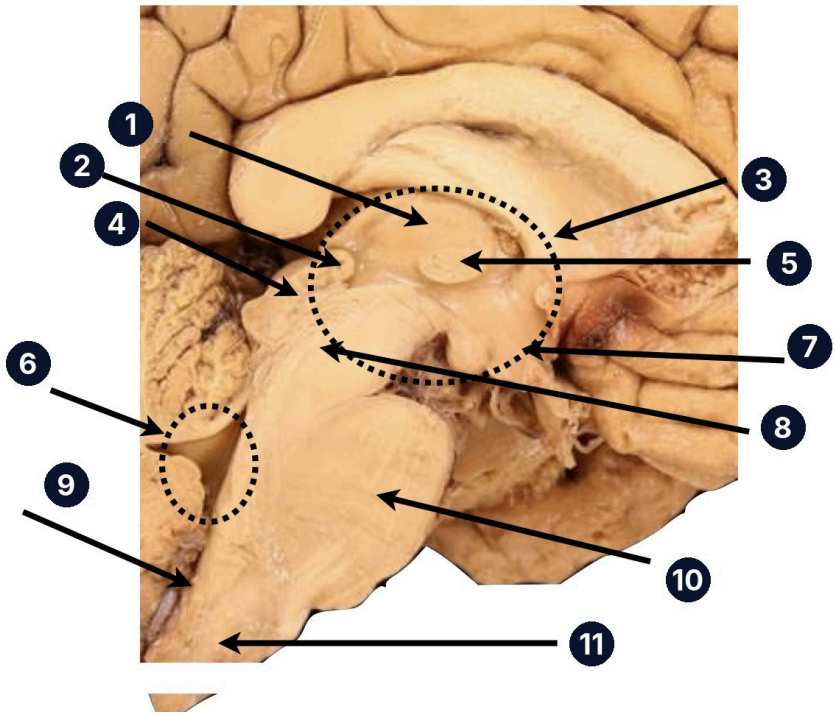

10. Name this part of the brainstem.

11. Name this part of the brainstem.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Brainstem and thalamus region, midsagittal

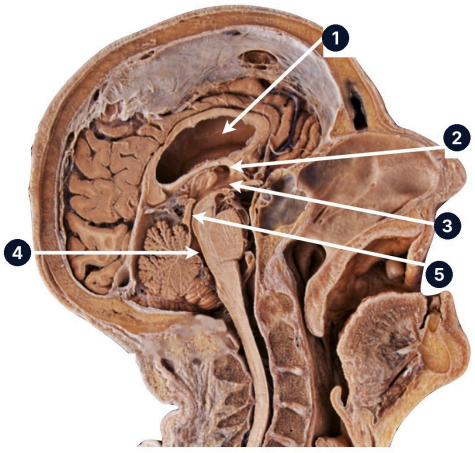

1. Name this structure.
   Thalamus
2. Name this gland.
   Pineal gland
3. Name this ventricle.
   Third ventricle
4. Name these four bumps of the midbrain.
   Corpora quadrigemina
5. Name this bridge between the two thalami.
   Massa intermedia (interthalamic adhesion)
6. Name this ventricle.
   Fourth ventricle
7. Name this region.
   Hypothalamus
8. Name this part of the brainstem.
   Midbrain
9. Name this canal.
   Central canal
10. Name this part of the brainstem.
    Pons
11. Name this part of the brainstem.
    Medulla oblongata

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 9 · VENTRICLES AND CSF

PRACTICE

Ventricles and CSF flow (head, midsagittal)

