BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 1 · SPINAL CORD

Spinal cord enlargements, posterior view (cadaver)

PRACTICE

1. Name this enlargement. Which plexus comes off it?

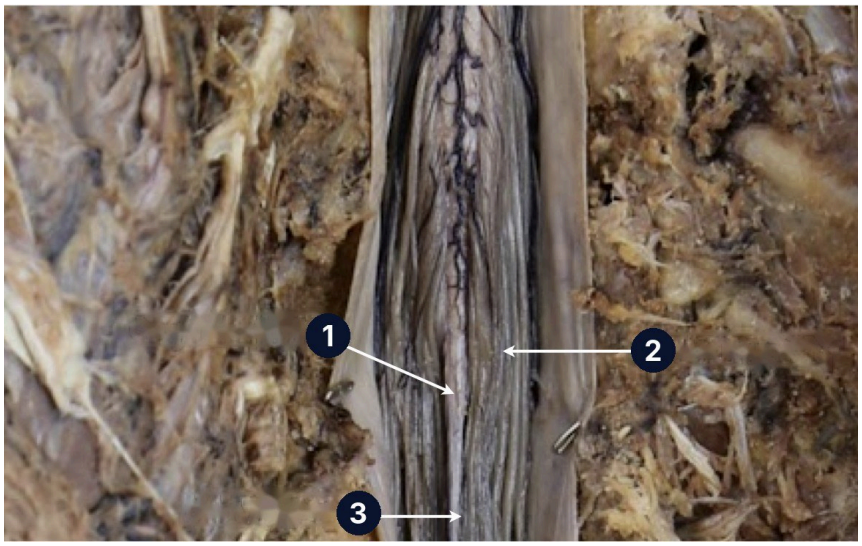

2. Name this enlargement. Which plexuses come off it?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 2 · SPINAL CORD

End of the spinal cord (cadaver)

PRACTICE

1. Name the tapered end of the spinal cord.

2. Name this bundle of nerve roots.

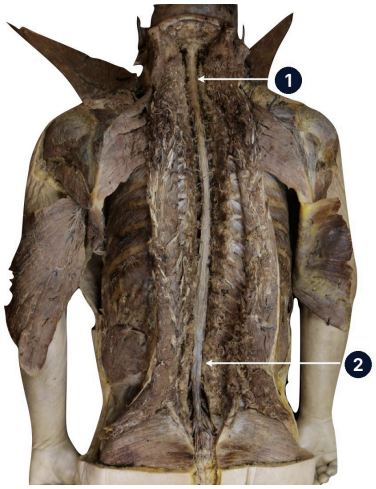

3. Name this strand that anchors the cord.

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 1 · SPINAL CORD

Spinal cord enlargements, posterior view (cadaver)

ANSWER KEY

1. Name this enlargement. Which plexus comes off it?

   Cervical enlargement

2. Name this enlargement. Which plexuses come off it?

   Lumbar enlargement

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 2 · SPINAL CORD

End of the spinal cord (cadaver)

ANSWER KEY

1. Name the tapered end of the spinal cord.

   Conus medullaris

2. Name this bundle of nerve roots.

   Cauda equina

3. Name this strand that anchors the cord.

   Filum terminale

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 3 · SPINAL CORD

Meninges of the spinal cord (cadaver)