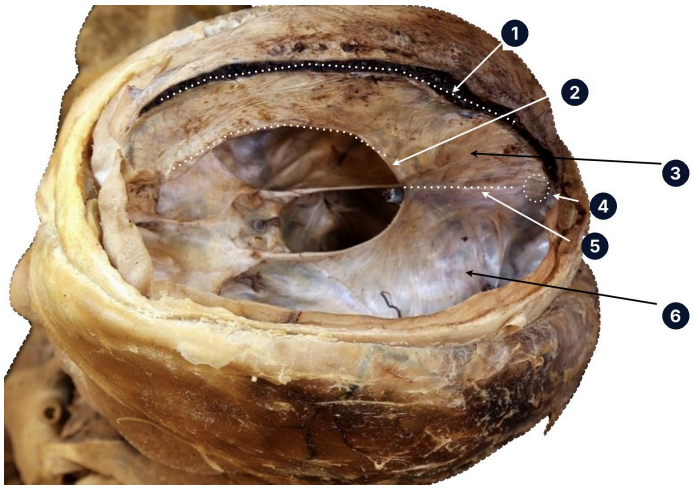

1. Name this ventricle.
2. Name this opening.
3. Name this ventricle.
4. Name this ventricle.
5. Name this channel.

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 13 · DURAL FOLDS AND SINUSES

PRACTICE

Dural folds and sinuses, cranial cavity opened

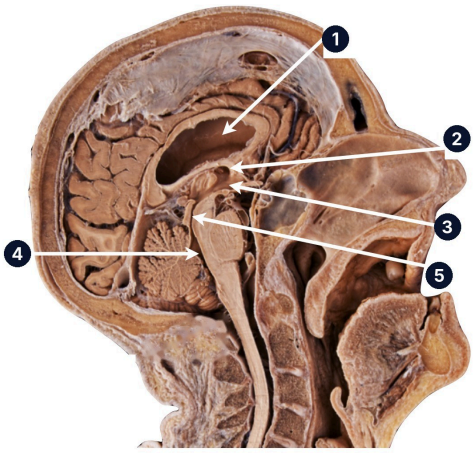

1. Name this dural venous sinus.
2. Name this dural venous sinus.
3. Name this dural fold.
4. Name this meeting point of sinuses.
5. Name this dural venous sinus.
6. Name this dural fold.

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 9 · VENTRICLES AND CSF

ANSWER KEY

Ventricles and CSF flow (head, midsagittal)

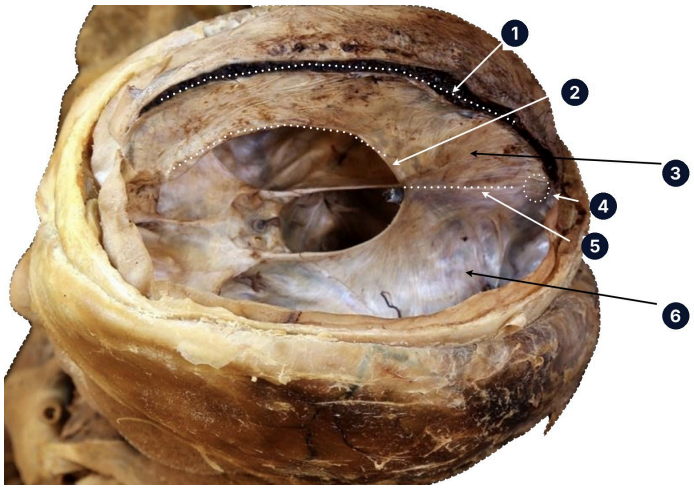

1. Name this ventricle.
   Lateral ventricle
2. Name this opening.
   Interventricular foramen
3. Name this ventricle.
   Third ventricle
4. Name this ventricle.
   Fourth ventricle
5. Name this channel.
   Cerebral aqueduct

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 13 · DURAL FOLDS AND SINUSES

ANSWER KEY

Dural folds and sinuses, cranial cavity opened

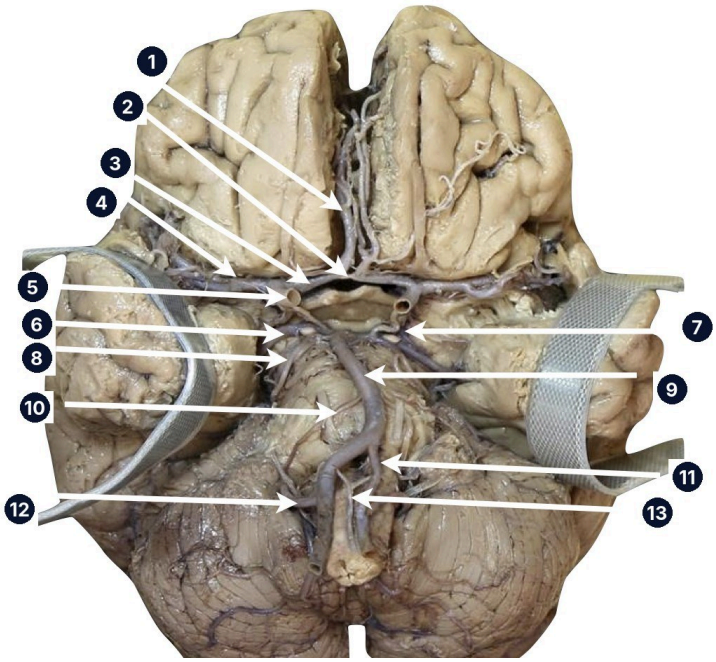

1. Name this dural venous sinus.
   Superior sagittal sinus
2. Name this dural venous sinus.
   Inferior sagittal sinus
3. Name this dural fold.
   Falx cerebri
4. Name this meeting point of sinuses.
   Confluence of sinuses
5. Name this dural venous sinus.
   Straight sinus
6. Name this dural fold.
   Tentorium cerebelli

Check your answers, then wipe the front clean for the next round.

PRACTICE

Circle of Willis, inferior view

1 Name this vessel.

2 Name this vessel.

3 Name this vessel.

4 Name this vessel.

5 Name this vessel.

6 Name this vessel.

7 Name this vessel.

8 Name this vessel.

9 Name this vessel.

10 Name this vessel.

11 Name this vessel.

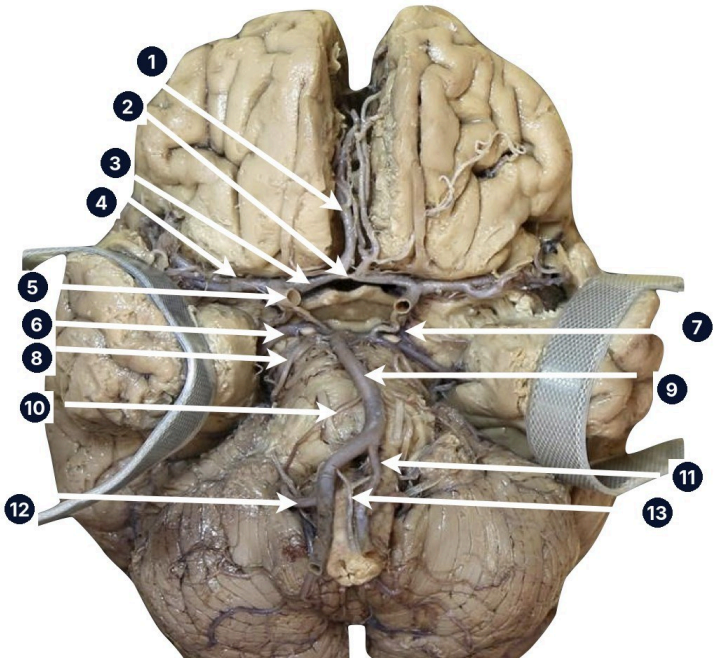

12 Name this vessel.

13 Name this vessel.

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Circle of Willis, inferior view