PRACTICE

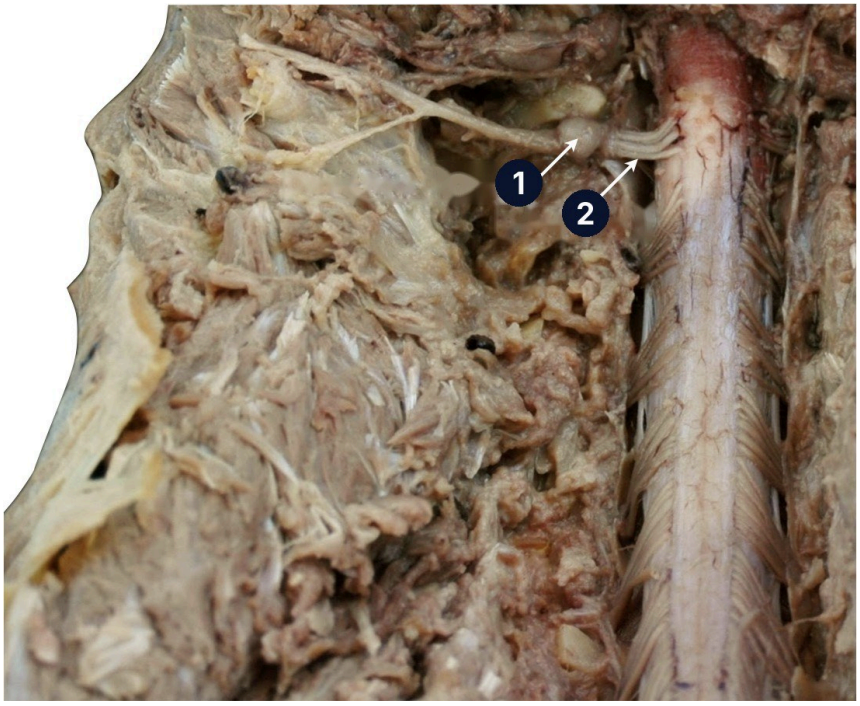

1. Name this outer meninx.
2. Name this space. _____
3. Name this middle meninx. _____
4. Name this space. What fluid is in it? _____
5. Name the meninx on the cord surface. _____

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 4 · SPINAL CORD

Dorsal root and ganglion, posterior view (cadaver)

PRACTICE

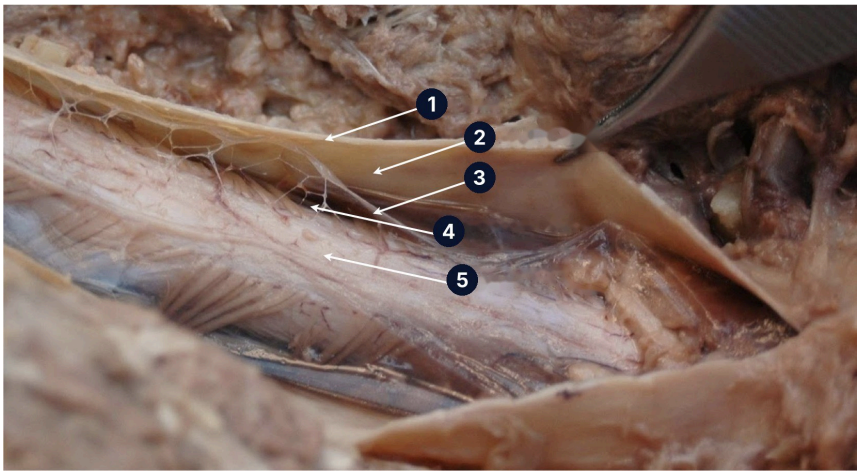

1. Name this swelling. What cell bodies are in it?
2. Name this root. _____

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 3 · SPINAL CORD

Meninges of the spinal cord (cadaver)

ANSWER KEY

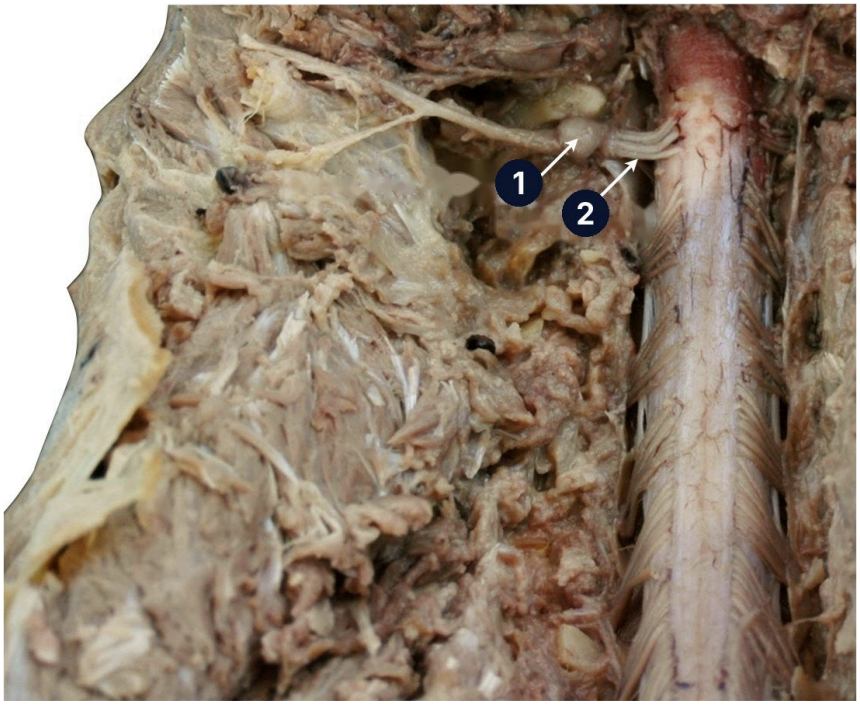

1. Name this outer meninx.
   Dura mater
2. Name this space.
   Subdural space
3. Name this middle meninx.
   Arachnoid mater
4. Name this space. What fluid is in it?
   Subarachnoid space
5. Name the meninx on the cord surface.
   Pia mater

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 4 · SPINAL CORD

Dorsal root and ganglion, posterior view (cadaver)

ANSWER KEY

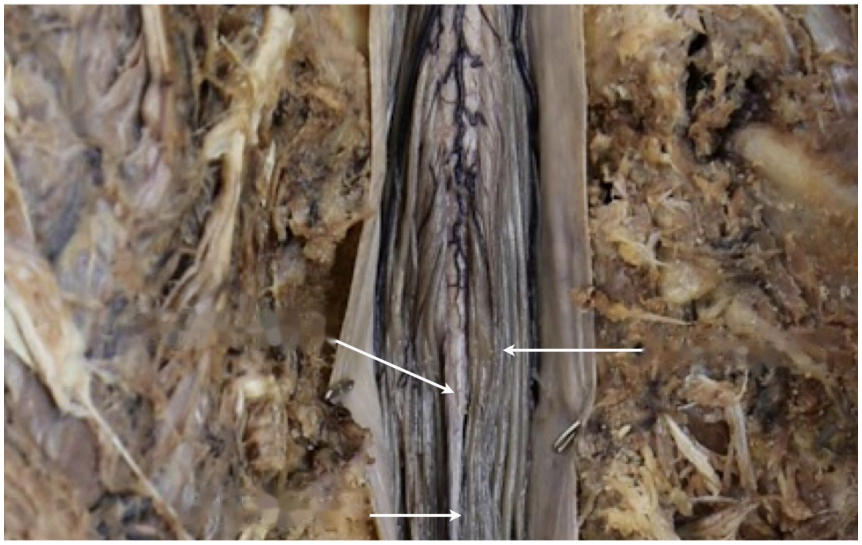

1. Name this swelling. What cell bodies are in it?
   Dorsal root ganglion
2. Name this root.
   Dorsal root

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 5 · KEY FACTS

Spinal cord: key facts (1)

PRACTICE

1. Where does the spinal cord end in an adult?

2. What is the filum terminale made of, and what does it do?

3. What is the cauda equina?

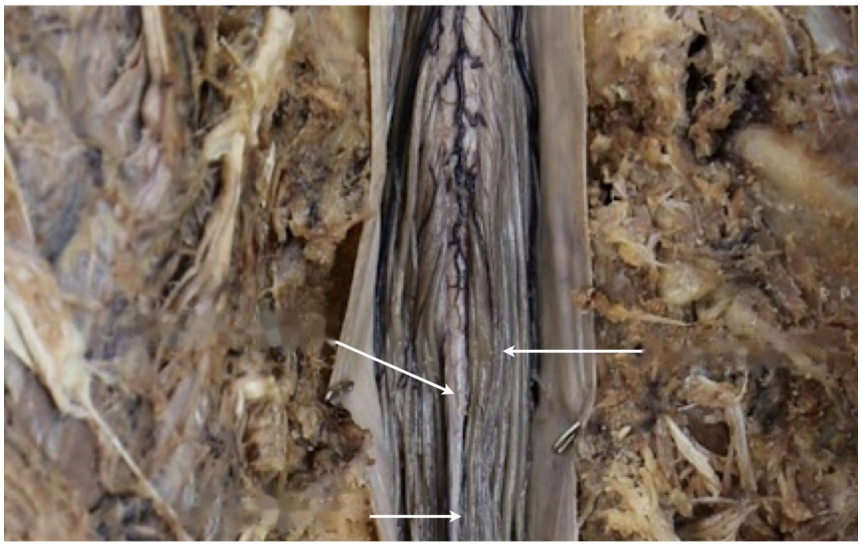

4. The cervical enlargement supplies which limb, through which plexus?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 6 · KEY FACTS

Spinal cord: key facts (2)