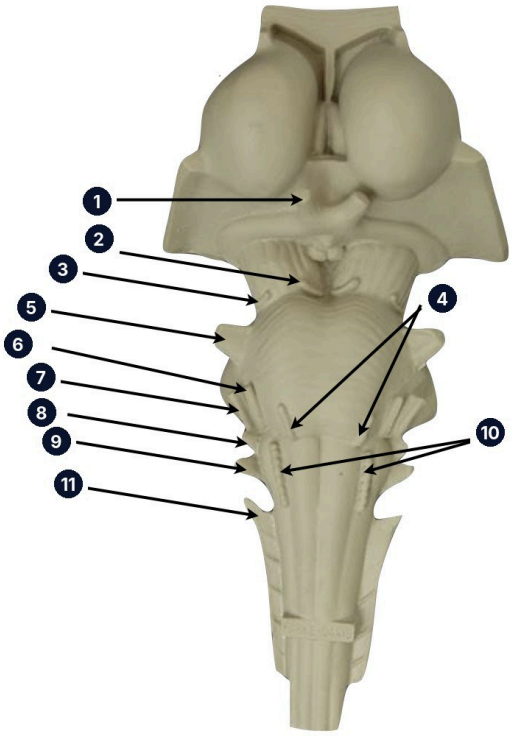

1. Name this vessel.
   Anterior cerebral artery
2. Name this vessel.
   Anterior communicating artery
3. Name this vessel.
   Anterior cerebral artery
4. Name this vessel.
   Middle cerebral artery
5. Name this vessel.
   Internal carotid artery
6. Name this vessel.
   Posterior cerebral artery
7. Name this vessel.
   Posterior communicating artery
8. Name this vessel.
   Superior cerebellar artery
9. Name this vessel.
   Basilar artery
10. Name this vessel.
    Anterior inferior cerebellar artery
11. Name this vessel.
    Vertebral artery
12. Name this vessel.
    Posterior inferior cerebellar artery
13. Name this vessel.
    Anterior spinal artery

Check your answers, then wipe the front clean for the next round.