PRACTICE

1. The lumbar enlargement supplies which region, through which plexuses?

2. Which space around the spinal cord holds CSF?

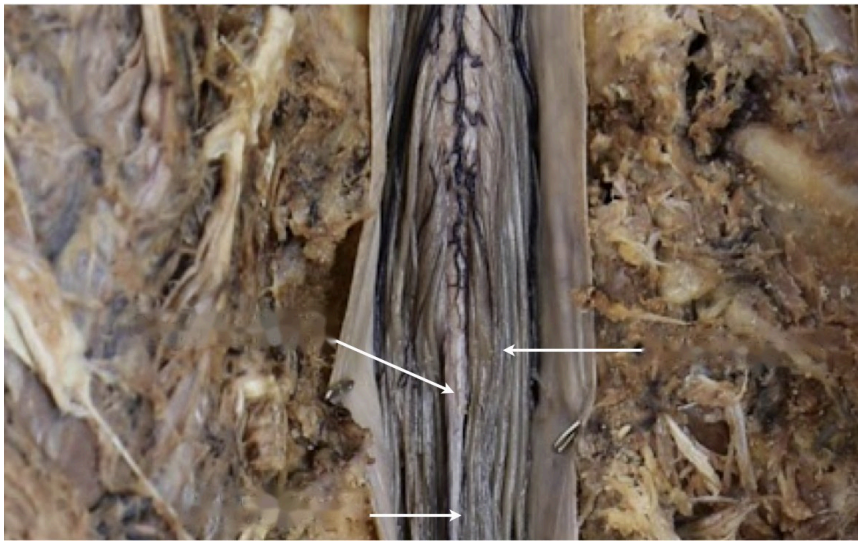

3. What cell bodies sit in the dorsal root ganglion?

Write each answer on its line with a dry-erase marker, then flip the card to check.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 5 · KEY FACTS

Spinal cord: key facts (1)

ANSWER KEY

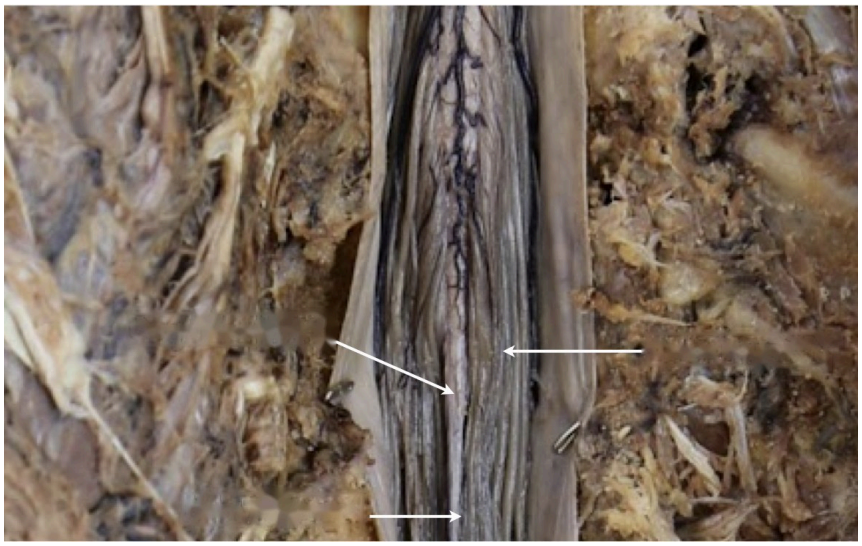

1. Where does the spinal cord end in an adult?
   At the conus medullaris, about L1 to L2
2. What is the filum terminale made of, and what does it do?
   Pia mater; it anchors the cord to the coccyx
3. What is the cauda equina?
   The bundle of nerve roots below the end of the cord
4. The cervical enlargement supplies which limb, through which plexus?
   The upper limb, through the brachial plexus

Check your answers, then wipe the front clean for the next round.

BIO 004 ANATOMY ATLAS · SPINAL CORD · CARD 6 · KEY FACTS

Spinal cord: key facts (2)

ANSWER KEY

1. The lumbar enlargement supplies which region, through which plexuses?
   The lower limb, through the lumbar and sacral plexuses
2. Which space around the spinal cord holds CSF?
   Subarachnoid space
3. What cell bodies sit in the dorsal root ganglion?
   Sensory (afferent) neuron cell bodies

Check your answers, then wipe the front clean for the next round.