PRACTICE

Cranial nerves, brainstem model

1 Name this cranial nerve. _____

2 Name this cranial nerve. _____

3 Name this cranial nerve. _____

4 Name this cranial nerve. _____

5 Name this cranial nerve. _____

6 Name this cranial nerve. _____

7 Name this cranial nerve. _____

8 Name this cranial nerve. _____

9 Name this cranial nerve. _____

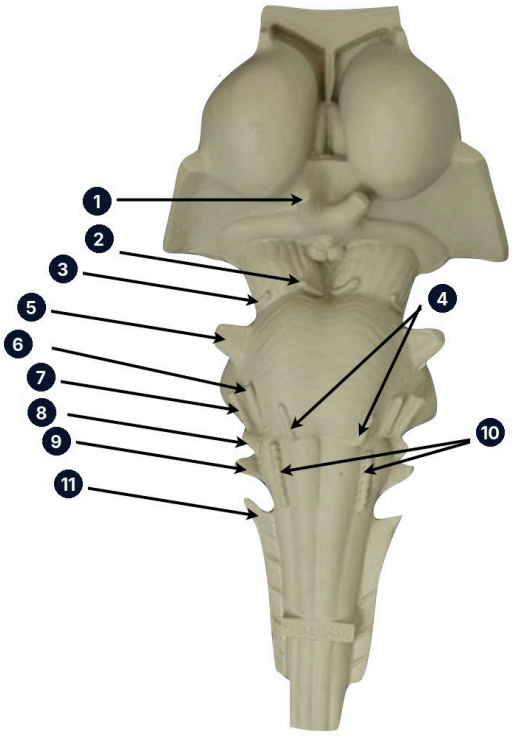

10 Name this cranial nerve. _____

11 Name this cranial nerve. _____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Cranial nerves, brainstem model

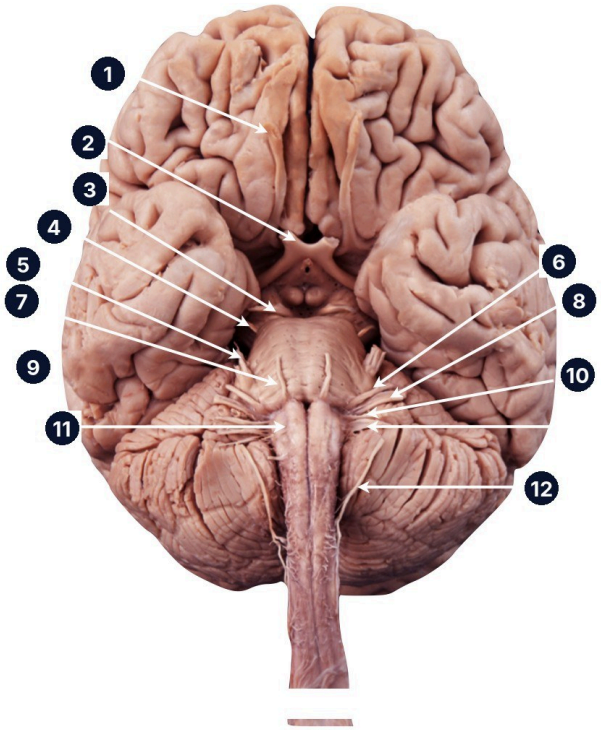

1. Name this cranial nerve.
   Optic nerve (CN II)
2. Name this cranial nerve.
   Oculomotor nerve (CN III)
3. Name this cranial nerve.
   Trochlear nerve (CN IV)
4. Name this cranial nerve.
   Abducens nerve (CN VI)
5. Name this cranial nerve.
   Trigeminal nerve (CN V)
6. Name this cranial nerve.
   Facial nerve (CN VII)
7. Name this cranial nerve.
   Vestibulocochlear nerve (CN VIII)
8. Name this cranial nerve.
   Glossopharyngeal nerve (CN IX)
9. Name this cranial nerve.
   Vagus nerve (CN X)
10. Name this cranial nerve.
    Hypoglossal nerve (CN XII)
11. Name this cranial nerve.
    Accessory nerve (CN XI)

Check your answers, then wipe the front clean for the next round.

PRACTICE

Cranial nerves, brain inferior view (cadaver)

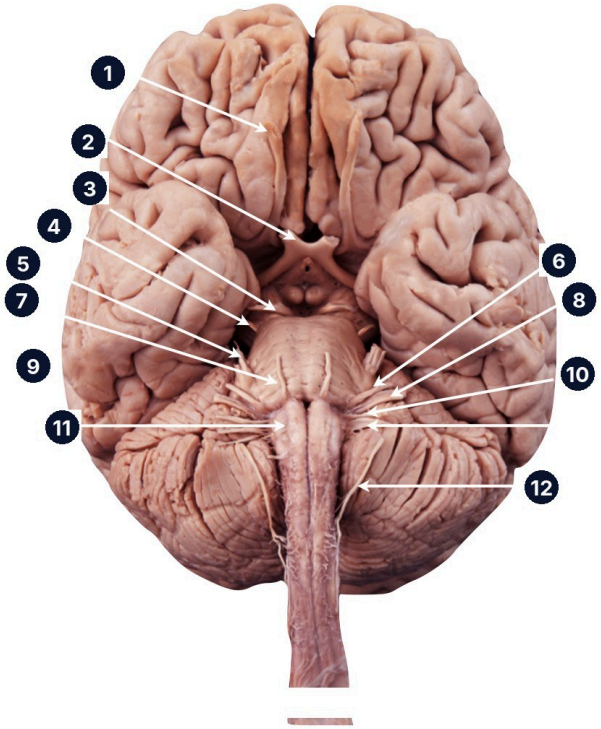

1. Name this cranial nerve. _____
2. Name this cranial nerve. _____
3. Name this cranial nerve. _____
4. Name this cranial nerve. _____
5. Name this cranial nerve. _____
6. Name this cranial nerve. _____
7. Name this cranial nerve. _____
8. Name this cranial nerve. _____
9. Name this cranial nerve. _____
10. Name this cranial nerve. _____
11. Name this cranial nerve. _____
12. Name this cranial nerve. _____

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Cranial nerves, brain inferior view (cadaver)

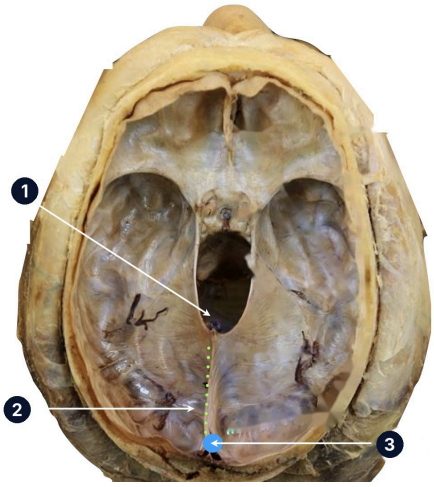

1. Name this cranial nerve.
   Olfactory nerve (CN I)
2. Name this cranial nerve.
   Optic nerve (CN II)
3. Name this cranial nerve.
   Oculomotor nerve (CN III)
4. Name this cranial nerve.
   Trochlear nerve (CN IV)
5. Name this cranial nerve.
   Trigeminal nerve (CN V)
6. Name this cranial nerve.
   Facial nerve (CN VII)
7. Name this cranial nerve.
   Abducens nerve (CN VI)
8. Name this cranial nerve.
   Vestibulocochlear nerve (CN VIII)
9. Name this cranial nerve.
   Glossopharyngeal nerve (CN IX)
10. Name this cranial nerve.
    Vagus nerve (CN X)
11. Name this cranial nerve.
    Hypoglossal nerve (CN XII)
12. Name this cranial nerve.
    Accessory nerve (CN XI)

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 14 · DURAL FOLDS AND SINUSES

PRACTICE

Dural folds, cranial floor from above

1. Name this opening in the dural fold.

2. Name this cut dural fold.

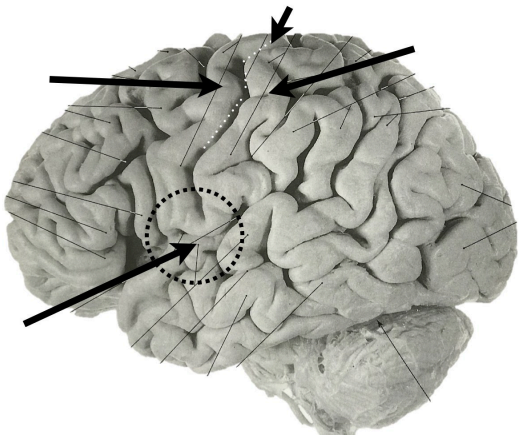

3. Name this meeting point of sinuses (blue dot).

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 15 · FUNCTIONS

PRACTICE

Brain: functions and CSF (1)

1. What is the function of the precentral gyrus?

2. What is the function of the postcentral gyrus?

3. Which dural fold sits in the longitudinal fissure?

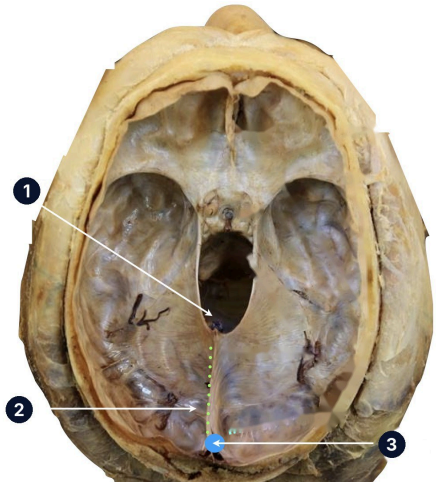

4. Which dural fold sits in the transverse fissure?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 14 · DURAL FOLDS AND SINUSES

ANSWER KEY

Dural folds, cranial floor from above

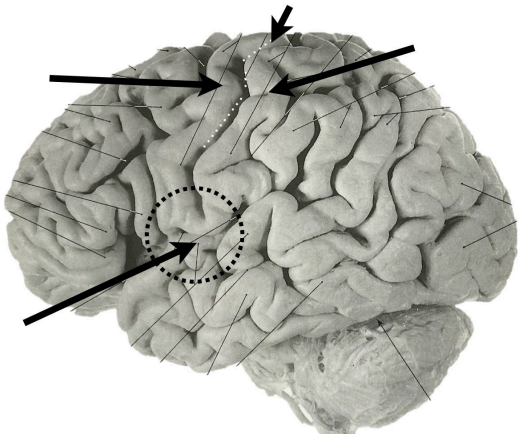

1. Name this opening in the dural fold.
   Tentorial notch
2. Name this cut dural fold.
   Falx cerebri (cut)
3. Name this meeting point of sinuses (blue dot).
   Confluence of sinuses

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · BRAIN AND CRANIAL NERVES · CARD 15 · FUNCTIONS

ANSWER KEY

Brain: functions and CSF (1)

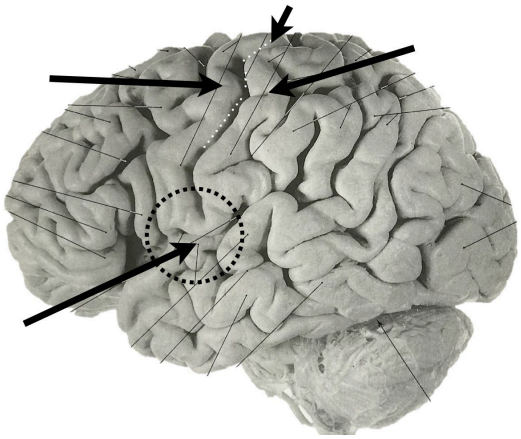

1. What is the function of the precentral gyrus?
   Primary motor cortex
2. What is the function of the postcentral gyrus?
   Primary somatosensory cortex (body sensation)
3. Which dural fold sits in the longitudinal fissure?
   Falx cerebri
4. Which dural fold sits in the transverse fissure?
   Tentorium cerebelli

Check your answers, then wipe the front clean for the next round.

Brain: functions and CSF (2)

PRACTICE

1. What makes CSF?

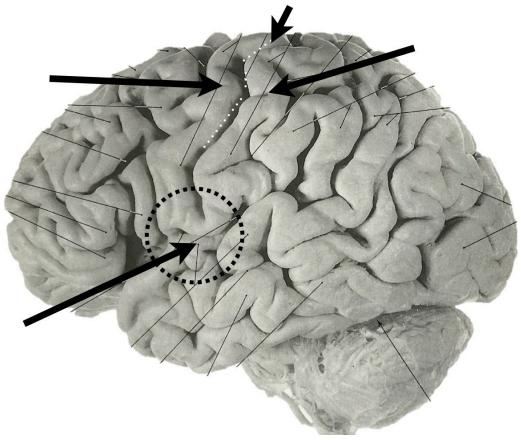

2. Put CSF flow in order, starting in the lateral ventricles.

3. Which two pairs of arteries feed the circle of Willis?

Write each answer on its line with a dry-erase marker, then flip the card to check.

ANSWER KEY

Brain: functions and CSF (2)

Check your answers, then wipe the front clean for the next round.

1. What makes CSF?

   The choroid plexus (ependymal cells) in the ventricles

2. Put CSF flow in order, starting in the lateral ventricles.

   Lateral ventricles, interventricular foramen, third ventricle, cerebral aqueduct, fourth ventricle, then the apertures into the subarachnoid space

3. Which two pairs of arteries feed the circle of Willis?

   Internal carotid arteries and vertebral arteries (through the basilar artery)
